

The **digital age** is going to dramatically change **inventory management**.

Companies that incorporate new innovations into their supply chain are reaping the rewards.

10% reduction in Days-on-Hand could lead to more than **\$100B in savings**.¹

14%–26% reduction in inventory levels*

2%–5% improvement in service levels*

33% higher initial and sustained benefits compared to a standalone inventory diagnostic*

Too often, companies take a "one-size fits all" approach to inventory management, hoping their planning systems will address all of their organizational needs... but they don't.

How much excess inventory do I have and why do I have it?

Which capabilities do I need to enhance? What is it worth to improve?

What went wrong with the plan? How can I tell if incentives and behavior are compromising the plan?

But what if you could...

Meet your service levels with less inventory

Prevent inventory shortages that could impact service and growth

Improve cash flow by right-sizing inventory

Promote collaboration by sharing on-demand inventory insights

With Inveritas™, you can gain insight into exactly what inventory you need, why you need it, and how to make improvements.

- ← Cloud-based subscription product
- ← Leverage access to big data insights without the need for any IT investments
- ← Combines decades of Deloitte supply chain experience with your historical data in a complex modeling engine
- ← Easily integrates with other planning systems and allows ongoing monitoring against company goals

With **Inveritas™**, you can establish the right data and insights to help tell the **whole inventory story**.
