Figure 4: Numberspeak: Expected automation of key RE occupations and cost savings through RPA implementation

Probability of key occupations being affected by automation:
- Property, real estate, and community association managers: 81%
- Appraisers and assessors of real estate: 90%
- Budget analysts: 94%
- Bookkeeping, accounting, and auditing clerks: 98%
- Procurement clerks: 98%
- Title examiners, abstractors, and searchers: 99%

Expected cost savings through RPA implementation:
- 27%
- 45%
- 20%
- 9%

RPA technology is expected to help organizations achieve significantly higher savings and productivity gains.

Savings anticipated by organizations:
- Less than 10%
- 10-20%
- 20-40%
- 40%+

Note: The numbers mentioned above are based on the research paper “The Future of Employment: How Susceptible Are Jobs to Computerization?”
