

Accelerate your journey towards scalable business outcomes

Transform knowledge access

Unlock insights from proprietary equipment and disparate systems, the brain trust of an experienced workforce, and the broader supply chain network

Establish a competitive advantage

Bring science to the forefront and adopting a data-driven approach to manufacturing and operations

Drive seamless orchestration

Integrate workflows between people and technology to improve productivity, product quality and sustainability

Deloitte's industry experts bring methodologies, assets and accelerators that have been hardened through years of delivering improved manufacturing and operations outcomes

Deloitte's asset portfolio can enable:

Service capabilities

- Strategy and roadmap development
- Capability maturity assessments
- Rapid proof-of-value & pilots
- Scaled solution implementations
- Technology managed services

Business solutions

- Continuous improvement
- Order scheduling
- Quality inspection
- Daily workflows (e.g., tiered meetings)
- ...and more!

Deloitte's proven accelerators enable effective delivery of the capabilities and solutions that your business needs

Introducing IntelligentOps™

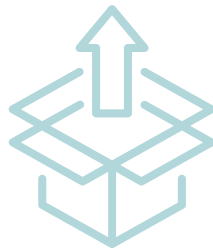

What is it?

We have a portfolio of IP designed to enable Deloitte professionals to rapidly deliver smart manufacturing results at your organization:

- Create a scalable foundation connecting IT, OT, ET data and other knowledge sources
- Apply AI/ML and Generative AI to solve manufacturing and operations challenges
- Support integrated workflows across systems, and orchestration between humans and machines
- Jumpstart tech-enabled business optimization and innovation with a “starter kit” of new technologies

Our portfolio includes...

- ✓ Pre-built integrations
- ✓ Production-ready code libraries
- ✓ Easy-to-deploy dashboards
- ✓ Solution reference architectures
- ✓ IntelligentOps™, a GenAI-powered platform

Value Drivers

- Accelerated time to value and ROI
- Foundation for scaled outcomes
- Applied industry best practices
- Integration into enterprise transformations, such as ERP, cloud, data
- Augmented supply chain transformation efforts and target outcomes

Differentiators

- Business-driven strategic outcomes
- Modular design to fit into existing technical environments
- Rapid deployment of manufacturing solutions and enabling technologies

Don't have a license for a Large Language Model?

IntelligentOps™ offers easy access to Deloitte's **secure GenAI models** and infrastructure while protecting your organization's data

IntelligentOps™

Unlock the untapped potential of your data and harness the power of Generative AI with IntelligentOps™, a seamless integration point between people and technology to optimize operations and derive value from your Continuous Improvement efforts

People First

GenAI is designed to empower, not replace, the workforce or its decision-making authority. We take a people-first approach in how the solution integrates with processes, workflows, and organizational culture.

Manufacturing Embedded

IntelligentOps™ is infused with Deloitte's extensive knowledge in manufacturing and operations, enabling it to deliver responses that are not only accurate, but also specifically tailored to your operational context.

Built to Scale

While we may start small to test innovation and gain workforce trust, IntelligentOps™ is designed to scale across a factory network to achieve desired ROI

Contract Easy

We take care of licensing and contracting across the vendor ecosystem, and adjust for a tailored fit into your existing environment

Secure Always

You maintain control of your data. We protect your data without compromise with robust security frameworks and architecture, encryption, testing and processes.

Easy access to secure industry-specific models and infrastructure
