

Commitment to energy management ingrained and entrenched among US businesses

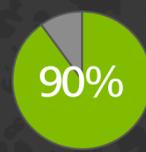

The Deloitte Resources 2015 Study suggests a tipping point has been passed in how US companies approach energy management. Thoughtful, deliberate energy consumption has permeated the business psyche, and companies, by and large, now consider energy management to be an essential aspect of corporate strategy.

1. 88% have electricity goals; businesses reduced electricity consumption by average of 15% in 2014

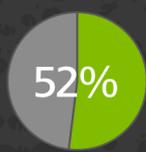

6. 47% provide electric charging stations

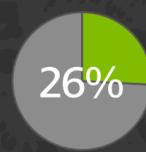

11. 9 in 10 have set resource management goals

2. 57% have carbon footprint goals

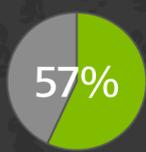

7. 52% have been extremely/very successful in achieving their resource management goals

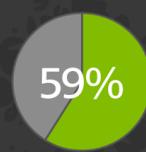

12. 26% are installing batteries to store electricity for usage at times when electricity prices are higher

3. 55% generate a portion of electric consumption on-site

8. 57% have formal energy management goals, up from 46% in 2014

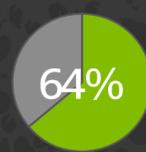

13. 59% have transport fuels goals

4. 29% participate in all available demand response programs

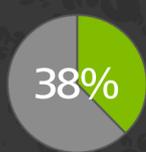

9. 79% view reducing electricity costs as essential to staying competitive from an image perspective

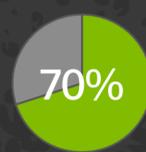

14. 64% have natural gas goals

5. 39% say new/innovative solutions are actively encouraged, experimented with, and deployed

10. 38% actively track tax credits and incentives for renewable investments

15. 70% have water goals
