# ConnectMe™

## Streamline the employee experience for a global workforce

Increasingly companies are doing business across borders, for a multitude of reasons. They need a global workforce and, with that, mobility, as they send a growing number of employees abroad in a variety of roles. Yet the processes that often accompany international assignments can be confusing and cumbersome – from the preparation, to the support needed to address requirements while on assignment, to the return and repatriation. Traditionally, global mobility functions handled international assignments with individualized, “high-touch” treatment, which was resource intensive for HR departments and time consuming for the employees being relocated.

ConnectMe, our digital workplace product, helps organizations navigate the complexities of global mobility, providing HR with instant and accurate visibility into the process, and providing international assignees with essential tools for this major work-life event, all via a smart, personalized, and on-demand portal.

### ConnectMe features:

- Mobile enabled** Offers international assignees an easy-to-manage check list, from the preparation for an international assignment through to the return.
- Access global mobility anytime, anywhere** Enables international assignees to chat and contact the global mobility team from any channel, and with any questions, about their new role.
- Enhanced service delivery** Robust case and knowledge management for HR service delivery provides an improved experience for HR and international assignees.
