SECTION 2.0 FIRM OVERVIEW

Deloitte Consulting LLP ("Deloitte Consulting") is one of the world's leading business consulting firms, providing services to transform strategy, processes, information technology, and people. With recognized industry knowledge and experience, Deloitte Consulting helps clients create, defend and/or reinvent their business and economic models by guiding them through the complexity of the digital economy.

Deloitte Consulting is a part of Deloitte Touche Tohmatsu, one of the world's leading professional services firms, delivering world-class assurance and advisory, tax, and consulting services. Serving nearly one-fifth of the world's largest companies as well as large national enterprises, public institutions, and successful fast-growing companies, our internationally experienced professionals deliver seamless, consistent services wherever our clients operate. Our mission is to help our clients and our people excel.

A very different approach, for very different results.

Deloitte Consulting has built a reputation as a client-oriented consulting firm with deep technical knowledge. Our most basic client service instincts are to team with our clients to create a shared commitment to success.

Our proactive, collegial approach to client relationships facilitates a continual understanding of our clients' expectations. We believe that establishing such a relationship is essential to the successful and timely completion of project activities, promotion of client understanding and ownership of projects, and facilitation of a smooth transition into implementation and development efforts. By combining the objectivity, knowledge, experience, and creativity of both our clients and our consultants, we achieve better, more sustainable results.

Working with clients to create a shared sense of ownership for an engagement's outcome helps to increase realized benefits. We encourage client representatives to serve on project teams as full-time, equal members and to personally take part in defining why the organization needs to change, what needs to change, and how to best achieve the change.

It is the combination of our collaborative relationships with clients and our programmatic and technical experience that give our clients a true advantage because:

Clients are an integral part of our consulting projects—helping to ensure the effective transfer of knowledge and realization of the recommendations.

We work with management and project sponsors to help them plan the implementation of their decisions.

We focus on both the cultural and technical aspects of projects, recognizing that managing change is critical to successful implementation.

1. SIN 541330ENG, 541330ENG(RC) - Engineering Services

Services include applying physical laws and principles of engineering in the design, development, and utilization of machines, materials, instruments, processes, and systems. Services may involve any of the following activities: provision of advice, concept development, requirements analysis, preparation of feasibility studies, preparation of preliminary and final plans and designs, provision of technical services during the construction or installation phase, inspection and evaluation of engineering projects, and related services.

NOTE: Services under this SIN cannot include architect-engineer services as defined in the Brooks Act and FAR Part 2, or construction services as defined in FAR Parts 2 and 36.

2. SIN 541620, 541620(RC) – Environmental Consulting Services

Services include providing advice and assistance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, and hazardous materials; Endangered species, wetland, watershed, and other natural resource management plans; Archeological and/or cultural resource management plans. This includes identifying problems (e.g., inspect buildings for hazardous materials), measure and evaluate risks, and recommend solutions. Multi-disciplined staff of scientists, engineers, and other technicians with expertise in areas, such as air and water quality, asbestos contamination, remediation, ecological restoration, and environmental law such as Planning and Documentation Services for the development, planning, facilitation, coordination, and documentation of and/or for environmental initiatives (or mandates such as Executive Order 13693 in areas of chemical, radiological, and/or hazardous materials; ISO 14001 Environmental Management System (EMS) and sustainable performance measure development; Environmental Assessment (EA) and Environmental Impact Statement (EIS) preparation under the National Environmental Policy Act (NEPA).

3. SIN 541715, 541715(RC) - Engineering Research and Development and Strategic Planning

Services include conducting research and experimental development (except nanotechnology and biotechnology research and experimental development) in the physical, engineering and life sciences such as; such as agriculture, electronics, environmental, biology, botany, computers, chemistry, food, fisheries, forests, geology, health, mathematics, medicine, oceanography, pharmacy, physics, veterinary and other allied subjects.

Typical tasks include, but are not limited to, analysis of mission, program goals and objectives, program evaluations, analysis of program effectiveness, requirements analysis, organizational performance assessment, special studies and analysis, training, and consulting; requirements analysis, cost/cost performance trade-off analysis, feasibility analysis, developing and completing fire safety evaluation worksheets as they relate to professional engineering services; operation and maintenance, evaluation of inspection, testing, and maintenance program for fire protection and life safety systems, program/project management, technology transfer/insertion, training and consulting.

NOTE: Services under this NAICs cannot include architect-engineer services as defined in the Brooks Act and FAR Part 2 or construction services as defined in the Federal Acquisition Regulation Part 36 and Part 2.

4. SIN 541380, 541380(RC) – Testing Laboratory Services

Includes testing laboratory services and veterinary, natural, and life sciences; testing services and laboratories; and other professional, scientific, and technical consulting services.

Testing and services include, but are not limited to: physical, chemical, analytical, or other testing services; quality assurance; fire safety inspections; training; safety audits; relying upon experimental, empirical, quantifiable data, relying on the scientific method, and professional services, tasks, and labor categories in the fields of biology, chemistry, physics, earth sciences, atmospheric science, oceanography, materials sciences, mathematics, geology, astronomy, veterinary medicine, statistics, systems science, etc., (excludes social and behavioral sciences).

Examples of labor categories include, but are not limited to, Scientific Researchers, Biologists, Physicists, Mathematicians, Statisticians, Research Engineers, Meteorologists, Lab Technicians, Veterinarians and Veterinary Services, Chemists, Biochemical Engineers, Research Nurses.

5. SIN 522310, 522310(RC) - Financial Advising, Loan Servicing and Asset Management Services

Services include assisting agencies on cross-cutting issues, asset marketability, equity monitoring, originations, and addressing any other considerations regarding the acquisition, management and/or resolution of an asset; assisting agencies in servicing, monitoring and maintaining loan assets such as establishing loan database, remittance processing, processing loan cancellations and consolidations, billing services, and servicing troubled loans which may include borrower negotiations, restructuring, foreclosure and supervision of the sale of the collateral and workout agreements.

6. SIN 541219, 541219(RC) - Budget and Financial Management Services

Services include accounting, budgeting, and complementary financial services such as: transaction analysis, transaction processing, data analysis and summarization, technical assistance in devising new or revised accounting policies and procedures, classifying accounting transactions, special studies to improve accounting operations, assessment and improvement of budget formulation and execution processes, special reviews to resolve budget formulation or budget execution issues, and technical assistance to improve budget preparation or execution processes.

7. SIN 541611, 541611(RC) - Management and Financial Consulting, Acquisition and Grants Management Support, and Business Program and Project Management Services

Provide operating advice and assistance on administrative and management issues. Examples include: strategic and organizational planning, business process improvement, acquisition and grants management support, facilitation, surveys, assessment and improvement of financial management systems, financial reporting and analysis, due diligence in validating an agency's portfolio of assets and related support services, strategic financial planning, financial policy formulation and development, special cost studies, actuarial services, economic and regulatory analysis, benchmarking and program metrics, and business program and project management.

Inherently Governmental services as identified in FAR 7.503 or by the ordering agency are prohibited. It is the responsibility of the Contracting Officer placing the order to make this determination. Ordering activities must require prospective contractors to identify potential conflicts of interest and address those, prior to task order award.

Personal services as defined in FAR 37.104 are prohibited.

monitor the operations and performance of the partnership through review of the general partner's business plans, financial reports and projections to protect against reduction in value or mismanagement of assets; Investor reporting: Use various financial indicators to provide a detailed reporting package for each transaction representing the current financial status and performance of a portfolio.

8. SIN 541810, 54180(RC) - Advertising Services

Services provided under this SIN will promote public awareness of an agency's mission and initiatives, enable public understanding of complex technical and social issues, disseminate information to industry and consumer advocacy groups and engage in recruitment campaigns. Services include, but are not limited to the following components: advertising objective determination, message decision / creation, media selection, outdoor marketing and media services, broadcast media (radio, TV, internet and public service announcements), direct mail services, media planning, media placement services, advertising evaluation, related activities to advertising services.

NOTE: Any commissions received for advertising agencies will either

(a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

9. SIN 541820, 541820(RC) - Public Relations Services

Services provided include providing customized media and public relation services such as the development of media messages and strategies; providing recommendations of media sources for placement of campaigns; preparing media materials such as, background materials, press releases, speeches and presentations and press kits: executing media programs, conducting press conferences, scheduling broadcast and/or print interviews, media alerts and press clipping services related activities to public relations services.

NOTE: Any commissions received for media placement, conference planning, etc. will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

10. SIN 541511, 541511(RC) Web Based Marketing

Services include, but are not limited to writing, modifying, testing, and supporting software to meet the needs of a particular customer. This can include website design and maintenance services, search engine development, email marketing, interactive marketing, web based advertising (including marketing and social media outlets), webcasting, video conferencing via the web, section 508 compliance, including captioning services, online media management; and related activities to web based services.

Media will be provided in a format that is compatible with the ordering agency's software requirements. Continual website updates and maintenance may also be required.

NOTE: Any commissions received for media placement, conference planning, etc. will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

11. SIN 541910, 541910(RC) - Marketing Research and Analysis

Services include customizing strategic marketing plans, branding initiatives, creating public awareness of products, services, and issues; targeting market identification and analysis, establishing measurable marketing objectives; determining market trends and conditions, identifying and implementing appropriate strategies, conducting focus groups, telemarketing, individual interviews, preparing/distributing surveys, and compiling/analyzing results, establishing call centers (in relation to services provided under this schedule).

NOTE: Any commissions received for media placement, conference planning, etc. will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

12. SIN 512110, 512110(RC) - Video/Film Production

Services include writing, directing, shooting, arranging for talent / animation, narration, music and sound effects, duplication, distribution, video scoring; and editing.

Videotape and film production services will be provided to inform the public and Government agencies about the latest products, services, and/or issues in various outputs such as: industry standard formats, accessibility and video streaming development. Filming in studios, on location, live shows or events may also be required.

NOTE: Any commissions received for media placement will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

13. SIN 541850, 541850(RC) - Exhibit Design and Advertising Services

Services include conceptualizing, designing and producing exhibits and their accompanying materials, providing and/or making recommendations for carpet and padding installation for exhibit property; preview, set-up and dismantling of exhibit property, cleaning, prepping and storing exhibit property for future use, shipping exhibit property to and from designated site(s); and media illumination services

NOTE: Any commissions received for media placement, conference planning, etc. will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

14. SIN 541613, 541613(RC) - Marketing Consulting Services

Services include providing operating advice and assistance on marketing issues, such as developing marketing objectives and policies, sales forecasting, marketing planning and strategy, and development of multi-media campaigns. Services relating to providing assistance with challenges, contests, and competitions, such as providing marketing and advertising support, assistance with conducting the challenge / contest / competition, facilitating events; and supporting the judging of events are included. The challenge / contest / competition may be to identify a solution to a particular problem or to accomplish a particular goal. Prizes or other incentives may be offered by customers to find innovative or cost-effective solutions to improving open government. Solutions may be ideas, designs, proofs of concept or finished products. SIN 5418100DC must be used in conjunction with the payment for prizes or other incentives.

NOTE: Any commissions received for media placement, conference planning, etc. will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

15. SIN 541420, 541420(RC) - Engineering System Design and Integration Services

Services include creating and developing designs and specifications that optimize the use, value, and appearance of their products. These services can include determination of the materials, construction, mechanisms, shape, color, and surface finishes of the product, taking into consideration human characteristics and needs, safety, market appeal, and efficiency in production, distribution, use, and maintenance.

Associated tasks include, but are not limited to computer-aided design, e.g. CADD, risk reduction strategies and recommendations to mitigate identified risk conditions, fire modeling, performance-based design reviews, high level detailed specification and scope preparation, configuration, management and document control, fabrication, assembly and simulation, modeling, training, consulting, analysis of single or multi spacecraft missions and mission design analysis.

NOTE: Services under this NAICs can not include architect-engineer services as defined in the Brooks Act and FAR Part 2 or construction services as defined in the Federal Acquisition Regulation Part 36 and Part 2.

An implementation guide for Space launch Integration Services (SLIS) can be found at www.gsa.gov/psschedule - click on "Professional Engineering Solutions".

16. SIN 611430, 611430(RC) - Professional and Management

Services include offering an array of short duration courses and seminars for management and professional development. Training for career development may be provided directly to individuals or through employers' training programs, and courses may be customized or modified to meet the special needs of customers. Instruction may be provided in diverse settings, such as the establishment's or agency's training facilities, and through diverse means, such as correspondence, television, the Internet, or other electronic and distance-learning methods. The training provided may include the use of simulators and simulation methods.

Examples include Training Services that are instructor led Training or Web Based Training of Education Courses, Course Development and Test Administration, Learning Management, and Internships; Environmental Training Services in order to meet Federal mandates and Executive Orders; training of agency personnel to deal with media and media responses; Logistics Training Services related to system operations, automated tools for supply and value chain management, property and inventory management, distribution and transportation management, and maintenance of equipment and facilities; Audit & Financial training services related to course development and instruction required to support audit, review, financial assessment and financial management activities.

classroom; conducting leadership training workshops and seminars not provided via traditional management training curricula available elsewhere and conducting Speakers Bureau services and Leadership assessment surveys. A.3.3 Learning Management services.

34. SIN OLM, OLM(RC) - Order-Level Materials (OLM)

OLMs are supplies and/or services acquired in direct support of an individual task or delivery order placed against a Schedule contract or BPA. OLM pricing is not established at the Schedule contract or BPA level, but at the order level. Since OLMs are identified and acquired at the order level, the ordering contracting officer (OCO) is responsible for making a fair and reasonable price determination for all OLMs.

OLMs are procured under a special ordering procedure that simplifies the process for acquiring supplies and services necessary to support individual task or delivery orders placed against a Schedule contract or BPA. Using this new procedure, ancillary supplies and services not known at the time of the Schedule award may be included and priced at the order level.

OLM SIN-Level Requirements/Ordering Instructions:

OLMs are:

- Purchased under the authority of the FSS Program
- Unknown until an order is placed
- Defined and priced at the ordering activity level in accordance with GSAR clause 552.238-115 Special Ordering Procedures for the Acquisition of Order-Level Materials. (Price analysis for OLMs is not conducted when awarding the FSS contract or FSS BPA; therefore, GSAR 538.270 and 538.271 do not apply to OLMs)
- Only authorized for use in direct support of another awarded SIN
- Only authorized for inclusion at the order level under a Time-and-Materials (T&M) or Labor-Hour (LH) Contract Line Item Number (CLIN)
- Subject to a Not-To-Exceed (NTE) ceiling price

OLMs are not:

- Open Market Items
- Items awarded under ancillary supplies/services or other direct cost (ODC) SINs (these items are defined, priced, and awarded at the FSS contract level).

Architect II	Minimum of 5 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Architect I	Minimum of 3 years of consulting	Minimum Bachelor's Degree or
	and/or directly relevant industry	equivalent in a related field or has
	experience	equivalent work experience

Labor Category Skills and Expertise

An Architect provides subject matter expertise and supports the delivery and operations execution by:

- Performing analysis and diagnosing client issues
- Using pre-established practices/tools and techniques to support project deliverables

Project Execution Specialist IV	Minimum of 3 years of consulting	Minimum Bachelor's Degree or
	and/or directly relevant industry	equivalent in a related field or has
	experience	equivalent work experience
Project Execution Specialist III	Minimum of 2 years of consulting	Minimum Bachelor's Degree or
	and/or directly relevant industry	equivalent in a related field or has
	experience	equivalent work experience
Project Execution Specialist II	Minimum of 2 years of consulting	Minimum High School Diploma or
	and/or directly relevant industry	equivalent in a related field or has
	experience	equivalent work experience
Project Execution Specialist I	Minimum of 1 year of consulting	Minimum High School Diploma or
	and/or directly relevant industry	equivalent in a related field or has
	experience	equivalent work experience

Labor Category Skills and Expertise

The Project Execution Specialist provides support for implementing and managing client service delivery and operations execution by:

- Implementing practical solutions and methodologies
- Applying quality standards to work products
- Developing innovation and efficiency in order to increase performance
- Investigating problems using analysis, experience, and judgment

Project Execution Support IV	Minimum of 2 years of consulting	Minimum Bachelor's Degree or
	and/or directly relevant industry	equivalent in a related field or has
	experience	equivalent work experience
Project Execution Support III	Minimum of 1 year of consulting	Minimum Bachelor's Degree or
	and/or directly relevant industry	equivalent in a related field or has
	experience	equivalent work experience
Project Execution Support II	Minimum 2 years consulting and/or	Minimum High School Diploma or
	directly relevant industry	equivalent in a related field or has
	experience	equivalent work experience
Project Execution Support I	Minimum 1 year consulting and/or	Minimum High School Diploma or
	directly relevant industry	equivalent in a related field or has
	experience	equivalent work experience

The Project Execution Support provides support for implementing and managing client service delivery and operations execution by:

- Implementing practical solutions and methodologies
- Applying quality standards to work products

Project Execution Associate III	Minimum of 1 year of consulting	Minimum Bachelor's Degree or
	and/or directly relevant industry	equivalent in a related field
	experience	

Skills & Expertise:

- · Provides support for implementing and managing client service delivery and operations execution
- Serves as a project resource on engagement teams
- Supports planning and project management for tasks
- Implements practical and innovative solutions and methodologies to meet project objectives and complete program management activities
- Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation

Project Execution Associate II	Minimum of 0 year of consulting	Minimum Bachelor's Degree or
	and/or directly relevant industry	equivalent in a related field
	experience	

Skills & Expertise:

- · Provides support for implementing and managing client service delivery and operations execution
- Serves as a project resource on engagement teams
- Supports planning and project management for tasks
- Implements practical and innovative solutions and methodologies to meet project objectives and complete program management activities
- Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation

Project Execution Associate I	Minimum of 2 years of consulting	Minimum High School Diploma or
	and/or directly relevant industry	equivalent in a related field
	experience	

- Provides support for implementing and managing client service delivery and operations execution
- Serves as a project resource on engagement teams
- Supports planning and project management for tasks
- Implements practical and innovative solutions and methodologies to meet project objectives and complete program management activities
- · Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation

Project Execution Administration	Minimum of 2 years of consulting	Minimum High School Diploma or
III	and/or directly relevant industry	equivalent in a related field
	experience	

- Provides support for implementing and managing client service delivery and operations execution
- Serves as an administrative resource on engagement teams
- Supports with planning and project management for engagement tasks
- Implements practical solutions and methodologies
- Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation

Project Execution Administration	Minimum of 1 year of consulting	Minimum High School Diploma or
II	and/or directly relevant industry	equivalent in a related field
	experience	

Skills & Expertise:

- Provides support for implementing and managing client service delivery and operations execution
- Serves as an administrative resource on engagement teams
- Supports with planning and project management for engagement tasks
- Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation

Project Execution Administration I	Minimum of 0 year of consulting and/or directly relevant industry	Minimum High School Diploma or equivalent in a related field
	experience	

Skills & Expertise:

- · Provides support for implementing and managing client service delivery and operations execution
- Serves as an administrative resource on engagement teams
- Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation

ENVIRONMENTAL CONSULTING SERVICES ADVISORY & EXECUTION SERVICES LABOR CATEGORIES

- Proficient in data analysis and defining business needs, applying methodologies, and development of project deliverables
- Experienced with data analysis

Responsibilities:

- Obtains data and develops environmental reports for presentations and client meetings
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks
- Applies quality standards to environmental work products
- Reviews and evaluates environmental work plans
- Completes assigned environmental tasks with no oversight
- Coordinates environmental training requirements

Environmental Business Advisory Sr	Minimum of 0 years consulting and/or	Minimum Bachelor's Degree or
Support I	directly relevant industry	equivalent in a related field
	experience	

Skills & Expertise:

- Provides advisory support to businesses and other organizations on environmental issues, such as the
 control of environmental contamination from pollutants, toxic substances, hazardous materials, natural
 resource management plans, and/or cultural resource management plans
- Proficient in data analysis and defining business needs, applying methodologies, and development of project deliverables
- Experienced with data analysis

- Obtains data and develops environmental reports for presentations and client meetings
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks

- Applies quality standards to environmental work products
- Completes assigned environmental tasks with no oversight

Environmental Business Advisory Jr	Minimum of 0 years consulting and/or	Minimum Bachelor's Degree or
Support II	directly relevant industry	equivalent in a related field
	experience	

- Provides advisory support to businesses and other organizations on environmental issues, such as the
 control of environmental contamination from pollutants, toxic substances, hazardous materials, natural
 resource management plans, and/or cultural resource management plans
- Experienced in oral and written communication, and specific tools such as Microsoft Office products, and Tableau
- Experienced with data analysis

Responsibilities:

- Completes assigned environmental tasks with minimal oversight
- Contributes to obtaining environmental data and reports for presentations and client meetings
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks
- Collects data, undertakes analysis, and helps identify environmental issues
- Other responsibilities include developing environmental task plans and understanding best practice frameworks, and key performance metrics

Environmental Business Advisory Jr	Minimum of 1 year consulting and/or	Minimum Associate's Degree or
Support I	directly relevant industry experience	equivalent in a related field

Skills & Expertise:

- Provides advisory support to businesses and other organizations on environmental issues, such as the
 control of environmental contamination from pollutants, toxic substances, hazardous materials, natural
 resource management plans, and/or cultural resource management plans
- Experienced in oral and written communication, and specific tools such as Microsoft Office products, and Tableau
- Experienced with data analysis

Responsibilities:

- Completes assigned environmental tasks with minimal oversight
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks
- Contributes to presentations and client meetings
- Collects data, undertakes analysis, and helps identify environmental issues
- Other responsibilities include developing environmental task plans and understanding best practice frameworks, and key performance metrics

Environmental Program	Minimum 12 years consulting and/or	Minimum Master's Degree or
Execution Executive II	directly relevant industry experience	equivalent in a related field

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance guidance to
 businesses and other organizations on environmental issues, such as the control of environmental
 contamination from pollutants, toxic substances, hazardous materials, natural resource management plans,
 and/or cultural resource management plans
- Experienced in fostering and managing the relationships between the client and engagement teams Responsibilities:
 - Provides expert advice, assistance, and guidance, and serves as an environmental consulting executive to the client, including but not limited to areas, such as air and water quality, asbestos contamination,

- remediation, ecological restoration, and environmental law
- Maintains responsibility for formulating environmental work standards, creating strategic project objectives, and managing and advising client issues and feedback
- Develops standardized procedures needed to conduct environmental initiatives
- Implements practical and innovative solutions and methodologies to meet environmental project objectives and complete program management activities
- Leads integrated team of multi-disciplinary professionals, with multiple concurrent environmental deliverables and tasks
- Maintains responsibility for managing the environmental program team and daily operations of project development or serves in a role as a highly experienced environmental expert
- Applies quality standards to cultural resource environmental management work products

Environmental Program	Minimum 10 years consulting and/or	Minimum Master's Degree or
Execution Executive I	directly relevant industry experience	equivalent in a related field

- Experienced in providing consulting and implementation, operations, and maintenance guidance to
 businesses and other organizations on environmental issues, such as the control of environmental
 contamination from pollutants, toxic substances, hazardous materials, natural resource management plans,
 and/or cultural resource management plans
- Experienced in fostering and managing the relationships between the client and engagement teams Responsibilities:
 - Provides expert advice, assistance, guidance, and serves as an environmental consulting executive to the client, including but not limited to areas, such as air and water quality, asbestos contamination, remediation, ecological restoration, and environmental law
 - Maintains responsibility for formulating environmental work standards, creating strategic project objectives, and managing and advising client issues and feedback
 - Develops standardized procedures needed to conduct environmental initiatives
 - Manages environmental tasks and groups of personnel on larger, more complex projects
 - Implements practical and innovative solutions and methodologies to meet environmental project objectives and complete program management activities
 - Maintains responsibility for managing the program team and daily operations of project development or serves in a role as a highly experienced environmental expert
 - Applies quality standards to cultural resource environmental management work products
 - Participates in organizational assessments, environmental workforce evaluations, and leads performance measures and indicators analyses

Environmental Program Execution	Minimum of 9 years consulting	Minimum Master's Degree or
Engineer SME	and/or directly relevant industry	equivalent in a related field
	experience	

Skills & Expertise:

- Experienced in environmental engineering or a related discipline, intended to study the effect of technological advancements on the environment
- Experienced in guiding businesses and organizations in the implementation and operation of environmental engineering solutions relating to, but not limited to, control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management, cultural resource management, wastewater management, recycling, waste disposal, and human health
- Experienced in managing, supervising, and overseeing the implementation and execution of environmental engineering projects, such as construction, investigation, remediation, and other field activities

• Familiar with the tenets and methodologies for energy management, related disciplines, and laws governing and impacting energy management

Responsibilities:

- Leads the implementation and operation of environmental engineering solutions and related tasks
 including, but not limited to risk management, energy audits, analysis of alternate energy sources, building
 commissioning, and sustainable design implementation, strategic analyses, resource management, and cost
 and economic analyses
- Provides technical direction for problem definition, approach methodology, analysis of findings, and recommendations for complex environmental projects
- Coordinates, assigns, and reviews the effort of all environmental assignments
- Develops standardized procedures needed to conduct environmental initiatives
- Applies quality standards to cultural resource environmental management work products

Environmental Program Execution	Minimum of 9 years consulting	Minimum Master's Degree or
Scientist SME	and/or directly relevant industry	equivalent in a related field
	experience	

Skills & Expertise:

- Experienced in providing implementation and operations guidance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Experienced in managing, supervising, and overseeing projects relating to environmental sciences including, but not limited to technology evaluations, human health and ecological risk assessments, environmental sampling, surveys, and analyses, audits, and technical assessments.
- Familiar with providing scientific, engineering, and other technical support for the development, execution, and evaluation or environmental programs, projects, and systems
- Familiar with the tenets and methodologies for the environmental sciences and related disciplines including, but not limited to, physics, chemistry, ecology, biology, geography, geology, meteorology soil science, and hydrology

Responsibilities:

- Leads implementation and operation of environmental science solutions and related tasks including, but not limited to risk management, energy audits, analysis of alternate energy sources, building commissioning, and sustainable design implementation, strategic analyses, resource management, and cost and economic analyses
- Provides scientific, engineering, and other technical support for the development, execution, and evaluation or environmental programs, projects, and systems
- Coordinates, assigns, and reviews environmental resource work products of the technical staff
- Manages a variety of complex technical environmental tasks, to include review of policy and statutory requirements and strategic planning to formulate and develop scientific concepts
- Develops standardized procedures needed to conduct environmental science initiatives

Environmental Program	Minimum 9 years consulting and/or	Minimum Master's Degree or
Execution Lead IV	directly relevant industry experience	equivalent in a related field

Skills & Expertise:

• Experienced in providing consulting and implementation, operations, and maintenance guidance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans

Responsibilities:

• Serves in the role of environmental program team leader over assigned environmental support areas, often

- filling the position of project team lead, and instructing, directing, and monitoring the work of other environmental business staff or serves in a role of an experienced technical expert
- Provides environmental consulting program management support for all day-to-day environmental
 activities, including but not limited to areas, such as air and water quality, asbestos contamination,
 remediation, ecological restoration, and environmental law
- Applies quality standards to environmental work products
- Oversees the completion of environmental operational tasks within estimated time frames and budget constraints
- Assumes responsibility for project delivery and oversight of environmental projects
- Assumes regular interaction and communications with the Government Contracting Officer (CO) and delegated government representatives
- Reviews and implements final recommendations provided to the client

Environmental Program	Minimum 8 years consulting and/or	Minimum Master's Degree or
Execution Lead III	directly relevant industry	equivalent in a related field
	experience	

 Experienced in providing consulting and implementation, operations, and maintenance guidance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans

Responsibilities:

- Serves in the role of environmental program team leader over assigned environmental support areas, often filling the position of project team lead, and instructing, and directing on complex projects
- Provides environmental consulting program management support for all day-to-day environmental
 activities, including but not limited to areas, such as air and water quality, asbestos contamination,
 remediation, ecological restoration, and environmental law
- Applies quality standards to environmental work products
- Oversees the completion of environmental operational tasks within estimated time frames and budget constraints
- Assumes responsibility for project delivery and oversight of environmental projects
- Assumes regular interaction and communications with the Government Contracting Officer (CO) and delegated government representatives
- Reviews and implements final recommendations provided to the client

Environmental Program	Minimum 7 years consulting and/or	Minimum Master's Degree or
Execution Lead II	directly relevant industry	equivalent in a related field
	experience	

Skills & Expertise:

Experienced in providing consulting and implementation, operations, and maintenance guidance to
businesses and other organizations on environmental issues, such as the control of environmental
contamination from pollutants, toxic substances, hazardous materials, natural resource management plans,
and/or cultural resource management plans

- Serves in the role of environmental program team leader over assigned support areas, often filling the position of project team lead and instructing, and directing on complex projects
- Provides environmental consulting program management support for all day-to-day environmental
 activities, including but not limited to areas, such as air and water quality, asbestos contamination,
 remediation, ecological restoration, and environmental law
- Applies quality standards to environmental work products

- Oversees the completion of environmental operational tasks within estimated time frames and budget constraints
- Assumes responsibility for project delivery and oversight of environmental projects
- Assumes regular interaction and communications with the Government Contracting Officer (CO) and delegated government representatives

Environmental Program Execution Lead I	Minimum 6 years consulting and/or directly relevant industry	Minimum Master's Degree or equivalent in a related field
	experience	

Experienced in providing consulting and implementation, operations, and maintenance guidance to
businesses and other organizations on environmental issues, such as the control of environmental
contamination from pollutants, toxic substances, hazardous materials, natural resource management plans,
and/or cultural resource management plans

Responsibilities:

- Serves in the role of environmental program team leader over assigned support areas, often filling the position of project team lead and instructing, and directing on complex projects
- Provides environmental consulting program management support for all day-to-day environmental
 activities. Including but not limited to areas, such as air and water quality, asbestos contamination,
 remediation, ecological restoration, and environmental law
- Applies quality standards to environmental work products
- Oversees the completion of environmental operational tasks within estimated time frames and budget constraints
- Assumes responsibility for project delivery and oversight of environmental projects

Environmental Project Execution Sr	Minimum of 8 years consulting	Minimum Bachelor's Degree or
Engineer	and/or directly relevant industry	equivalent in a related field
	experience	

Skills & Expertise:

- Experienced in environmental engineering or a related discipline, intended to study the effect of technological advancements on the environment
- Experienced in guiding businesses and organizations in the implementation and operation of environmental
 engineering solutions relating to, but not limited to, control of environmental contamination from
 pollutants, toxic substances, hazardous materials, natural resource management, cultural resource
 management, wastewater management, recycling, waste disposal, and human health
- Experienced in managing environmental engineering projects, supervising, and overseeing construction, investigation, remediation, and other field crews performing environmental engineering services

- Develops, designs, and implements large environmental projects
- Manages a variety of complex environmental projects to include, but not limited to, risk management, energy audits, analysis of alternate energy sources, building commissioning, and sustainable design implementation, strategic analyses, resource management, and cost and economic analyses
- Provides technical direction for problem definition, approach methodology, analysis of findings, and recommendations for complex environmental projects
- Coordinates, assigns, and reviews and applies quality standards to all environmental technical work products
- Prepares and conducts technical environmental project briefings

Environmental Project Execution Sr	Minimum of 8 years consulting	Minimum Bachelor's Degree or
Scientist	and/or directly relevant industry	equivalent in a related field
	experience	

- Experienced in providing consulting and implementation, operations, and maintenance assistance to
 businesses and other organizations on environmental issues, such as the control of environmental
 contamination from pollutants, toxic substances, hazardous materials, natural resource management plans,
 and/or cultural resource management plans
- Experience providing scientific, engineering, and other technical support for the development, execution, and evaluation or environmental programs, projects, and systems
- Familiar with the tenets and methodologies for the environmental sciences and related disciplines including, but not limited to, physics, chemistry, ecology, biology, geography, geology, meteorology soil science, and hydrology

Responsibilities:

- Provides scientific, engineering, and other technical support for the development, implementation, execution, and evaluation or environmental programs, projects, and systems
- Activities include but are not limited to reviewing technical documents and plans; performing technology
 evaluations; conducting geological and hydrogeological studies and modeling; reviewing sampling and
 analyses procedures and results; developing strategic and program management plans and guidance
 documents; supporting policy development; conducting audits and technical assessments; preparing and
 delivering training and facilitation/partnering services; and developing and maintaining information
 systems
- Acts as the responsible party for the quality standards and coordinates, assigns, and reviews all scientific
 work products, including but not limited to areas, such as air and water quality, asbestos contamination,
 remediation, ecological restoration, and environmental law
- Oversees the completion of environmental tasks within estimated time frames and budget constraints

Environmental Project Execution Lead	Minimum of 8 years consulting	Minimum Bachelor's Degree or
III	and/or directly relevant industry	equivalent in a related field
	experience	

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance assistance to
 businesses and other organizations on environmental issues, such as the control of environmental
 contamination from pollutants, toxic substances, hazardous materials, natural resource management plans,
 and/or cultural resource management plans
- Extensive experience in leading environmental projects, understanding business needs, formulating project definition, and isolating success factors

- Maintains the day-to-day interaction with the client, advising on keys to successful environmental project
 performance through performance reviews, assessment and analysis, design and development of solutions,
 monitoring budget allotments, and issue resolution
- Provides a communication channel between the client and the engagement team
- Delivers presentations to client on areas including, but not limited to, the status of natural resource management consulting and environmental work in progress, and problems encountered, and leads client meetings
- Implements practical and innovative solutions and methodologies to meet project objectives and complete environmental activities, including but not limited to areas, such as air and water quality, asbestos contamination, remediation, ecological restoration, and environmental law
- Able to perform environmental organizational assessments, program audits and evaluations, system(s) alignments, and process and productivity improvement evaluations
- Manages small environmental project teams

Environmental Project Execution Lead	Minimum of 7 years consulting	Minimum Bachelor's Degree or
II	and/or directly relevant industry	equivalent in a related field
	experience	

- Experienced in providing consulting and implementation, operations, and maintenance assistance to
 businesses and other organizations on environmental issues, such as the control of environmental
 contamination from pollutants, toxic substances, hazardous materials, natural resource management plans,
 and/or cultural resource management plans
- Extensive experience in leading environmental projects, understanding business needs, formulating project definition, and isolating success factors

Responsibilities:

- Maintains the day-to-day interaction with the client, advising on keys to successful project performance through performance reviews, assessment and analysis, design and development of solutions, monitoring budget allotments, and issue resolution
- Provides a communication channel between the client and the engagement team
- Implements practical and innovative solutions and methodologies to meet project objectives and complete
 environmental activities, including but not limited to areas, such as air and water quality, asbestos
 contamination, remediation, ecological restoration, and environmental law
- Gathers information for client meetings and presentations including, but not limited to, the status of natural resource management consulting and environmental work in progress, and problems encountered and recommended solutions
- Able to perform organizational assessments, program audits and evaluations, system(s) alignments, and process and productivity improvement evaluations
- Manages small environmental project teams

Environmental Project Execution Lead I	Minimum of 6 years consulting	Minimum Bachelor's Degree or
	and/or directly relevant industry	equivalent in a related field
	experience	

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance assistance to
 businesses and other organizations on environmental issues, such as the control of environmental
 contamination from pollutants, toxic substances, hazardous materials, natural resource management plans,
 and/or cultural resource management plans
- Extensive experience in leading environmental projects, understanding business needs, formulating project definition, and isolating success factors

- Maintains the day-to-day interaction with the client, advising on keys to successful project performance through performance reviews, assessment and analysis, design and development of solutions, monitoring budget allotments, and issue resolution
- Provides a communication channel between the client and the engagement team
- Gathers information for client meetings and presentations including, but not limited to, the status of natural resource management consulting and environmental work in progress, and problems encountered
- Manages project resources, budget activities, quality control practices, and project deliverables
- Able to perform organizational assessments, program audits and evaluations, system(s) alignments, and process and productivity improvement evaluations
- Manages small environmental project teams

Environmental Project Execution Jr	Minimum of 3 years consulting	Minimum Bachelor's Degree or
Engineer	and/or directly relevant industry	equivalent in a related field
	experience	

- Experienced in environmental engineering or a related discipline, intended to study the effect of technological advancements on the environment
- Experienced in supporting the implementation and operation of environmental engineering solutions
 relating to, but not limited to, control of environmental contamination from pollutants, toxic substances,
 hazardous materials, natural resource management, cultural resource management, wastewater
 management, recycling, waste disposal, and human health
- Familiar with supervising and overseeing construction, investigation, remediation, and other field crews performing environmental engineering services

Responsibilities:

- Develops, designs, and implements small environmental projects
- Supports tasks related to complex environmental projects to include, but not limited to, risk management, energy audits, analysis of alternate energy sources, building commissioning, and sustainable design implementation, strategic analyses, resource management, and cost and economic analyses
- Applies quality standards and implements the use of new technology to all environmental technical work products
- Assist with the preparation of technical environmental project briefings

Environmental Project Execution Jr	Minimum of 3 years consulting	Minimum Bachelor's Degree or
Scientist	and/or directly relevant industry	equivalent in a related field
	experience	

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance assistance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Experience providing scientific, engineering, and other technical support for the development, implementation, execution, and evaluation or environmental programs, projects, and systems
- Familiar with the tenets and methodologies for the environmental sciences and related disciplines including, but not limited to, physics, chemistry, ecology, biology, geography, geology, meteorology soil science, and hydrology

- Activities include but are not limited to reviewing technical documents and plans; performing technology
 evaluations; conducting geological and hydrogeological studies and modeling; reviewing sampling and
 analyses procedures and results; developing strategic and program management plans and guidance
 documents; supporting policy development; conducting audits and technical assessments; preparing and
 delivering training and facilitation/partnering services; and developing and maintaining information
 systems
- Supports the implementation of project specific environmental scientific tasks
- Conducts research, and collects and distills data required for planning environmental scientific activities

Environmental Project Execution	Minimum of 3 years consulting	Minimum Bachelor's Degree or
Jr Professional III	and/or directly relevant industry	equivalent in a related field
	experience	

- Experienced in providing consulting and implementation, operations, and maintenance assistance to
 businesses and other organizations on environmental issues, such as the control of environmental
 contamination from pollutants, toxic substances, hazardous materials, natural resource management
 plans, and/or cultural resource management plans
- Familiar with client issues, leading teams, analyzing project data, and development of environmental related deliverables

Responsibilities:

- Demonstrates a wide range of environmental consulting experience and applies professional consulting
 concepts to manage problems, including but not limited to areas, such as air and water quality, asbestos
 contamination, remediation, and ecological restoration
- Supports and helps direct the completion of project specific environmental tasks
- Conducts research, and collects and distills data required for planning environmental activities; recommends applicable tools for implementation
- Actively engages consulting tools and methodologies to meet project objective and complete program management operations
- Supports organizational assessments and development of multiple environmental deliverables

 , , , , , , , , , , , , , , , , , , ,	Minimum Bachelor's Degree or equivalent in a related field

IT AUTOMATED CONTACT CENTER SOLUTIONS (ACCS) LABOR CATEGORIES

Applicable to SINs: 561422, 561422(RC), 561422(STLOC)

Deloitte's SIN 561422 ACCS rate card is comprised of three service lines [(1) Advisory, (2) Implementation and (3) Operate and Maintain] each with specific ACCS labor categories and ceiling prices.

LABOR CATEGORY	EXPERIENCE	EDUCATION
Contact Center Advisory	Minimum of 14 years of consulting	Minimum Bachelor's Degree or
Executive III	and/or directly relevant industry	equivalent in a related field
	experience	

- Possesses expert knowledge of contact center business processes
- Supports critical business and operational areas to provide complete contact center life-cycle support ("cradle to grave") to enable and achieve their missions to more effectively manage risk, schedule, cost, and scope; oversees projects based upon the Government specifications and standards
- Reviews the project plans, designs and business and systems analysis
- Provides advice and oversight through all phases of contact center projects from project design, procurement, and construction phase services to final completion
- Advises on the development and implementation of the contact center strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Provides quality assurance on Contract Center Engagement implementation plan
- Provides the primary strategy interface with client; collaborates in the definition, implementation, and execution or organization policies, practices, procedures, and attainment of operating goals
- Reviews and analyzes reports and directives to obtain data required for delivering presentations and leading client meetings
- Delivers presentations and leads strategic level client meetings

- Accountable for the completion of contact center activities within estimated time frames and budget constraints
- Leads teams providing all components of digital contact center services including, but not limited to, advise, implement, and operate services of people, process, and technology in the contact center industry
- Provides services in support of the digital multi-channel contact center solutions including but not limited to
 Artificial Intelligence (AI), Chat Bots, Robotic Process Automation, Interactive Voice Response (IVR),
 Voice/Speech Recognition, Text-to-Speech, Voicemail, Callback, Web Callback, Email Delivery, Hosted Online
 Ordering, Hosted Email Web Form, and Hosted FAQ Services

Contact Center Advisory Executive	Minimum of 12 years of consulting	Minimum Bachelor's Degree or
II	and/or directly relevant industry	equivalent in a related field
	experience	

- Possesses expert knowledge of contact center business processes
- Supports critical business and operational areas to provide complete contact center life-cycle support ("cradle to grave") to enable and achieve their missions to more effectively manage risk, schedule, cost, and scope; oversees projects based upon the Government specifications and standards

- Assumes accountability for supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory	Minimum of 13 years of information	Minimum Bachelor's Degree or
Executive II	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management, direction on client engagements, cybersecurity information technology advisory expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies and advises on themes capable of being developed into new Cybersecurity strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and advising on multiple projects and team, and assisting clients in achieving desired program results
- Serves as a cyber information technology advisor to the client
- · Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cybersecurity technology implementation plan
- Provides assistance with supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory	Minimum of 10 years of information	Minimum Bachelor's Degree or
Executive I	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management, direction on client engagements, cybersecurity information technology advisory
 expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration
 of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies and advises on themes capable of being developed into new Cybersecurity strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and advising on single projects and team, and assisting clients in achieving desired program results
- Serves as a cyber information technology advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cybersecurity technology implementation plan
- Provides assistance with supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory Lead III	Minimum of 15 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management, direction on client engagements, cybersecurity information technology advisory expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions

Cybersecurity IT Advisory	Minimum of 11 years of information	Minimum Bachelor's Degree or
Engagement Leader III	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology advisory expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Maintains responsibility for managing and advising the program team and daily operations of project development
 or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with
 designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and advises on Cybersecurity program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Delivers presentations and leads operational level client meetings
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory	Minimum of 9 years of information	Minimum Bachelor's Degree or
Engagement Leader II	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, cybersecurity information technology advisory expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Manages and advises the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution

- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and advises on Cybersecurity program activities and is a key point of contact with client executives
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communications with the Contracting Officer's Technical and delegated government representatives
- Manages technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Delivers presentations and assists with operational level client meetings
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory	Minimum of 8 years of information	Minimum Bachelor's Degree or
Engagement Leader I	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, cybersecurity information technology advisory expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Manages and advises the program team and daily operations of project development or serves in a role as a highly experienced technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and advises on Cybersecurity program activities
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communications with the Contracting Officer's Technical and delegated government representatives
- Provides assistance with managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Assists with presentations and operational level client meetings
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Solution Architect	•	Minimum Bachelor's Degree or
11	technology or directly relevant industry experience	equivalent in a related field

- Engagement experience in program scope and approach, cybersecurity information technology advisory expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Maintains responsibility for managing and advising the program team and daily operations of project development
 or serves in a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and
 feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and advises on Cybersecurity program activities and is a key point of contact with client executives
- Serves as a cybersecurity technology subject matter expert and assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Solution Architect	Minimum of 12 years of information	Minimum Bachelor's Degree or
I	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, cybersecurity information technology advisory expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Maintains responsibility for managing and advising the program team and daily operations of project development

- Understands the client's risk, business objectives, and quality goals
- Manages and advises on Cybersecurity program activities and is a point of contact with client executives
- Serves as a cybersecurity technology subject matter expert and assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure
 quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory Project	Minimum of 8 years of information	Minimum Bachelor's Degree or
Lead III	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Experience in cybersecurity advisory support, management and direction on client engagements, or extensive knowledge of and experience with system development and implementation
- Cybersecurity information technology expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides advice, guidance, and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project advisory team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and provides technical direction, experience, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

 Minimum of 6 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
industry experience	_

- Experience in cybersecurity advisory support, management and direction on client engagements, or extensive knowledge of and experience with system development and implementation

- Assist with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Lead II	Minimum of 13 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	

- Executive level management experience, direction on client engagements, cybersecurity information technology implementation expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed and implemented into new Cybersecurity strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating multiple projects and team, and assisting clients in achieving desired program results
- Serves as the client's cyber information technology implementation advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Leads the development and implementation of communication and training plans as it relates to cybersecurity information technology
- Is the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation	Minimum of 10 years of information	Minimum Bachelor's Degree or
Lead I	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management experience, direction on client engagements, cybersecurity information technology implementation expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed and implemented into new Cybersecurity strategy methodology, and helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating multiple projects and team, and assisting clients in achieving desired program results
- Serves as the client's cyber information technology implementation advisor and subject matter expert to the client and helps with day-to-day activities of project teams
- Assists with the development and implementation of communication and training plans as it relates to cybersecurity information technology

- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Engagement	Minimum of 11 years of information	Minimum Bachelor's Degree or
Implementation Leader III	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, cybersecurity information technology implementation
 expertise, focus on program delivery and technical integration and implementation, ability to drive Cybersecurity
 Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management
 of project resources
- Maintains responsibility for managing the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Cybersecurity program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Understands the client's risk, business objectives, and quality goals as it relates to cybersecurity information technology
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Engagement	Minimum of 9 years of information	Minimum Bachelor's Degree or
Implementation Leader II	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, cybersecurity information technology implementation
 expertise, focus on program delivery and technical integration and implementation, ability to drive Cybersecurity
 Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management
 of project resources
- Manages the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Cybersecurity program activities and is a point of contact with client executives
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Understands the client's risk, business objectives, and quality goals as it relates to cybersecurity information technology
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Manages technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Engagement	Minimum of 8 years of information	Minimum Bachelor's Degree or
Implementation Leader I	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, cybersecurity information technology implementation
 expertise, focus on program delivery and technical integration and implementation, ability to drive Cybersecurity
 Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management
 of project resources
- Manages the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines

Cybersecurity IT Implementation	Minimum of 14 years of information	Minimum Bachelor's Degree or
Architect II	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology implementation
 expertise, focus on program delivery and technical integration and implementation, ability to drive Cybersecurity
 Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management
 of project resources
- Maintains responsibility for managing the program team and daily operations of project development or serves in
 a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and feasibility
 with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Cybersecurity program activities and is a key point of contact with client executives
- Serves as a cybersecurity technology subject matter expert and assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Understands the client's risk, business objectives, and quality goals as it relates to cybersecurity information technology
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation	Minimum of 12 years of information	Minimum Bachelor's Degree or
Architect I	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

Engagement experience in program scope and approach, cybersecurity information technology implementation
expertise, focus on program delivery and technical integration and implementation, ability to drive Cybersecurity
Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management
of project resources

- Maintains responsibility for managing the program team and daily operations of project development or serves in
 a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and feasibility
 with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Cybersecurity program activities and is a point of contact with client executives
- Serves as a cybersecurity technology subject matter expert and assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Understands the client's risk, business objectives, and quality goals as it relates to cybersecurity information technology
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Assists with managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Assists with managing and implementing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation	Minimum of 8 years of information	Minimum Bachelor's Degree or
Project Lead III	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience in management and direction on cybersecurity information technology projects, or extensive knowledge of and experience with cybersecurity systems development and implementation
- Cybersecurity information technology implementation expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project implementation team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical implementation expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation	Minimum of 6 years of information	Minimum Bachelor's Degree or
Project Lead II	technology or directly relevant	equivalent in a related field
	industry experience	_

- Experience includes management and direction on cybersecurity information technology projects, or extensive knowledge of and experience with cybersecurity systems development and implementation
- Cybersecurity information technology implementation expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise

- Serves in the role of project implementation team leader over assigned support areas, often filling the position of
 project team lead and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a
 role of an experienced Cybersecurity technical implementation expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Project Lead I	Minimum of 5 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	1

- Experience includes management and direction on cybersecurity information technology projects, or extensive knowledge of and experience with cybersecurity systems development and implementation
- Cybersecurity information technology implementation expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project implementation team leader over assigned support areas, and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical implementation expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation	Minimum of 10 years of information	Minimum Bachelor's Degree or
Solution Lead II	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience includes management and direction on cybersecurity information technology projects, or extensive knowledge of and experience with cybersecurity systems development and implementation
- Cybersecurity information technology implementation expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical
 solution implementation, engages resources and/or serves as an information technology subject matter expert and
 team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software
 design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project implementation team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical implementation expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Selects the most relevant tools and techniques to meet specific cybersecurity technology requirements
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation	Minimum of 8 years of information	Minimum Bachelor's Degree or
Solution Lead I	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience includes management and direction on cybersecurity information technology projects, or extensive knowledge of and experience with cybersecurity systems development and implementation
- Cybersecurity information technology implementation expertise, development of engagement work plans, deployment of program criterion, and related activities
- Modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project implementation team leader over assigned support areas, and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical implementation expert

- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation	Minimum of 5 years of information	Minimum Bachelor's Degree or
Sr Professional V	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Experience in program management support, cybersecurity information technology implementation expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, development, and implementation of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements practical cybersecurity information technology solutions and methodologies
- Provides senior-level analytical and program support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific Cybersecurity project tasks
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- This position performs analyses and makes diagnoses, as well as investigates and defines symptoms and problems, and develops conclusions
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Sr Professional IV	Minimum of 4 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	•

- Experience in program management support, cybersecurity information technology implementation expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, development, and implementation of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members

- Assists with analyzing data and systems architecture, creates designs, and implements information systems solutions
- Supports planning and project management for cybersecurity information technology tasks
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations	Minimum of 13 years of information	Minimum Bachelor's Degree or
Executive II	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management experience, direction on client engagements, cybersecurity information technology
 operations expertise, experience in project definition and systems analysis, creation of competitive strategies, and
 integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new Cybersecurity strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating multiple projects and team, and assisting clients in achieving desired program results
- Serves as a cyber information technology advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations	Minimum of 10 years of information	Minimum Bachelor's Degree or
Executive I	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Executive level management experience, direction on client engagements, cybersecurity information technology operations expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed into new Cybersecurity strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating single projects and team, and assisting clients in achieving desired program results
- Serves as a cyber information technology advisor to the client
- · Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance for supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Leader III	Minimum of 11 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	•

- Engagement experience in program scope and approach, cybersecurity information technology operations
 expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and
 operations, planning changes at the executive levels, oversight of key cybersecurity enablers, and management of
 project resources
- Maintains responsibility for managing the program team and daily operations of project development or serves in
 a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed
 solution

- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Manages Cybersecurity program operations and activities and is a key point of contact with client executives
- Assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Leads integrated team of multi-disciplinary professionals, with multiple concurrent deliverables and tasks
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure
 quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Leader II	Minimum of 9 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, cybersecurity information technology operations
 expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and
 operations, planning changes at the executive levels, oversight of key cybersecurity enablers, and management of
 project resources
- Manages the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Manages Cybersecurity program operations and activities and is a point of contact with client executives
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Assists with integrated teams of multi-disciplinary professionals, with multiple concurrent deliverables and tasks
- Manages technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations	Minimum of 8 years of information	Minimum Bachelor's Degree or
Leader I	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, cybersecurity information technology operations
 expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and
 operations, planning changes at the executive levels, oversight of key cybersecurity enablers, and management of
 project resources
- Manages the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution

- Provides assistance with integrated teams of multi-disciplinary professionals, with multiple concurrent deliverables and tasks
- Assists with managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables

 Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Lead	Minimum of 8 years of information	Minimum Bachelor's Degree or
IV	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Experience in operations management and direction on cybersecurity projects, or extensive knowledge of and experience with cybersecurity system development and implementation
- Cybersecurity information technology operations expertise, development of engagement work plans, deployment
 of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical
 solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues,
 interprets implications of design, and helps to ensure that software design meets business operational needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead
 and instructing, directing, managing, and monitoring the work of other cybersecurity staff or serves in a role of an
 experienced Cybersecurity technical expert
- Develops and manages analysis plan, conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Lead	Minimum of 6 years of information	Minimum Bachelor's Degree or
Ш	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Experience in operations management and direction on cybersecurity projects, or extensive knowledge of and experience with cybersecurity system development and implementation
- Cybersecurity information technology operations expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operational needs

- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Sr	Minimum of 5 years of information	Minimum Bachelor's Degree or
Professional V	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience in program management support, cybersecurity information technology operations expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical and operational program support, and is focused on providing high performance work

- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team and leads small teams
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific Cybersecurity project tasks
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Sr	Minimum of 4 years of information	Minimum Bachelor's Degree or
Professional IV	technology or directly relevant	equivalent in a related field

HEALTH IT SERVICES

Applicable to SINs: 54151HEAL, 54151HEAL(STLOC), 54151HEAL(RC)

Deloitte's SIN 54151HEAL rate card is comprised of three service lines [(1) Advisory, (2) Implementation and (3) Operations] each with specific Health IT labor categories and ceiling prices.

LABOR CATEGORY	YEARS OF EXPERIENCE	EDUCATION
Health IT Advisory Executive III	Minimum of 15 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Executive level management experience, health information technology advisory expertise and direction on client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions
- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new health IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Serves as a health information technology advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing and advising client issues and feedback
- Assumes accountability for supervising designated resources and enforcing quality control practices for each project
- Maintains responsibility for project reviews and overall contract progress and performance
- Reviews and analyzes reports and directives to obtain data required for delivering presentations and leading client meetings
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Advisory Executive II	Minimum of 13 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management experience, health information technology advisory expertise and direction on client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions

- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new health IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Serves as a health information technology advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing and advising client issues and feedback
- Provides assistance with supervising designated resources and enforcing quality control practices for each project
- Maintains responsibility for project reviews and overall contract progress and performance
- Reviews and analyzes reports and directives to obtain data required for delivering presentations and leading client meetings
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Advisory Executive I	Minimum of 10 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management experience, health information technology advisory expertise and direction on client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions

- Maintains responsibility for managing and advising on technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Assists with the completion of Health information technology advisory specific tasks within estimated time frames and budget constraints
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Advisory Project Lead	Minimum of 8 years of information	Minimum Bachelor's Degree or
III	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience in advisory support, management and direction on Health IT projects, or extensive knowledge of and experience with Health IT systems development and implementation
- Development of engagement work plans, deployment of program criterion, and related activities
- 8+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System
- Devises or modifies procedures to solve complex problems, provides advice, guidance, and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other Health IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices within estimated time frames and budget constraints
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Advisory Project Lead II	Minimum of 6 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience in advisory support, management and direction on Health IT projects, or extensive knowledge of and experience with Health IT systems development and implementation
- Development of engagement work plans, deployment of program criterion, and related activities
- 6+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System

- Devises or modifies procedures to solve complex problems, provides advice, guidance, and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead
 and instructing, directing, advising, and monitoring the work of other Health IT staff or serves in a role of an
 experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
 within estimated time frames and budget constraints
- Performs analyses of client issues and recommends solutions
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Advisory Project Lead I	Minimum of 5 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience in advisory support, management and direction on Health IT projects, or extensive knowledge of and experience with Health IT systems development and implementation
- Development of engagement work plans, deployment of program criterion, and related activities
- 5+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System
- Devises or modifies procedures to solve complex problems, provides advice, and experience on technical solution implementation, engages resource, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, and instructing, directing, advising, and monitoring the work of other Health IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
 within estimated time frames and budget constraints
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Solution Lead II	Minimum of 10 years of information	Minimum Bachelor's Degree or equivalent in a related field
	technology or directly relevant industry experience	equivalent in a related field

- Experience in advisory support, management and direction on Health IT projects, or extensive knowledge of and experience with Health IT systems development and implementation
- Development of engagement work plans, deployment of program criterion, and related activities
- 10+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System
- Devises or modifies procedures to solve complex problems, provides advice, guidance, and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements

- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other Health IT staff or serves in a role of an experienced technical subject matter expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices within estimated time frames and budget constraints
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Communicates recommendation to clients, builds alignment, and manages client relationships
- Delivers presentations of information including, but not limited to, new commitments in the status of work products, and problems encountered, and leads client meetings
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation	Minimum of 13 years of information	Minimum Bachelor's Degree or
Executive II	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management experience, health information technology implementation expertise, direction on client engagements, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Leads information technology project planning including the delivery of the vision and mission, work plans, staffing, and financials
- Serves as a health information technology implementations advisor to the client

- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating and implementing work standards, creating strategic project objectives, and managing client issues and feedback
- Coordinates all parties to complete tasks and reviews information technology solutions for completeness and adherence to customer requirements
- Provides assistance with supervising designated resources and enforcing quality control practices for each project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation Executive I	Minimum of 10 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	1

- Executive level management experience, health information technology implementation expertise, direction on client engagements, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Leads information technology project planning including the delivery of the vision and mission, work plans, staffing, and financials
- Serves as a health information technology implementations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating and implementing work standards, creating strategic project objectives, and managing client issues and feedback
- Coordinates all parties to complete tasks and reviews information technology solutions for completeness and adherence to customer requirements
- Provides assistance with supervising designated resources and enforcing quality control practices for each project
- Assist with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation Lead II	Minimum of 13 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management experience, health information technology implementation expertise, direction on client engagements, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Leads information technology project planning including the delivery of the vision and mission, work plans, staffing, and financials
- Serves as a health information technology implementations advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating and implementing work standards, creating strategic project objectives, and managing client issues and feedback

- Coordinates all parties to complete tasks and reviews information technology solutions for completeness and adherence to customer requirements
- Assumes accountability for supervising designated resources and enforcing quality control practices for each project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation Lead I	Minimum of 10 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management experience, health information technology implementation expertise, direction on client engagements, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Leads information technology project planning including the delivery of the vision and mission, work plans, staffing, and financials
- Serves as a health information technology implementations advisor and subject matter expert to the client and guides helps with day-to-day activities of project teams
- · Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Formulates and implements work standards, creating strategic project objectives, and managing client issues and feedback
- Coordinates all parties to complete tasks and reviews information technology solutions for completeness and adherence to customer requirements
- Provides assistance with supervising designated resources and enforcing quality control practices for each project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Engagement	Minimum of 11 years of information	Minimum Bachelor's Degree or
Implementation Leader III	technology or directly relevant	equivalent in a related field
	industry experience	_

- Experience includes contributing to the engagement's health IT program scope and approach, health information
 technology implementation expertise, focus on program delivery and technical integration, ability to drive Health
 IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and
 management of project resources
- Health IT experience through secure use and sharing of health information
- Maintains responsibility for managing the program team and daily operations of project development
- Serves as a subject matter expert and advisor to implementation and operations teams, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Health IT related program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing and implementing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables

 Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Engagement	Minimum of 9 years of information	Minimum Bachelor's Degree or
Implementation Leader II	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Experience includes contributing to the engagement's health IT program scope and approach, health information
 technology implementation expertise, focus on program delivery and technical integration, ability to drive Health
 IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and
 management of project resources
- Health IT experience through secure use and sharing of health information
- Maintains responsibility for managing the program team and daily operations of project development
- Serves as a subject matter expert and advisor to implementation and operations teams and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Health IT related program activities and is a point of contact with client executives
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communications with the Contracting Officer's Technical and delegated government representatives
- Manages and implements technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Engagement	Minimum of 8 years of information	Minimum Bachelor's Degree or
Implementation Leader I	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Experience includes contributing to the engagement's health IT program scope and approach, health information
 technology implementation expertise, focus on program delivery and technical integration, ability to drive Health
 IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and
 management of project resources
- Health IT experience through secure use and sharing of health information
- Manages the program team and daily operations of project development
- Serves as a subject matter expert and advisor to implementation and operations teams, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Health IT related program activities
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Manages and implements technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation	Minimum of 14 years of information	Minimum Bachelor's Degree or
Architect II	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

 Experience includes contributing to the engagement's health IT program scope and approach, health information technology implementation expertise, focus on program delivery and technical integration, ability to drive Health IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources

- Health IT experience through secure use and sharing of health information
- Maintains responsibility for managing the program team and daily operations of project development
- Serves as a subject matter expert and advisor to implementation and operations teams, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Health IT related program activities and is a key point of contact with client executives
- Is the subject matter expert for all health IT related tasks and takes ownership and accountability for project workstreams
- Assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing and implementing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation	Minimum of 12 years of information	Minimum Bachelor's Degree or
Architect I	technology or directly relevant	equivalent in a related field
	industry experience	_

- Experience includes contributing to the engagement's health IT program scope and approach, health information
 technology implementation expertise, focus on program delivery and technical integration, ability to drive Health
 IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and
 management of project resources
- Health IT experience through secure use and sharing of health information
- Maintains responsibility for managing the program team and daily operations of project development
- Serves as a subject matter expert and advisor to implementation and operations teams, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Health IT related program activities and is a point of contact with client executives
- Is the subject matter expert for all health IT related tasks and takes ownership and accountability for project workstreams
- Assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Assists with managing and implementing technical solutions, delegating appropriate resources, and helping to
 ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation Project	Minimum of 8 years of information	Minimum Bachelor's Degree or
Lead III	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience includes management and direction Health IT systems implementation, or extensive knowledge of and experience with Health IT systems development and implementations
- · Development of engagement work plans, deployment of program criterion, and related activities
- 8+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System

- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other Health IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives to be implemented, and recommends solutions
- Communicates client expectations to project team and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation Project Lead II	Minimum of 6 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	

- Experience includes management and direction Health IT systems implementation, or extensive knowledge of and experience with Health IT systems development and implementations
- Development of engagement work plans, deployment of program criterion, and related activities
- 6+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead
 and instructing, directing, and monitoring the work of other Health IT staff or serves in a role of an experienced
 technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions to be implemented
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation Project	Minimum of 5 years of information	Minimum Bachelor's Degree or
Lead I	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience includes management and direction Health IT systems implementation, or extensive knowledge of and experience with Health IT systems development and implementations
- Development of engagement work plans, deployment of program criterion, and related activities
- 5+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements

- Serves in the role of project team leader over assigned support areas, and instructing, directing, and monitoring the work of other Health IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives to be implemented
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation Solution	Minimum of 10 years of information	Minimum Bachelor's Degree or
Lead II	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience includes management and direction Health IT systems implementation, or extensive knowledge of and experience with Health IT systems development and implementations
- Development of engagement work plans, deployment of program criterion, and related activities
- 10+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other Health IT staff or serves in a role of an experienced technical subject matter expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Selects the most relevant tools and techniques to meet specific healthy information technology requirements
- Performs analyses of client issues, assesses appropriate alternatives to be implemented, and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation Solution	Minimum of 8 years of information	Minimum Bachelor's Degree or
Lead I	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience includes management and direction Health IT systems implementation, or extensive knowledge of and experience with Health IT systems development and implementations
- Development of engagement work plans, deployment of program criterion, and related activities
- 8+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System
- Modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas and instructing, directing, and monitoring the work of other Health IT staff or serves in a role of an experienced technical subject matter expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Selects the most relevant tools and techniques to meet specific healthy information technology requirements
- Performs analyses of client issues, assesses appropriate alternatives to be implemented

- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation Sr	Minimum of 5 years of information	Minimum Bachelor's Degree or
Professional V	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience in program management support and familiarity with client issues, health information technology implementation expertise, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- This role requires building strong working relationships with all levels of the organization, including executives, management, and line staff in order to coordinate the efforts of Health IT resources
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks
- Applies business modeling, process modeling, and business design techniques
- Applies quality standards to work products as it relates to health information technology
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions for implementation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation Sr	Minimum of 4 years of information	Minimum Bachelor's Degree or
Professional IV	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience in program management support and familiarity with client issues, health information technology implementation expertise, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- This role requires building strong working relationships with all levels of the organization, including executives, management, and line staff in order to coordinate the efforts of Health IT resources
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may assist with specific project tasks
- Applies business modeling, process modeling, and business design techniques
- Applies quality standards to work products as it relates to health information technology
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables

- Assists with formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions for implementation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Implementation Sr	Minimum of 3 years of information	Minimum Bachelor's Degree or

- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Operations Executive II	Minimum of 13 years of information	Minimum Bachelor's Degree or
_	technology or directly relevant	equivalent in a related field
	industry experience	_

- Supports Health IT management across executive level management and direction on client engagements and
 operations, experience in project definition and systems analysis, creation of competitive strategies, and
 integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Experienced in providing medical thought leadership for clinical information systems
- Other experience includes coordinating multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a health information technology operations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and enforcing quality control practices for each project
- Maintains responsibility for project reviews and overall contract progress and performance
- Manages senior-most client relationships and guides senior client leaders through program change
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Operations Executive I	Minimum of 10 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Supports Health IT management across executive level management and direction on client engagements and operations, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Experienced in providing medical thought leadership for clinical information systems
- Other experience includes coordinating single projects and teams, and assisting clients in achieving desired program results
- Serves as a health information technology operations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for Supervises designated resources and enforcing quality control practices for each project
- Assist with project reviews and overall contract progress and performance
- Manages senior-most client relationships and guides senior client leaders through program changes
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Operations Leader III	Minimum of 11 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, health information technology operations expertise, focus on program delivery and technical integration, ability to drive Health IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Health IT experience through secure use and sharing of health information

- Maintains responsibility for managing the program team and daily operations of project development or serves in
 a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed
 solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages high complexity Health IT related program operations and is a key point of contact with client executives
- Assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across project operations and deliverables
- Facilitates client management teams through change processes and delivers presentations and leads client meetings
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Operations Leader II	Minimum of 9 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, health information technology operations expertise, focus on program delivery and technical integration, ability to drive Health IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Health IT experience through secure use and sharing of health information
- Manages the program team and daily operations of project development or serves in a role as a highly experienced technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages medium complexity Health IT related program operations and is a point of contact with client executives
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Manages technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across project operations and deliverables
- Assists with client management teams through change processes and delivers presentations and leads client meetings
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Operations Leader I	Minimum of 8 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, health information technology operations expertise, focus on program delivery and technical integration, ability to drive Health IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Health IT experience through secure use and sharing of health information
- Manages the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages low complexity Health IT related program operations

- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Provides assistance with managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across project operations and deliverables
- Assists with client management teams through change processes
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Operations Lead IV	Minimum of 8 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience in operations management and direction on Health IT projects, or extensive knowledge of and experience with Health IT systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related activities
- 8+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other Health IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Operations Lead III	Minimum of 6 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience in operations management and direction on Health IT projects, or extensive knowledge of and experience with Health IT systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related activities
- 6+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other Health IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line operations

 Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Operations Lead II	Minimum of 5 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Experience in operations management and direction on Health IT projects, or extensive knowledge of and experience with Health IT systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related activities
- 5+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, and instructing, directing, and monitoring the work of other Health IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions
- Maintains technical knowledge within industry and service line operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Operations Lead I	Minimum of 4 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Experience in operations management and direction on Health IT projects, or extensive knowledge of and experience with Health IT systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related activities
- 4+ years' experience working with a managed care organization, health insurer, or consultant in a network management/contract management role, such as contracting, provider services
- Responsible for managing various sized technical health related projects and initiatives impacting multiple entities within the IT Health System
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, and instructing, directing, and monitoring the work of other Health IT staff or serves in a role of an experienced technical experts
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues
- Maintains technical knowledge within industry and service line operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Operations Sr	Minimum of 5 years of information	Minimum Bachelor's Degree or
Professional V	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

• Experience in management support, health information technology operations expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables, as well as experience in the firm's health technology focused consulting offerings:

- enterprise health technology strategy development, future scenario analysis, policy analysis, and health technology strategy and design
- This role requires building strong working relationships with all levels of the organization, including executives, management, and line staff in order to coordinate the efforts of Health IT resources
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and operational support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers
 conclusions to Project Manager
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Operations Sr	Minimum of 4 years of information	Minimum Bachelor's Degree or

Technology Advisory Engagement Leader III	Minimum of 11 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	

- Engagement experience in large program scope and approach, information technology advisory experience
- Focuses on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for managing and advising the program team and daily operations of project development
 or serves in a role as a highly experienced technical expert, and helps to ensure client comfort and feasibility with
 designed solution
- Provides guidance and direction on a day-to-day basis for the implementation of all Information Technology
 efforts
- Communicates with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and advises program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Engagement Leader II	Minimum of 9 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	

- Engagement experience in medium sized program scope and approach, information technology advisory experience
- Focuses on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for managing and advising the program team and daily operations of project development
 or serves in a role as a highly experienced technical expert, and helps to ensure client comfort and feasibility with
 designed solution
- Provides direction on a day-to-day basis for the implementation of all Information Technology efforts
- Communicates with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and advises program activities and is a point of contact with client executives

- Responsible for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Provides assistance with Managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Engagement Leader I	Minimum of 8 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	1

- Engagement experience in small program scope and approach, information technology advisory experience, focus
 on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive
 levels, oversight of key information technology enablers, and management of project resources
- Manages and advises the program team and daily operations of project development or serves in a role as a highly experienced technical expert, and helps to ensure client comfort and feasibility with designed solution
- Provides assistance on a day-to-day basis for the implementation of all Information Technology efforts
- Other experience includes communication with client and project managers and management of projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and advises program activities and is a point of contact with client executives
- Assists with program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Provides assistance with Managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Solution Architect II	Minimum of 14 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in large program scope and approach, information technology advisory expert experience
- Focuses on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for leading and advising the program team and daily operations of project development
 or serves in a role as a highly experienced technical subject matter expert, and helps to ensure client comfort and
 feasibility with designed solution
- Provides guidance and direction on a day-to-day basis for the implementation of all Information Technology efforts
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Leads and advises program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery and oversight of key technical enablers on projects and identification
 of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Resolves problems and suggests creative solutions for all information technology efforts
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Solution Architect I	Minimum of 12 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in small to medium sized program scope and approach, information technology advisory expert experience
- Focuses on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for advising the program team and daily operations of project development or serves in a
 role as a highly experienced technical subject matter expert, and helps to ensure client comfort and feasibility with
 designed solution
- Provides guidance on a day-to-day basis for the implementation of all Information Technology efforts

 methodologies, support of program management, exposure to client issues, and development of project
 deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and advises, institutes, and supports business solutions
- Provides analytical, advisory, and program support
- Analyzes business requirements impacted by information technology, and defining applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned information technology engagement tasks within the project scope and budget with little oversight, while meeting deliverable requirements
- Serves as an analytical resource on engagement team
- Conducts relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Mid Professional I	Minimum of 2 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
1 Totessional 1	industry experience	equivalent in a related field

- Proficiency in analysis and defining business needs, information technology advisory expertise, applying
 methodologies, support of program management, exposure to client issues, and development of project
 deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and advises, institutes, and supports business solutions
- Provides analytical, advisory, and program support
- Analyzes business requirements impacted by information technology, and defining applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned information technology engagement tasks within the project scope and budget, while meeting deliverable requirements
- Serves as an analytical resource on engagement team
- Conducts relevant research, distilling data, and creating reports

- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Jr	Minimum of 2 years of information	Minimum Bachelor's Degree or
Professional III	technology or directly relevant	equivalent in a related field
	industry experience	

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations
 follow quality assurance metrics, information technology advisory expertise, and has programming experience in
 one or more languages, and is versed in system testing
- Experience in the following: data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Completes assigned information technology tasks for deliverable requirements with minimal oversight
- Assists project team in meeting program objectives timely and effectively, and contributes to obtaining data and reports for presentations and client meetings
- Assumes responsibility for process documentation and technical soundness
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Jr Professional II	Minimum of 1 year of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations
 follow quality assurance metrics, information technology advisory expertise, and has programming experience in
 one or more languages, and is versed in system testing
- Experience in the following: data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Completes assigned information technology tasks for deliverable requirements with minimal oversight
- Assists project team in meeting program objectives timely and effectively, and contributes to obtaining data and reports for presentations and client meetings
- Assists with process documentation and technical soundness
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Jr Professional I	Minimum of 1 year of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations
 follow quality assurance metrics, information technology advisory expertise, and has programming experience in
 one or more languages, and is versed in system testing
- Experience in the following: data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Completes assigned information technology tasks for deliverable requirements with minimal oversight
- Assists project team in meeting program objectives timely and effectively, and contributes to obtaining data and reports for presentations and client meetings
- Assists with process documentation and technical soundness
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation	Minimum of 15 years of information	Minimum Bachelor's Degree or
Executive III	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management experience, information technology implementation expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Guide's information technology project planning, including the delivery of the vision and mission, work plans, staffing, and financials
- Coordinates the design and roll out of information technology implementation and operation strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology implementations advisor to the client
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and implementing quality control practices for each project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation	Minimum of 13 years of information	Minimum Bachelor's Degree or
Executive II	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management experience, information technology implementation expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Assists information technology project planning including the delivery of the vision and mission, work plans, staffing, and financials
- Coordinates the design and roll out of information technology implementation and operation strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology implementations advisor to the client
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and implementing quality control practices for each project
- Maintains responsibility for project reviews and overall contract progress and performance

• Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation	Minimum of 10 years of information	Minimum Bachelor's Degree or
Executive I	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Executive level management experience, information technology implementation expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with implementing themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Assists information technology project planning including the delivery of the vision and mission, work plans, staffing, and financials
- Coordinates the design and roll out of information technology implementation and operation strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology implementations advisor to the client
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Assists with formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and implementing quality control practices for each project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Lead	Minimum of 13 years of information	Minimum Bachelor's Degree or
П	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management, information technology implementation expertise, direction on client engagements
- Experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Leads information technology project planning including the delivery of the vision and mission, work plans, staffing, and financials
- Other experience includes coordinating and leading the design and roll out of information technology implementation and operation strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology implementations advisor and subject matter expert to the client and guides dayto-day activities of project teams
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and implementing quality control practices for each project

Assists with project reviews and overall contract progress and performance

Leads teams providing all components of technology services including, but not limited to, advise, implement,

and operate services of people, process, and technology

Technology Implementation Lead I	Minimum of 10 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Executive level management experience, information technology implementation expertise, direction on client engagements, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, and helps to ensure overall soundness of analytical approach
- Helps coordinate information technology project planning including the delivery of the vision and mission, work plans, staffing, and financials
- Other experience includes coordinating the design and roll out of information technology implementation and operation strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology implementations advisor and subject matter expert to the client and helps with day-to-day activities of project teams
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and implementing quality control practices for each
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Engagement	Minimum of 11 years of information	Minimum Bachelor's Degree or
Implementation Leader III	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in large program scope and approach, information technology implementation experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for managing the program team and daily operations of project implementation or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and implements program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing and implementing solutions to information technology problems, validating innovative solutions with subject matter experts, and helps to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Engagement	Minimum of 9 years of information	Minimum Bachelor's Degree or
Implementation Leader II	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in medium sized program scope and approach, information technology implementation
 experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes
 at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for managing the program team and daily operations of project implementation or serves
 in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed
 solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and implements program activities and is a key point of contact with client executives
- Responsible for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Manages and implements solutions to information technology problems, validating innovative solutions with subject matter experts, and helps to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Engagement	Minimum of 8 years of information	Minimum Bachelor's Degree or
Implementation Leader I	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Engagement experience in small size program scope and approach, information technology implementation experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Manages the program team and daily operations of project implementation or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and implements program activities and is a point of contact with client executives
- Assists with program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Manages and implements solutions to information technology problems, validating innovative solutions with subject matter experts, and helps to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation	Minimum of 14 years of information	Minimum Bachelor's Degree or
Architect II	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in large program scope and approach, information technology implementation expert experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for managing the program team and daily operations of project implementation or serves
 in a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and feasibility
 with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and implements program activities and is a key point of contact with client executives

- Assumes responsibility for program delivery and oversight of key technical enablers on projects and identification
 of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Oversees completion of information technology implementation related tasks within the estimated time frames
- Maintains responsibility for managing and implementing solutions to information technology problems, validating
 innovative solutions with subject matter experts, and helps to ensure quality assurance principles are met across
 projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation	Minimum of 12 years of information	Minimum Bachelor's Degree or
Architect I	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in small to medium sized program scope and approach, information technology
 implementation expert experience, focus on program delivery and technical integration, ability to drive IT
 Strategy and planning changes at the executive levels, oversight of key information technology enablers, and
 management of project resources
- Maintains responsibility for managing the program team and daily operations of project implementation or serves in a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and implements program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Assists with the completion of information technology implementation related tasks within the estimated time frames
- Maintains responsibility for managing and implementing solutions to information technology problems and helps to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Project	Minimum of 8 years of information	Minimum Bachelor's Degree or
Lead III	technology or directly relevant	equivalent in a related field
	industry experience	

- Manages and directs on client engagements or extensive knowledge of and experience with system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Advises on information technology implementation problems using analysis, experience, and judgment
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead
 and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical
 expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions to be implemented
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Project	Minimum of 6 years of information	Minimum Bachelor's Degree or
Lead II	technology or directly relevant	equivalent in a related field
	industry experience	

- Manages and directs on client engagements or extensive knowledge of and experience with system development
 and implementation, development of engagement work plans, deployment of program criterion, and related
 activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Advises on information technology implementation problems using analysis, experience, and judgment
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions to be implemented
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Project	Minimum of 5 years of information	Minimum Bachelor's Degree or
Lead I	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Manages and directs on client engagements and advises on enterprise technology strategy development, system
 development and implementation, development of engagement work plans, deployment of program criterion, and
 related activities
- Experience typically includes management and direction on client engagements or extensive knowledge of and
 experience with system development and implementation, development of engagement work plans, deployment of
 program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Advises on information technology implementation problems using analysis, experience, and judgment
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions to be implemented
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Solution Lead II	Minimum of 10 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	_

- Manages and directs on client engagements or extensive knowledge of and experience with system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical
 solution implementation, engages resources and/or serves as an information technology subject matter expert and
 team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software
 design meets business needs
- Advises on information technology implementation problems using analysis, experience, and judgment

- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead
 and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical
 subject matter expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Selects the most relevant tools and techniques to meet specific information technology requirements
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions to be implemented
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Maintains technical knowledge within industry and service line

Technology Implementation	Minimum of 8 years of information	Minimum Bachelor's Degree or
Solution Lead I	technology or directly relevant	equivalent in a related field
	industry experience	

- Manages and directs on client engagements on client engagements or extensive knowledge of and experience with system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Advises on information technology implementation problems using analysis, experience, and judgment

- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Selects the most relevant tools and techniques to meet specific information technology requirements
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions to be implemented
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Sr Professional V	Minimum of 5 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	_

- Experience in program management support, information technology implementation experience, and familiarity
 with client issues, assistance with design issues, leading client teams, analysis of project data, and development of
 appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements information operational systems, processes, and policies
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to implement within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks
- Implements business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements and creates project deliverables
- Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager

- This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions for implementation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Sr Professional IV	Minimum of 4 years of information technology or directly relevant	Minimum Bachelor's Degree or equivalent in a related field
	industry experience	

- Experience in program management support, information technology implementation experience, and familiarity
 with client issues, assistance with design issues, leading client teams, analysis of project data, and development of
 appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements information operational systems, processes, and policies
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to implement within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks
- Implements business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions for implementation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Sr	Minimum of 3 years of information	Minimum Bachelor's Degree or
Professional III	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience in program management support, information technology implementation experience, and familiarity
 with client issues, assistance with design issues, leading client teams, analysis of project data, and development of
 appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements information operational systems, processes, and policies
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to implement within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Contributes to work plan development, reaching engagement milestones, and may assist with specific project tasks
- Implements business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- This position performs analyses and makes diagnoses, as well as defines symptoms and implementation problems
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Sr	Minimum of 2 years of information	Minimum Bachelor's Degree or
Professional II	technology or directly relevant	equivalent in a related field

Technology Operations Executive	Minimum of 13 years of information	Minimum Bachelor's Degree or
II	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management experience, information technology operations expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions
- Proficient in project estimation and resource planning and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Coordinates multiple projects and teams and assisting clients in desired information technology operations
 relating to, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology operations advisor to the client
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and quality control practices for each project
- · Provides contract and engagement oversight, including managing budget, risk, quality, and personnel
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations Executive I	Minimum of 10 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Executive level management experience, information technology operations expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions
- Proficient in project estimation and resource planning and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Coordinates single projects and teams and assisting clients in desired information technology operations relating to, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology operations advisor to the client
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Assists with formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Supervises designated resources and quality control practices for each project
- Provides contract and engagement oversight, including managing budget, risk, quality, and personnel
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations	Minimum of 11 years of information	Minimum Bachelor's Degree or
Engagement Leader III	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

• Engagement experience in program scope and approach, information technology operations experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources

- Maintains responsibility for managing the program team and daily operations of project operations or serves in a
 role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed
 solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery and oversight of key technical enablers on project operations and identification of needs for new tools
- Facilitates client management teams through change processes and delivers presentations
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across project operations and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations	Minimum of 9 years of information	Minimum Bachelor's Degree or

 Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations Lead IV	Minimum of 8 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Experience in information technology operations management and direction on client engagements or extensive knowledge of and experience with systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies operations procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operations
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead
 and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical
 expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line operations
- Manages and leads projects teams and ensures deliverables are presented to clients in a timely manner
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations Lead III	Minimum of 6 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience

- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Advisory Sr	Minimum of 4 years of information	Minimum Bachelor's Degree or
Professional I	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience in Identity, Credentials, and Access Management advisory support and familiarity with client issues, assistance with design issues, leading and advising client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and advisory support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- · Contributes to work plan development, reaching engagement milestones, and may lead specific project tasks
- Advises on and guiding sub-tasks of an information technology related business and technical needs
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with Formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives

- · Performs analyses and makes diagnoses, as well as defines symptoms and problems
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Advisory Mid	Minimum of 4 years of information	Minimum Bachelor's Degree or
Professional III	technology or directly relevant	equivalent in a related field
	industry experience	

- Proficiency in analysis and defining business needs, information technology advisory expertise, applying
 methodologies, support of program management, exposure to client issues, and development of project
 deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and advises, institutes, and supports business solutions
- Analyzing Identity, Credentials, and Access Management business requirements impacted by information technology, and defining applicable tools and innovative solutions including technology, methodology, and solution components
- Provides analytical, advisory, and program support
- Completes assigned engagement tasks within the project scope and budget, while meeting deliverable requirements with no oversight
- Serves as a key analytical resource on engagement team
- · Assumes responsibility for conducting relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Advisory Mid	Minimum of 3 years of information	Minimum Bachelor's Degree or

HSPD-12 IT Operations Executive	Minimum of 13 years of information	Minimum Bachelor's Degree or
II	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management experience, information technology operational expertise as it relates to identity, credentials, and access management, and direction on client engagements, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of operational and analytical approach, and is able to suggest alternatives
- Other experience includes coordinating multiple projects and team and assisting clients in desired operational program outcomes
- Serves as an HSPD-12 information technology operations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns

- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and quality control practices for each project
- Maintains responsibility for project reviews and overall contract progress, performance, and operations
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Executive I	Minimum of 10 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Executive level management experience, information technology operational expertise as it relates to identity, credentials, and access management, and direction on client engagements, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed into new IT strategy methodology, helps to ensure
 overall soundness of operational and analytical approach, and is able to suggest alternatives
- Other experience includes coordinating single projects and team and assisting clients in desired operational program outcomes
- Serves as an HSPD-12 information technology operations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Supervises designated resources and quality control practices for each project
- Assists with project reviews and overall contract progress, performance, and operations
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Leader III	Minimum of 11 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, information technology operations experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and identity, credentials, and access management expertise
- Maintains responsibility for managing the program team and daily operations of project operations or serves in a
 role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed
 solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages highly complex program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery and oversight of key technical enablers on project operations and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure alignment of scope, work product with client deliverables, and quality assurance principles are met across project operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Leader II	Minimum of 9 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in program scope and approach, information technology operations experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and identity, credentials, and access management expertise
- Manages the program team and daily operations of project operations or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages highly medium complexity program activities and is a point of contact with client executives
- Responsible for program delivery and oversight of key technical enablers on project operations and identification of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Manages technical solutions, delegating appropriate resources, and helping to ensure alignment of scope, work
 product with client deliverables, and quality assurance principles are met across project operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Leader I	Minimum of 8 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Engagement experience in program scope and approach, information technology operations experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and identity, credentials, and access management expertise
- Manages the program team and daily operations of project operations or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages low complexity program activities
- Responsible for program delivery and oversight of key technical enablers on project operations and identification
 of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Manages technical solutions, delegating appropriate resources, and helping to ensure alignment of scope, work product with client deliverables, and quality assurance principles are met across project operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Lead IV	Minimum of 8 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Engagement experience in identity, credentials, and access management and operations, or extensive knowledge of and experience with HSPD-12 systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related operational activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operations
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead
 and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical
 expert

- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff, as well as communicating recommendation to clients and managing client relationships
- Maintains technical knowledge within industry and service line operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Lead III	Minimum of 6 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

- Experience in identity, credentials, and access management and operations, or extensive knowledge of and experience with HSPD-12 systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related operational activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical
 solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues,
 interprets implications of design, and helps to ensure that software design meets business operations
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead
 and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical
 expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions
- Communicates client expectations to project team, as well as communicating recommendation to clients and managing client relationships
- Maintains technical knowledge within industry and service line operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Lead II	Minimum of 5 years of information	Minimum Bachelor's Degree or
	technology or directly relevant	equivalent in a related field
	industry experience	

Skills & Expertise:

- Experience in identity, credentials, and access management and operations, or extensive knowledge of and experience with HSPD-12 systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related operational activities
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operations

CLOUD COMPUTING AND CLOUD RELATED IT PROFESSIONAL SERVICES

Applicable to SINs: 518210C, 518210C(STLOC), 518210C(RC)

Deloitte's SIN 518210C rate card is comprised of three service lines [(1) Advisory, (2) Implementation and (3) Operations] each with specific Cloud related labor categories and ceiling prices.

1. Cloud Information Technology Advisory Services

LABOR CATEGORY	EXPERIENCE	EDUCATION
Cloud Advisory Executive III	Minimum 16 years consulting and/or	Minimum Bachelor's Degree or
	directly relevant industry experience	equivalent in a related field

- Executive level management, direction on client engagement, cloud information technology advisory expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on themes capable of being developed into new cloud strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and advising on multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology strategies
- Assumes accountability for supervising designated resources and enforcing quality control practices for each cloud project
- · Maintains responsibility for project reviews and overall contract progress and performance

- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

- Experienced in to cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Leader III	Minimum 8 years consulting and/or	Minimum Bachelor's Degree or
	directly relevant industry	equivalent in a related field
	experience	

- Executive level management experience, cloud information technology advisory expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions
- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new cloud information technology and helps to ensure overall soundness of analytical approach
- Advises executive-level clients on cloud information technology problem definition and solution design in order to achieve the desired program results
- Serves as a cloud information technology advisor and subject matter expert to the client and helps with day-to-day activities of project teams
- Assists in overseeing client communications relating to technical concerns
- May serve as the contractor's point of contact with the Contracting Officer's Technical Representative and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and enforcing quality control practices for each project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology

• Experienced in to cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Leader II	Minimum 6 years consulting and/or directly relevant industry	Minimum Bachelor's Degree or equivalent in a related field
	experience	

Skills & Expertise:

- Manages and directs on client engagement and advises on cloud information technology strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of advisory project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other cloud information technology staff or serves in a role of an experience technical expert
- Conducts analysis of work plan completeness, prepares status reports, and support quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Communicates recommendations to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people processes, and technology
- Skilled in cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Leader I	Minimum 5 years consulting and/or	Minimum Bachelor's Degree or

IV	directly relevant industry	equivalent in a related field
	experience	

- Program management support experience, cloud information technology advisory experience, and familiarity with client issues, assistance with design issues, leading and advising client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and advisory support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Contributes to work plan development, reaching engagement milestones, and may lead specific project tasks
- Advises on subtasks of cloud information technology related business and technical needs
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Adept in cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Sr Professional	Minimum 3 years consulting and/or	Minimum Bachelor's Degree or
II	directly relevant industry	equivalent in a related field
	experience	

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, advisory, and/or program support
- Analyzes business requirements impacted by cloud information technology, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned cloud information technology engagement tasks within the project scope and budget with no oversight, while meeting deliverable requirements
- Serves as a key analytical resource in engagement team
- Assumes responsibility for conducting relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology

Proficient in cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Sr Professional I	Minimum 2 years consulting and/or directly relevant industry	Minimum Bachelor's Degree or equivalent in a related field
	experience	

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying
 methodologies, support of program management, exposure to client issues, and development of project
 deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, advisory, and/or program support
- Analyzes business requirements impacted by cloud information technology, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned cloud information technology engagement tasks within the project scope and budget with little oversight, while meeting deliverable requirements
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Proficient in cloud information technology projects or related disciplines such as: strategy development, cloud
 suitability assessment, application development, application rationalization, configuration management, business
 process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions
 architecture, systems analysis and engineering, system administration, application and data migration,
 cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources
 and facilities management, database planning and design, network services, programming, conversion support,
 network services project management, and data/records management or a related field

Cloud Advisory Mid Professional	Minimum 2 years consulting	Minimum Bachelor's Degree or
	and/or directly relevant industry	equivalent in a related field
	experience	

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying
 methodologies, support of program management, exposure to client issues, and development of project
 deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, advisory, and/or program support
- Analyzes business requirements impacted by cloud information technology, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned cloud information technology engagement tasks within the project scope and budget with oversight, while meeting deliverable requirements
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities

- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Proficient in cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Jr Professional III	Minimum 1 year consulting	Minimum Bachelor's Degree or
	and/or directly relevant industry	equivalent in a related field
	experience	

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying
 methodologies, support of program management, exposure to client issues, and development of project
 deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, advisory, and/or program support
- Analyzes business requirements impacted by cloud information technology, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Analyzes, interprets, extrapolates, projects and models data to reach conclusions
- As assigned, completes sections of cloud consulting assignments independently or with oversight
- Familiar with cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Jr Professional II	Minimum 2 years consulting	Minimum Associate's Degree or
	and/or directly relevant industry	equivalent in a related field
	experience	

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying
 methodologies, support of program management, exposure to client issues, and development of project
 deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, advisory, and/or program support
- Analyzes business requirements impacted by cloud information technology, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- As assigned, completes sections of cloud consulting assignments independently or with oversight

• Familiar with cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Jr Professional 1	Minimum 1 year consulting and/or directly relevant industry	Minimum Associate's Degree or equivalent in a related field
	experience	•

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying
 methodologies, support of program management, exposure to client issues, and development of project
 deliverables

2. Cloud Information Technology Implementation Services

LABOR CATEGORY	EXPERIENCE	EDUCATION
Cloud Implementation Executive	Minimum 16 years consulting and/or	Minimum Bachelor's Degree or
III	directly relevant industry experience	equivalent in a related field

- Executive level management, direction on client engagement, cloud information technology implementation expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on cloud solution implementation strategy and methodology, helps to ensure overall soundness of approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology implementation advisor to the client
- · Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology implementation strategies

- Assumes accountability for supervising designated resources and enforcing quality control practices for each cloud project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Executive	Minimum 14 years consulting	Minimum Bachelor's Degree or
II	and/or directly relevant industry	equivalent in a related field
	experience	

- Executive level management, direction on client engagement, cloud information technology implementation expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on cloud solution implementation strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology implementation advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology implementation strategies
- Oversees quality control practices for each cloud project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Executive I	Minimum 11 years consulting and/or directly relevant industry	Minimum Bachelor's Degree or equivalent in a related field
	experience	•

- Executive level management, direction on client engagement, cloud information technology implementation
 expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration
 of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing

- Identifies and advises on cloud solution implementation strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology implementation advisor to the client

- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology implementation strategies
- Advises on enforcement of quality control practices for each cloud project
- Provides guidance to project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Leader V	Minimum 12 years consulting and/or directly relevant industry	Minimum Bachelor's Degree or equivalent in a related field
	experience	•

- Executive level management, direction on client engagement, cloud information technology implementation
 expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration
 of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on cloud solution implementation strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology implementation advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology implementation strategies
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Experienced in cloud information technology implementations or related disciplines such as: strategy
 development, cloud suitability assessment, application development, application rationalization, configuration
 management, business process analysis, DevSecOps pipeline establishment, information assurance, quality
 assurance, solutions architecture, systems analysis and engineering, system administration, application and data
 migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development,
 resources and facilities management, database planning and design, network services, programming, conversion
 support, network services project management, and data/records management or a related field

Cloud Implementation Leader IV	Minimum 10 years consulting	Minimum Bachelor's Degree or
	and/or directly relevant industry	equivalent in a related field
	experience	

- Executive level management, direction on client engagement, cloud information technology implementation
 expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration
 of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Oversees identifying and advising on cloud information technology implementation strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology implementation advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical Representative and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology implementation strategies
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Experienced in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Leader III	Minimum 8 years consulting and/or	E
	directly relevant industry	equivalent in a related field
	experience	

- Executive level management experience, cloud information technology implementation expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions
- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes for new cloud information technology solution implementations and helps to ensure overall soundness of analytical approach
- Advises executive-level clients on cloud information technology implementation problem definition and solution design in order to achieve the desired program results
- Serves as a cloud information technology implementation advisor and subject matter expert to the client and helps with day-to-day activities of project teams
- Assists in overseeing client communications relating to technical concerns
- May serve as the contractor's point of contact with the Contracting Officer's Technical Representative and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and enforcing quality control practices for each project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology

• Experienced in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Leader II	Minimum 6 years consulting and/or	Minimum Bachelor's Degree or
	directly relevant industry	equivalent in a related field
	experience	

Skills & Expertise:

- Manages and directs client engagements relating to cloud information technology implementation strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of implementation project team leader over assigned support areas, often filling the position of
 project team lead and instructing, directing, advising, and monitoring the work of other cloud information
 technology staff or serves in a role of an experience technical expert
- Conducts analysis of work plan completeness, prepares status reports, and support quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Communicates recommendations to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people processes, and technology
- Skilled in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Leader I	Minimum 5 years consulting and/or	Minimum Bachelor's Degree or
	directly relevant industry	equivalent in a related field
	experience	

- Manages and directs client engagements relating to cloud information technology implementation strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities

Professional II	directly relevant industry	equivalent in a related field
	experience	

- Proficient in analysis and defining business needs, cloud information technology implementations, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, implementation, and/or program support
- Analyzes business requirements impacted by cloud information technology implementations, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned cloud information technology implementation tasks within the project scope and budget with no oversight, while meeting deliverable requirements
- Serves as a key analytical resource in engagement team
- Assumes responsibility for conducting relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology

• Proficient in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Sr Professional I	Minimum 2 years consulting and/or directly relevant industry	Minimum Bachelor's Degree or equivalent in a related field
	experience	_

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology implementations, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, implementation, and/or program support
- Analyzes business requirements impacted by cloud information technology implementations, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned cloud information technology implementation tasks within the project scope and budget with little oversight, while meeting deliverable requirements
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Proficient in cloud information technology implementations projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Mid	Minimum 2 years consulting	Minimum Bachelor's Degree or
Professional	and/or directly relevant industry	equivalent in a related field
	experience	

- Proficient in analysis and defining business needs, cloud information technology implementations, applying
 methodologies, support of program management, exposure to client issues, and development of project
 deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, implementation, and/or program support
- Analyzes business requirements impacted by cloud information technology implementations, and defines
 applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned cloud information technology implementation tasks within the project scope and budget with oversight, while meeting deliverable requirements
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities

- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Proficient in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Jr Professional III	Minimum 1 year consulting and/or directly relevant industry	Minimum Bachelor's Degree or equivalent in a related field
	experience	1

- Proficient in analysis and defining business needs, cloud information technology implementations, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, implementation, and/or program support
- Analyzes business requirements impacted by cloud information technology implementations, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Analyzes, interprets, extrapolates, projects and models data to reach conclusions
- As assigned, completes cloud implementation assignments independently or with oversight
- Familiar with cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Jr	Minimum 2 years consulting	Minimum Associate's Degree or
Professional II	and/or directly relevant industry	equivalent in a related field
	experience	

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying
 methodologies, support of program management, exposure to client issues, and development of project
 deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, advisory, and/or program support
- Analyzes business requirements impacted by cloud information technology, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- · As assigned, completes sections of cloud implementation assignments with minimal oversight

• Familiar with cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Jr Professional I	Minimum 1 year consulting and/or directly relevant industry	Minimum Associate's Degree or equivalent in a related field
1 ocessional 1	experience	equivalent in a related field

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, implementation, and/or program support
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- As assigned, completes cloud implementation assignments with oversight
- Familiar with cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

3. Cloud Information Technology Operations Services

LABOR CATEGORY	EXPERIENCE	EDUCATION
Cloud Operations Executive III	Minimum 16 years consulting and/or	Minimum Bachelor's Degree or
	directly relevant industry experience	equivalent in a related field

- Executive level management, direction on client engagement, cloud information technology operations and maintenance expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on cloud solution operations strategy and methodology, helps to ensure overall soundness of approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology operations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology operations and maintenance strategies

- Assumes accountability for supervising designated resources and enforcing quality control practices for each cloud project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology operations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Executive II	Minimum 14 years consulting and/or directly relevant industry	Minimum Bachelor's Degree or equivalent in a related field
	experience	1

- Executive level management, direction on client engagement, cloud information technology operations and
 maintenance expertise, experience in project definition and systems analysis, creation of competitive strategies,
 and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on cloud solution operations strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology operations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology operations strategies
- Oversees quality control practices for each cloud project
- · Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology operations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Executive I	Minimum 11 years consulting and/or directly relevant industry	Minimum Bachelor's Degree or equivalent in a related field
	experience	•

- Executive level management, direction on client engagement, cloud information technology operations and maintenance expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing

- Identifies and advises on cloud solution operations strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results

- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology operations strategies
- Advises on enforcement of quality control practices for each cloud project
- Provides guidance to project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology operations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Leader V	Minimum 12 years consulting and/or directly relevant industry	Minimum Bachelor's Degree or equivalent in a related field
	experience	

- Executive level management, direction on client engagement, cloud information technology operations and
 maintenance expertise, experience in project definition and systems analysis, creation of competitive strategies,
 and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on cloud solution operations strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology operations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology operations strategies
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Experienced in cloud information technology operations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Leader IV	Minimum 10 years consulting	Minimum Bachelor's Degree or
	and/or directly relevant industry	equivalent in a related field
	experience	

- Executive level management, direction on client engagement, cloud information technology operations and maintenance expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Oversees identifying and advising on cloud information technology operations strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology operations advisor and subject matter expert to the client and guides day-to-day activities of project teams
- · Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical Representative and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology operations strategies
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Experienced in cloud information technology operations and related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Leader III	Minimum 8 years consulting and/or directly relevant industry	Minimum Bachelor's Degree or equivalent in a related field
	experience	

- Executive level management experience, cloud information technology operations and maintenance expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions
- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes for new cloud information technology solution operations and helps to ensure overall soundness of analytical approach
- Advises executive-level clients on cloud information technology operations problem definition and solution design in order to achieve the desired program results
- Serves as a cloud information technology operations advisor and subject matter expert to the client and helps with day-to-day activities of project teams
- Assists in overseeing client communications relating to technical concerns
- May serve as the contractor's point of contact with the Contracting Officer's Technical Representative and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and enforcing quality control practices for each project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology

Experienced in cloud information technology operations and related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Leader II	Minimum 6 years consulting and/or directly relevant industry	Minimum Bachelor's Degree or equivalent in a related field
	experience	-

Skills & Expertise:

- Manages and directs client engagements relating to cloud information technology operations and maintenance strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution
 operations, engages resources and/or serves as a team leader, performs analyses of client issues, interprets
 implications of design, and helps to ensure that software design meets business needs
- Leads business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of operations project team leader over assigned support areas, often filling the position of
 project team lead and instructing, directing, advising, and monitoring the work of other cloud information
 technology staff or serves in a role of an experience technical expert
- Conducts analysis of work plan completeness, prepares status reports, and support quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Communicates recommendations to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people processes, and technology
- Skilled in cloud information technology operations and related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Leader I	Minimum 5 years consulting and/or	Minimum Bachelor's Degree or
	directly relevant industry	equivalent in a related field
	experience	

- Manages and directs client engagements relating to cloud information technology operations and maintenance strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution

- Communicates recommendations to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people processes, and technology
- Skilled in cloud information technology implementation operations and related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Sr Professional	Minimum 6 years consulting and/or	Minimum Bachelor's Degree or
\mathbf{V}	directly relevant industry	equivalent in a related field
	experience	

- Program management support experience, cloud information technology operations and maintenance experience, and familiarity with client issues, assistance with design issues, leading and advising client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and operations support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget

- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks
- Advises on and guides subtasks of cloud information technology operations related business and technical needs
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Adept in cloud information technology operations and related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

4. HUMAN RESOURCES TECHNOLOGY SERVICES – ADVISORY

LABOR CATEGORY	EXPERIENCE	EDUCATION
HRT Advisory Executive III (TD)	Minimum 14 years consulting or	Bachelor's degree or equivalent in a
	related experience	related field

Skills & Expertise:

- Experienced in executive level management and strategic advising to client engagements.
- Possesses expert knowledge of human capital strategies and technologies, and organizational change
 management solutions including, but not limited to the implementation and maintenance of comprehensive
 employee skills development, training and personal attributes to develop and retain quality, high performing,
 and diverse talent
- Skilled in reviewing strategic plans and business strategies, organizational and infrastructural designs, and project deliverables to maintain a standard of consistency and quality throughout a project's life cycle.

Responsibilities:

• Serves as an advisor on human capital strategies and technologies

- Guides critical technological, business and operational areas to provide complete human resources life-cycle support ("cradle to grave") to enable and achieve their missions to more effectively manage risk, schedule, cost, and scope; oversees projects based upon the Government specifications and standards
- Reviews project plans, designs, and business and systems analyses
- Advises and oversees all phases of human capital related projects from systems design, implementation, maintenance and operations, to final completion
- Advises on the development and implementation of human resource strategy to provide solutions to client issues including, but not limited to, workforce finance, scheduling, methodology, tools, and solution components
- Provides quality assurance on human capital related implementation plan
- Provides the primary strategy interface with client; collaborates in the definition, implementation, and execution or organization policies, practices, procedures, and attainment of operating goals
- Reviews and analyzes reports and directives, and obtains data required for delivering presentations and leading client meetings
- Delivers presentations and leads strategic level client meetings
- Accountable for the completion of human resources related activities within estimated time frames and budget constraints
- Leads teams in providing all components of human resources services including, but not limited to, advise, implement, and operate services of people, process, and technology

HRT Advisory Executive II (TD)	Minimum 12 years consulting or	Bachelor's degree or equivalent in a
	related experience	related field

- Experienced in executive level management and strategic advising to client engagements.
- Possesses expert knowledge of human capital strategies and technologies, and organizational change management solutions including, but not limited to the implementation and maintenance of comprehensive employee skills development, training and personal attributes to develop and retain quality, high performing, and diverse talent
- Skilled in reviewing strategic plans and business strategies, organizational and infrastructural designs, and project deliverables to maintain a standard of consistency and quality throughout a project's life cycle.

EXPERIENCE / EDUCATION SUBSTITUTION EQUIVALENCY*

Deloitte Consulting's labor category descriptions identify the functional responsibilities and education and experience requirements associated with each labor category. These requirements are a reference guide to the types of experience and educational background of typical personnel in each labor category.

Personnel must meet the defined labor category minimum qualifications or substitutions noted below. The labor category qualifications do not set an education or experience ceiling.

EDUCATION SUBSTITUTION EQUIVALENCY	EXPERIENCE SUBSTITUTION EQUIVALENCY	OTHER SUBSTITUTION EQUIVALENCY
High School Diploma		 General Educational Development (GED) OR Vocational Academic Certificate
Associate's	2 years of experience	 Professional Certification/License OR Registered Apprenticeship
Bachelor's	4 years of experience	 Professional Certification/License OR Registered Apprenticeship and 2 years of experience OR Associate's and 2 years of experience
Master's	6 years of experience	 Professional Certification/License Registered Apprenticeship and more than 2 years of experience OR Associate's and 4 years of experience OR Bachelor's and 2 years of experience
Doctorate (PhD or JD)	10 years of experience	 Bachelor's and 6 years of experience OR Master's and 4 years of experience

Supporting notes:

- Education/Experience Substitution Equivalency table is applicable to all labor categories.
- Education, experience, and/or other equivalencies may be substituted for each other.
- Each year of experience may be substituted for 1 year of education, and vice versa.
- Successful completion of higher education which has not yet resulted in a degree may be counted as 1 year of experience for each year of college completed.
- Professional Certifications/Licenses, Registered Apprenticeships, and Vocational Training may be substituted for experience or education.

SIN 54151ECOM – Electronic Commerce and Subscription Services

CentralSightTM a Deloitte Consulting solution that enables clients to capture leading indicators and prevent supply chain disruptions before they occur, saving money, protecting brand, and radically increasing supply chain integrity. The solution is comprised of required and optional components and is configured for the specific customer need. CentralSightTM is complemented by the professional services that Deloitte Consulting already offers on its GSA MAS contract.

The Ordering Activity's use of the Licensed Software is subject to the license terms and conditions of Deloitte Consulting's Subscription License Agreement, which shall supersede all other terms and conditions, and which must be incorporated into any resulting contract award.

The CentralSightTM solution is comprised of 5 items -

1. Setup & Training –

Part No.	Product Name	Description
		Backend production team new project spin-up, communication, coordination,
SE0001	Set Up & Training	management. Client platform instance creation and initial configuration and
		personnel training. *Required.

2. Subscription License -

Part No.	Product Name	Description	
SL0001	Subscription License	Subscription to Deloitte's CentralSight TM Platform, providing access to	
		supply chain illuminations, dashboard views, supplier profiles, supplier risks,	
		and monitoring and alerting on suppliers [up to the quantity purchased via the	
		Suppliers Under Management Tiers below]. Includes hosting and technical	
		support for the length of the subscription. Platform subscription must be	
		purchased before additional items below. Supply Chain Illuminations and	
		other Managed Service analysis, support, and deliverables are purchased via	
		Professional Services fees.	

3. Dashboard User Access

Part No.	Product Name	Description
DA0001	Dashboard User	User License to access CentralSight™ Platform. User License is issued to a
	Access	named individual and may only be used by that named individual. *At a
		minimum, 1 Dashboard User Access license is required with the purchase of a
		Subscription License.

4. Suppliers Under Management

Part No.	Product Name	Description	
		Monitoring & Alerting dashboard continuously monitoring & alerting on 1 to	
SM0250	Tier 1: 1 - 250	250 suppliers for indicators of potential supply chain disruptions. *Required	
SW10230	suppliers	(must select 1 of the 4 Suppliers Under Management tiers with the purchase	
		of a Subscription License). 12 months.	
		Monitoring & Alerting dashboard continuously monitoring & alerting on 251	
CMOSOO	Tier 2: 251 - 500	to 500 suppliers for indicators of potential supply chain disruptions.	
SM0500	suppliers	*Required (must select 1 of the 4 Suppliers Under Management tiers with the	
		purchase of a Subscription License). 12 months.	

		Monitoring & Alerting dashboard continuously monitoring & alerting on 501	
SMh1000	Tier 3: 501 - 1000	to 1000 suppliers for indicators of potential supply chain disruptions.	
SMIIIOO	suppliers	*Required (must select 1 of the 4 Suppliers Under Management tiers with the	
		purchase of a Subscription License). 12 months.	
		Monitoring & Alerting dashboard continuously monitoring & alerting on	
SM2000	Tier 4: 1001 - 2000	1001 to 2000 suppliers for indicators of potential supply chain disruptions.	
	suppliers	*Required (must select 1 of the 4 Suppliers Under Management tiers with the	
		purchase of a Subscription License). 12 months.	

5. Supplier Analysis Report

Part No.	Product Name	Description		
SAR00T1	Supplier analysis to generate report that includes data within the categories: Financial, Foreign Ownership Control or Influence (1971) Tier 1 Political and Regulatory, Compliance, Technology and Cyberser Manufacturing and Supply, Transportation and Distribution, Pro Quality/Design.			
SAR00T2	Tier 2	Supplier analysis to generate report that includes data within the following categories: Financial, Foreign Ownership Control or Influence (FOCI), Political and Regulatory, Compliance, Technology and Cybersecurity, Manufacturing and Supply, Transportation and Distribution, Product Quality/Design, Adverse Media, Legal Activity, Merger & Acquisition Activity, Foreign Joint Venture & Research Efforts, Domestic & Foreign Supply Chain Partners.		

The Supplier Analysis Reports are an optional component to the solution. The setup & training, subscription license, dashboard user access, supplier under management, along with Deloitte Consulting professional services are required components of the solution and must be purchased together. The Deloitte Consulting professional services are those that are available in Section 4.0.

Invoicing of the Subscription license, Dashboard User Access, and Suppliers under management will be done monthly in arrears over a 12-month period.

SECTION 6.0 – GSA IT CATEGORY INFRASTRUCTURE TERMS AND CONDITIONS

SIN 54151ECOM Supplemental Terms and Conditions – Deloitte Consulting CentralSight™.

The Ordering Activity's use of the Licensed Software is subject to the license terms and conditions of Deloitte Consulting's Subscription License Agreement, which shall supersede all other terms and conditions, and which must be incorporated into any resulting contract award.

SECTION 7.0 BLANKET PURCHASE AGREEMENT

Ordering activities may establish BPAs under any schedule contract to fill repetitive needs for supplies or services. BPAs may be established with one or more schedule contractors. The number of BPAs to be established is within the discretion of the ordering activity establishing the BPAs and should be based on a strategy that is expected to maximize the effectiveness of the BPA(s). In determining how many BPAs to establish, consider:

- The scope and complexity of the requirement(s);
- The need to periodically compare multiple technical approaches or prices;
- The administrative costs of BPAs; and
- The technical qualifications of the schedule contractor(s).

Establishment of a single BPA, or multiple BPAs, shall be made using the same procedures outlined in 8.405-1 or 8.405-2. BPAs shall address the frequency of ordering, invoicing, discounts, requirements (e.g. estimated quantities, work to be performed), delivery locations, and time.

When establishing multiple BPAs, the ordering activity shall specify the procedures for placing orders under the BPAs.

Establishment of a multi-agency BPA against a Federal Supply Schedule contract is permitted if the multi-agency BPA identifies the participating agencies and their estimated requirements at the time the BPA is established.

Ordering from BPAs:

Single BPA. If the ordering activity establishes one BPA, authorized users may place the order directly under the established BPA when the need for the supply or service arises.

Multiple BPAs. If the ordering activity establishes multiple BPAs, before placing an order exceeding the micro-purchase threshold, the ordering activity shall:

- Forward the requirement, or statement of work and the evaluation criteria, to an appropriate number of BPA holders, as established in the BPA ordering procedures; and
- Evaluate the responses received, make a best value determination (see 8.404(d)), and place the order with the BPA holder that represents the best value.

BPAs for hourly rate services. If the BPA is for hourly rate services, the ordering activity shall develop a statement of work for requirements covered by the BPA. All orders under the BPA shall specify a price for the performance of the tasks identified in the statement of work.

Duration of BPAs. BPAs generally should not exceed five years in length, but may do so to meet program requirements. Contractors may be awarded BPAs that extend beyond the current term of their GSA Schedule contract, so long as there are option periods in their GSA Schedule contract that, if exercised, will cover the BPA's period of performance.

Review of BPAs:

The ordering activity that established the BPA shall review it at least once a year to determine whether:

- The schedule contract, upon which the BPA was established, is still in effect;
- The BPA still represents the best value (see 8.404(d)); and
- Estimated quantities/amounts have been exceeded and additional price reductions can be obtained.

The ordering activity shall document the results of its review.

SECTION 8.0 USA COMMITMENT TO PROMOTE SMALL BUSINESS PARTICIPATION PROCUREMENT PROGRAMS

Preamble

Deloitte Consulting LLP provides commercial products and services to ordering activities. We are committed to promoting participation of small, small disadvantaged and women-owned small businesses in our contracts. We pledge to provide opportunities to the small business community through reselling opportunities, mentor-protégé programs, joint ventures, teaming arrangements, and subcontracting.

Commitment

To actively seek and partner with small businesses.

To identify, qualify, mentor and develop small, small disadvantaged and women-owned small businesses by purchasing from these businesses whenever practical.

To develop and promote company policy initiatives that demonstrates our support for awarding contracts and subcontracts to small business concerns.

To undertake significant efforts to determine the potential of small, small disadvantaged and women-owned small business who will supply products and services to our company.

To ensure procurement opportunities are designed to permit the maximum possible participation of small, small disadvantaged and women-owned small businesses.

To attend business opportunity workshops, minority business enterprise seminars, trade fairs, procurement conferences, etc., that will seek to identify and increase small businesses with whom to partner.

To publicize in our marketing publications our interest in meeting small businesses that may be interested in subcontracting opportunities.

We signify our commitment to work in partnership with small, small disadvantaged and women-owned small businesses to promote and increase their participation in ordering activity contracts. To accelerate potential opportunities please contact: Victoria Vo at vicvo@deloitte.com.
