

In this inaugural episode of Resilient CAEs, Sandy Pundmann, Deloitte Risk & Financial Advisory’s internal audit leader, and Resilient host Mike Kearney discuss how technology and innovation are helping CAEs lead through a dramatic transformation in their organizations.

*Mike Kearney:*

I am sitting here at Deloitte University, and I am really fired up to be sitting down with Sandy Pundmann, a managing partner for Internal Audit and really good friend of mine. And I think what you're going to find is, Sandy has got such a great perspective on the future of internal audit.

And we're sitting here at CAE Edge, where we've got I think about 70 chief audit executives having that conversation with Sandy. And just like I did it with our CISO track, I'm going to pass the microphone after this to Sandy to launch our chief audit executive leadership series of podcasts under RESILIENT.

And I think even if you're not a chief audit executive, or if you're not in internal audit, I think you'll get a lot out of these conversations. Today I'm going to talk to her about how the role of the chief audit executive is changing, positioning the impact of internal audit with senior executives and the board. And this, in my mind, is so very important.

The evolution of talent. Where they are finding talent in internal audit nowadays and partnering with the business.

*Sandy Pundmann:*

So for example, there is . . . Cyber is everywhere. Do we have the right cybersecurity and capabilities in place to manage our risk there? And I think thinking about that and helping prevent it before you have the incident or before there is smoke is really . . . is important. But how do you talk about that proactive element? It's very . . . It's challenging, but it is something that is really important.

*Mike Kearney:*

My conversation with Sandy is really awesome. And if you like what you hear and you want more, check out the full episode on your favorite podcast outlet,

keyword Resilient. You can find us on Apple Podcasts, Soundcloud, Stitcher, Google Play, even Spotify.
