2017 back-to-school survey

Testing a new curriculum

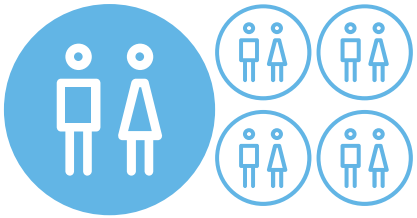
Back-to-school (B2S) shopping season accounts for about 50% of annual school-related spend and touches about one-quarter of U.S. households

B2S is the **second biggest shopping season** and involves…

29 Million households

50% of school related spend

53 Million children



$27 Billion

Note: Sample size (N) = 1,200

Deloitte's 2017 Back-to-school survey

Key findings

In-store still prevails, but shoppers are shifting spend across venues

- Expected in-store spend is more than twice that of online spend ($288 in-store vs $103 online, on average)
- While spend in absolute dollars remains almost flat to last year, venue preference has shifted considerably
- Market share is moving away from department stores and specialty channels, toward mass merchants and off-price venues

Digital influence is strong across multiple customer journeys/touchpoints

- More than two-thirds expect online and physical channels to complement each other
- Shoppers utilize computers and smartphones during the shopping journey, but more still purchase via computer
- One-quarter plan to use social media for transactional purposes – to find promos/coupons and browse
- 77% say they would use new digital in-store technologies that offer value and convenience

Early shoppers and undecideds are highly desirable targets

- ~$19b (71%) of total B2S spending happens during an eight-week period from early July through late August
- Overall, early shoppers are likely to spend more than late starters, in all regions except the West
- One in five shoppers – a segment worth ~$5.4B – are "undecided" about whether they will shop online or in-store and might be persuaded by targeted promotional efforts

Timing and amount of spend varies by region, with the South spending most and earliest

- The South accounts for 44% of school enrollments, and parents there spend an average of $554 per child
- 70% of shoppers in the South start before August and this group spends more than any other – $594 per child, on average

Average B2S spend remains flat at $501 in 2017 compared to $488 in 2016

South region drives B2S season with the highest average spend

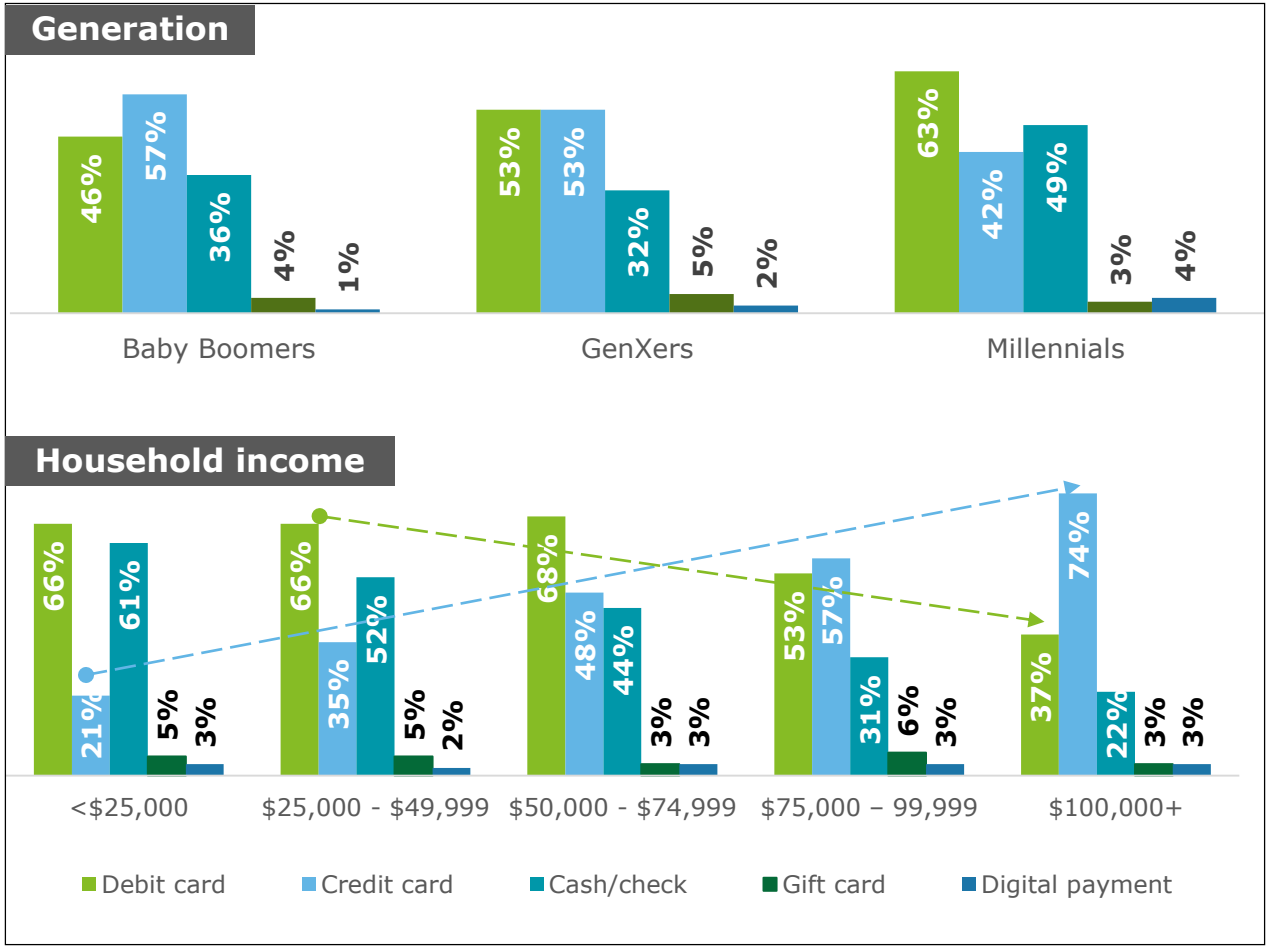
Note: Sample size (N) = 1,200;
Multi-select question



About the survey

This annual Deloitte survey was conducted online using an independent research panel between May 31 and June 6, 2017. The survey polled a sample of 1,200 parents of school-aged children and has a margin of error for the entire sample of plus or minus three percentage points.

All respondents had at least one child attending school in grades K – 12 this fall.

Deloitte Center for Industry Insights

The Deloitte Center for Industry Insights is the research division of Deloitte LLP's Consumer and Industrial Products practices. The center's goal is to inform stakeholders of critical business issues, including emerging trends, challenges and opportunities. Using primary research and rigorous analysis, the center provides unique perspectives and seeks to be a trusted source for relevant, timely and reliable insights.

About Deloitte

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee ("DTTL"), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as "Deloitte Global") does not provide services to clients. In the United States, Deloitte refers to one or more of the US member firms of DTTL, their related entities that operate using the "Deloitte" name in the United States and their respective affiliates. Certain services may not be available to attest clients under the rules and regulations of public accounting. Please see www.deloitte.com/about to learn more about our global network of member firms.
