Deloitte’s 2019 back-to-school survey: key findings

**Back-to-school spend expected to remain relatively flat (+1.8%), as online spend increases**

- Total back-to-school spending is **expected to reach $27.8B or $519 per student**, up slightly from $510 in 2018
- The **electronic gadgets category is expected to grow by $800M (+29% over 2018)**, while the computers and hardware category is expected to decline by $600M (-16% below last year)
- Households plan to spend **56% of their budget in-store and 29% online** with the remaining 15% up for grabs with undecided shoppers; online has grown from 22% to 29% since 2016
- Compared to last year, **electronic gadgets represent the only category in which online sales are expected to grow at the expense of in-store shopping** (an increase in nearly 20 percentage points)
- **Mobile use is expected to increase this year** (+7 percentage points in planned use), while desktops/laptops, and social are expected to decline. Newer tech (e.g., voice assisted, digital reality) has yet to gain traction for B2S

**Consumers are clear: Price, product, and convenience matter most**

- **Fundamentals matter in driving back-to-school purchases:** Price is likely to be the predominant driver with sales/discounts (69%) and competitive prices (57%) as the top attributes driving purchase decisions
- **Mass merchants retain their spot as the number one shopping location** (88% plan to visit), with online only, dollar stores, specialty retailers, and off-price rounding out the top five
- **31% of consumers plan to donate** additional school supplies for those in need, with a projected value of $51
- Similar to 2018, higher-income shoppers are more likely to visit department stores, home electronics, and specialty apparel, while lower-income shoppers are more likely to visit price-based formats (e.g., mass market, dollar stores)

**Back-to-school shopping peaks mid-summer**

- **60% of shoppers are likely to start shopping approximately 4-6 weeks before school starts**; however, these shoppers expect to spend less than very early or late starters
- Shopping is expected to **peak in late July and early August**, accounting for 62%, or 17.3B of all spending
Back-to-school market size
Back-to-school (B2S)* shopping season spend, which accounts for 50%+ of annual school-related purchases, expected to remain relatively flat compared with last year

$519
average back-to-school spend per student
(+1.8% YoY growth from $510 in 2018)

29 million households**

54 million children***

$27.8 billion in projected spending#

50%+ annual school-related spending during B2S season^  

* Back-to-school shopping season includes school-related shopping from July to September, ahead of the Fall 2019 academic calendar  
** Number of households with school-going (K-12 grades) children in the US [Source: US Current Population Survey 2018]  
# Percentage of child’s annual school-related products that will likely be purchased during back-to-school shopping season [Source: Deloitte survey]  
^ Deloitte calculations on back-to-school market spend ($27.8 billion) [Source: Deloitte survey and US Current Population Survey 2018]
Clothing and accessories category is expected to maintain the majority share of spend; the largest increase is expected in electronic gadgets like mobile phones and wearables.

**Estimated market spend by category - 2019**

- **Clothing and accessories**: $15.0B
- **School supplies**: $6.1B
- **Computers and hardware**: $3.1B
- **Electronic gadgets**: $3.6B

Source: Deloitte calculations on back-to-school market spend ($27.8 billion) [Source: Deloitte survey and US Current Population Survey 2018]

Note: Sample size (N) = 1,200

*Electronic gadgets include cell phones/smart phones, tablet/e-reader, and wearable devices, voice and mobile data plans, digital subscription*
Consistent with last year, clothing and accessories has high expected demand and spend; the largest spend per category is expected from electronic gadgets.

Back-to-school shoppers planned spend shows a shift from computers and hardware to electronics gadgets from 2018 to 2019

**Electronic gadgets:**
- +2.6 percentage point increase
  - Increase in number of consumers planning to purchase wearable technology
- +$41 increase
  - In average dollar amount spent on electronic gadgets spend
- +$800M increase
  - (+29% over 2018)
  - In expected spend on electronic gadgets in 2019

**Computers and hardware:**
- -2.4 percentage point decrease
  - Decrease in number of consumers planning to purchase computers
- -$13 decline
  - In average dollar amount spent on computers and hardware spend
- -$600M decrease
  - (-16% decline from 2018)
  - In expected spend on computers and hardware in 2019

Question: "What are the most important considerations when selecting a retailer for back-to-school shopping?"; # - Multi-response question
Sample size (N) = 1,200
Fundamentals with B2S purchase behavior: Price, product, and convenience are analogous to reading, writing, and arithmetic

**Price**
- "Offer good pricing and clear ads and discounts"
- Lower prices, more deals, and coupons
- Bundled items and cheaper options
- Sales tax holidays

**Product**
- "Have kits already put together either at the store or at the school, I just want to walk up and buy it"
- Inventory to match local school lists
- Wider variety of styles and sizes
- Keep items in-stock all summer

**Convenience**
- "If I have to search more than 10 seconds I move on to another store"
- Everything in one section
- Provide school-specific and class-specific lists and bundles
- Easy checkouts to avoid crowded lines

**Expectations of retailers**
- Accept cheaper products/off-brand
- Donation drive to support underprivileged students
- Provide a specific shopping list early in the process
- Help parents avoid returns and waste
- Work with retailers to create ‘pre-configured’ kits
- Sell products directly from schools or parent-teacher organization

Sample size (N) = 1,200
While consumers expressed a desire for more convenient bundles for back-to-school shopping, only one-fifth of shoppers plan to buy “pre-configured” kits.

Parents planning to buy pre-configured school kits

- 2016: 32%
- 2017: 30%
- 2018: 29%
- 2019: 21%

2019 plan for pre-configured school kits

- Plan to buy: 21%
- Do not plan to buy: 32%
- School or PTA do not offer kits: 47%

Plan to take advantage of pre-configured “kits” of school supplies offered by child’s school or parent-teacher association

Question: "What are the most important considerations when selecting a retailer for back-to-school shopping?"; # - Multi-response question
Note: Sample size (N) = 1,200
Most back-to-school spending will continue to occur in-store; more shopping is likely to shift online from those who were undecided about channel.

**B2S spend – share by channel**

<table>
<thead>
<tr>
<th>Year</th>
<th>In-store</th>

</tr>
</tbody>
</table>

**Contribution to total B2S spend**

- In-store: $15.7 Billion
- Online: $8.1 Billion
- Undecided (In-store or Online): $4.0 Billion

**Question** – “Please indicate the % of the budgeted amount you expect to spend online or in-store or undecided”

**Note:** Sample size (N) = 1,200
Online shopping is expected to see its largest increases in the electronic gadgets category, while in-store shopping continues to dominate school supplies and clothing

### B2S spend by category and channel

</table>

### Key findings

- Compared to 2018, electronic gadgets was the only category where online sales are expected to grow at the expense of in-store sales.
- For all other categories, online sales will grow as a result of declining ‘undecided’ spend.

*Electronic gadgets include cell phones/smart phones, tablet/e-reader, and wearable devices, voice and mobile data plans, digital subscription
Sample size for each category - Only respondents who will purchase at least one item from the specific category.
Sales and discounts top the list regardless of channel; online shoppers note free shipping and in-store shoppers view store location as top considerations.

**Top considerations when selecting a retailer for B2S shopping**

**Predominantly in-store shoppers**
- Sales/price discounts: 70%
- Competitive prices: 60%
- Carries items on my school shopping list: 53%
- Store location: 53%
- Product quality: 49%

**Predominantly online shoppers**
- Sales/price discounts: 63%
- Free shipping: 58%
- Competitive prices: 57%
- Product quality: 45%
- Carries items on my school shopping list: 42%

^Predominantly Online shoppers - With 51% or more of B2S spend via online channel (n=185); Predominantly Instore shoppers – With 51% or more of B2S spend via instore channel (n=742)

Question: "What are the most important considerations when selecting a retailer for back-to-school shopping?"; # Multi-response question, top 5 shown
Children will likely influence approximately $20B in back-to-school spend (~70% of total), with the largest influence coming from clothing and accessories.

**Extent of child’s influence on parents’ back-to-school shopping**

<table>
<thead>
<tr>
<th>Category</th>
<th>No/slight child(ren) influence</th>
<th>Moderate/high child(ren) influence</th>

<td>$8.1B</td>
<td>$19.7B</td>
</tr>
</tbody>
</table>

*Total planned B2S spend by category that would be influenced by children
Source: Deloitte survey
Note: Sample size (includes only respondents who will purchase the above mentioned category or item)
It takes a village; 3 in 10 shoppers plan to donate additional school supplies for an average of $50 for those who donate.

Plans to donate additional school supplies

Question (1): "Are you planning to buy any additional school supplies to donate during back-to-school shopping?" (N=1,200)

*Question (2): "How much are you likely to spend on the additional school supplies to donate?" - Sample size (includes only respondents who plan to donate) (n = 371)

Average spend on school supplies for donations $51*
Compared to previous years, fewer shoppers are concerned about data breaches at their retail destinations.

Shopper concern about shopping at retailers that have experienced a data breach

Source: Deloitte survey: "Please indicate your level of agreement with the following statements:" (% Agree or Somewhat Agree)
Note: Sample size (N) = 1,200
Back-to-school timing
B2S timing is expected to be consistent with last year, peaking in early August; 90% of shoppers plan to be active in late-July and early-August comprising 62% of all spend

**B2S shopping periods by traffic and total spend**

- Earlier than July: $1.7B (10%)
- First 2 weeks in July: $3.8B (27%)
- Last 2 weeks in July: $7.8B (58%)
- First 2 weeks in August: $9.5B (64%)
- Last 2 weeks in August: $4.4B (36%)
- September: $0.6B (10%)

Question: "Out of $27.8B you plan to spend on back-to-school shopping, how much do you plan to spend during the following periods?"

Note: Sample size (N) = 1,200
60% of shoppers are likely to start shopping approximately 4–6 weeks before school starts; however, these shoppers expect to spend less than very early or late starters.

**Share of back-to-school shoppers by lead time**

*(Gap between 'start of shopping' to 'start of school')*

Notes: *Sample size (shoppers who use at least one digital device, n = 1,009)
85% of shoppers are unlikely to use any emerging technologies like voice, social commerce, AR/VR for their back-to-school shopping.

Emerging technology usage (% of shoppers)

- Shopping using voice assistant: 6%
- Social commerce (e.g., 'buy' buttons on social media posts): 6%
- Text to buy: 4%
- Virtual reality (e.g., virtual-reality headsets for showroom experience): 3%
- Augmented reality (e.g., virtual mirrors for tryouts): 3%
- Chatbot-based personal shopping: 3%

85% respondents are not planning to use any of these technologies.

# Multi-select question
Question: Which of the following do you plan to use during the back-to-school shopping season?
Sample size (N) = 1,200
About one-third of shoppers are likely to curb their purchase lists due to digital substitution, especially those who are planning to spend less than last year.

### Digital substitution

Compared to a year ago, buying fewer traditional school supplies because my child is using more digital technologies in and out of the classroom (% of Agree/Strongly agree)

<table>
<thead>

Question: "Which type of retailer will you shop the most for ______ during this back-to-school season?"  
Note: Sample size (includes only respondents who will purchase the above mentioned category); single-select question
Mass merchants are likely to be the most preferred retail formats across income groups for clothing and accessories; most retail formats show some preference by income level.

**Preferred retail formats for clothing and accessories (by income)**

- **Mass merchants**
  - Overall: 53%
  - Low income (< $50k): 41%
  - Middle income ($50k - $99k): 38%
  - High income ($100k+): 27%

- **Specialty clothing stores**
  - Overall: 18%
  - Low income (< $50k): 14%
  - Middle income ($50k - $99k): 21%
  - High income ($100k+): 21%

- **Off-price stores**
  - Overall: 12%
  - Low income (< $50k): 11%
  - Middle income ($50k - $99k): 13%
  - High income ($100k+): 12%

- **Traditional department stores**
  - Overall: 11%
  - Low income (< $50k): 5%
  - Middle income ($50k - $99k): 14%
  - High income ($100k+): 18%

- **Online only**
  - Overall: 5%
  - Low income (< $50k): 8%
  - Middle income ($50k - $99k): 9%
  - High income ($100k+): 6%

* Sample size at household income-level has fewer than 30 respondents

Question: "Which type of retailer will you shop the most for clothing & accessories during this back-to-school season?"

Note: Sample size – High-income (n = 310), Middle-income (n = 356), Low-income (n=492), Overall (n=1,158)

Average category spend by retail format preference:
- Mass merchants: $211
- Specialty clothing stores: $362
- Off-price stores: $287
- Traditional department stores: $414
- Online only: $290

Category spend across formats: $290
About the survey

**Survey timing:** May 31 to June 6, 2019

**Sample:** The survey polled a sample of 1,200 parents of school-aged children, with respondents having at least one child attending school in grades K to 12 this fall.

About the survey
This annual Deloitte survey was conducted online using an independent research panel between May 31 and June 6, 2019. The survey polled a sample of 1,200 parents of school-aged children and has a margin of error for the entire sample of plus or minus three percentage points.

All respondents had at least one child attending school in grades K–12 this fall.

Deloitte Center for Industry Insights
The Deloitte Center for Industry Insights is the research division of Deloitte LLP’s Consumer and Industrial Products practices. The center’s goal is to inform stakeholders of critical business issues, including emerging trends, challenges, and opportunities. Using primary research and rigorous analysis, the center provides unique perspectives and seeks to be a trusted source for relevant, timely, and reliable insights.

About Deloitte
Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee (“DTTL”), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as “Deloitte Global”) does not provide services to clients. In the United States, Deloitte refers to one or more of the US member firms of DTTL, their related entities that operate using the “Deloitte” name in the United States, and their respective affiliates. Certain services may not be available to attest clients under the rules and regulations of public accounting. Please see www.deloitte.com/about to learn more about our global network of member firms.
