

How Deloitte and UiPath are working together to drive your Oracle Cloud ERP transformation with intelligent automation

Modernizing your Oracle Cloud ERP strategy with automation

In today's fast-paced and digital world, many organizations are embarking on Oracle Cloud ERP transformation journeys to achieve greater flexibility, agility, and competitive advantage. To reduce complexity and increase efficiency, many organizations are discovering the power of integrating intelligent automation into their Oracle ERP platform strategy. Leveraging intelligent automation solutions can enable organizations to revolutionize their workforce—shifting away from manual process execution towards an integrated humans-and-machines operating model.

Together, Deloitte and UiPath have developed intelligent automation solutions that are designed to accelerate and enhance your Oracle ERP modernization. These solutions can help you power your digital transformation by enhancing processes around Oracle ERP to improve efficiency, accuracy, productivity, and standardization.

The Deloitte and UiPath approach

Deloitte and UiPath work together to help enterprises design innovative next-generation workforces equipped for the future. By bringing intelligent automation together with ERP transformation, we can help power your organization's Oracle ERP modernization and adopt a comprehensive ERP strategy that drives value through business process transformation. Our solutions are designed to help organizations with a range of implementation-related activities on their Oracle transformation journeys, including data integration, database migrations, comprehensive testing activities, and post-load data validations.

Our solutions for the Oracle ERP platform include:

Digital workers, or digital FTEs:

These solutions can help enterprises on their Oracle ERP transformation journeys through a range of implementation-related activities, including data integration and loading, database migrations, comprehensive testing activities, post-load data validations, and other "lift and shift" activities.

Business process automations:

These solutions are designed to help organizations drive the delivery of ongoing automation of manual business processes around the Oracle ERP platform—delivering speed, efficiency, and accuracy across business functions.

Elevating ERP transformation with Intelligent Automation

Our solutions help to power impactful digital and ERP transformation for organizations through:

Improved efficiency

Intelligent automation can drive accelerated execution of tasks and end-to-end processes with reduced manual intervention and human error—improving efficiency, effectiveness, and accuracy.

Enhanced standardization

We help organizations shift to standardized, integrated processes that deliver improved audit trails and controls. This standardization can help organizations reduce risk, simplify processes, and accelerate time-to-value.

Greater workforce productivity

Our intelligent automation solutions help to transition some of the manual or time-intensive work away from human workers, freeing up their time to focus on more innovative, strategic, and value-adding activities.

The Deloitte and UiPath advantage

Deloitte and UiPath leverage persona-based intelligent automation solutions that mimic human actions to execute repetitive or rule-based activities, saving time and costs for both functional and IT organizations. These solutions are designed to augment the enterprise human workforce by transforming business processes to run with minimal human interaction.

Deloitte and UiPath's intelligent automation solutions deliver a unique advantage for the Oracle ERP platform through:

Innovative platform: Our solutions are powered by UiPath's state-of-the-art platform and equipped with advanced intelligent automation capabilities, including natural language processing (NLP), AI, and machine learning.

Knowledgeable team: We have a dedicated team of resources that help to oversee that our solutions are equipped to handle any changes to the underlying Oracle technology.

Minimal human input: Our solutions are designed to minimize human input and manage the execution of attended and unattended automations across a broad application and system landscape.

UiPath certification: UiPath certification of Deloitte built automation solutions for the Oracle ERP platform enables us to deliver solutions with quality, accuracy, and consistency.

Comprehensive tools and capabilities: Our solutions are closely integrated with our end-to-end methodology and backed by Deloitte's robust intelligent automation capabilities and implementation tools.

About the Deloitte and UiPath alliance

Our alliance is powered by the strength of UiPath's market-leading RPA platform and Deloitte's extensive experience implementing large-scale cognitive technology transformations. By redefining the ways in which humans and machines interact, our alliance helps deliver smarter insights, stronger outcomes, and greater business impact.
