

In this episode of the Resilient podcast, [Jacki Monson, chief privacy and information security officer at Sutter Health](#), sits down with Resilient cyber series host Deb Golden to share her perspective on the importance of security and privacy by design in patient trust and safety.

*Deb Golden:*

With the prevalence of advanced technologies in our lives today, both personally and professionally, it's no surprise to see a shift in the focus on data privacy. The frequency of cyber breaches continues to grow, and we're seeing more and more instances where cyber adversaries are gaining unauthorized access to sensitive and confidential data. As consumers, I'm sure we can all empathize with the threat this poses. So from a business standpoint, what responsibility do organizations have to help protect this data? How is privacy changing the way organizations are looking at security?

Welcome to the Resilient podcast, where we feature resilient leaders, real insights, and unfiltered stories. My name is Deb Golden, and I'm the US leader of Deloitte Advisory's Cyber Risk Services practice, and I'm so pleased to continue our cyber series with Jacki Monson, chief privacy and information security officer at Sutter Health.

*Jacki Monson:*

When you think about patient trust, they're handing us their most sensitive information, you know, their serious medical conditions. There's sensitivity that most people don't talk about outside of discussions with their health care provider. You know, if we're not protecting their information, we're not keeping them safe.

*Deb Golden:*

In this episode, Jacki dives into the topic of privacy and how it's changing the way they're approaching cybersecurity. She also emphasizes the importance of a proactive approach to cyber and why it's so important to embed privacy into the design process—from the beginning to the end, particularly in today's critical health care climate.

I think you're really going to enjoy this episode. Tune in to the full episode on your favorite podcast channel, and subscribe to our mailing list to stay informed of future episodes. And don't forget to check out our growing library of interviews with cyber executives while you're there. Thanks for listening!
