SECTION 2.0 FIRM OVERVIEW

Deloitte Consulting LLP (“Deloitte Consulting”) is one of the world’s leading business consulting firms, providing services to transform strategy, processes, information technology, and people. With recognized industry knowledge and experience, Deloitte Consulting helps clients create, defend and/or reinvent their business and economic models by guiding them through the complexity of the digital economy.

Deloitte Consulting is a part of Deloitte Touche Tohmatsu, one of the world’s leading professional services firms, delivering world-class assurance and advisory, tax, and consulting services. Serving nearly one-fifth of the world’s largest companies as well as large national enterprises, public institutions, and successful fast-growing companies, our internationally experienced professionals deliver seamless, consistent services wherever our clients operate. Our mission is to help our clients and our people excel.

A very different approach, for very different results.

Deloitte Consulting has built a reputation as a client-oriented consulting firm with deep technical knowledge. Our most basic client service instincts are to team with our clients to create a shared commitment to success.

Our proactive, collegial approach to client relationships facilitates a continual understanding of our clients’ expectations. We believe that establishing such a relationship is essential to the successful and timely completion of project activities, promotion of client understanding and ownership of projects, and facilitation of a smooth transition into implementation and development efforts. By combining the objectivity, knowledge, experience, and creativity of both our clients and our consultants, we achieve better, more sustainable results.

Working with clients to create a shared sense of ownership for an engagement’s outcome helps to increase realized benefits. We encourage client representatives to serve on project teams as full-time, equal members and to personally take part in defining why the organization needs to change, what needs to change, and how to best achieve the change.

It is the combination of our collaborative relationships with clients and our programmatic and technical experience that give our clients a true advantage because:

- Clients are an integral part of our consulting projects—helping to ensure the effective transfer of knowledge and realization of the recommendations.

- We work with management and project sponsors to help them plan the implementation of their decisions.

- We focus on both the cultural and technical aspects of projects, recognizing that managing change is critical to successful implementation.

SECTION 3.0 GSA MAS SIN DESCRIPTIONS

1. **SIN 541330ENG, 541330ENG(RC) - Engineering Services**

Services include applying physical laws and principles of engineering in the design, development, and utilization of machines, materials, instruments, processes, and systems. Services may involve any of the following activities: provision of advice, concept development, requirements analysis, preparation of feasibility studies, preparation of preliminary and final plans and designs, provision of technical services during the construction or installation phase, inspection and evaluation of engineering projects, and related services.

NOTE: Services under this SIN cannot include architect-engineer services as defined in the Brooks Act and FAR Part 2, or construction services as defined in FAR Parts 2 and 36.

2. **SIN 541620, 541620(RC) – Environmental Consulting Services**

Services include providing advice and assistance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, and hazardous materials; Endangered species, wetland, watershed, and other natural resource management plans; Archeological and/or cultural resource management plans. This includes identifying problems (e.g., inspect buildings for hazardous materials), measure and evaluate risks, and recommend solutions. Multi-disciplined staff of scientists, engineers, and other technicians with expertise in areas, such as air and water quality, asbestos contamination, remediation, ecological restoration, and environmental law such as Planning and Documentation Services for the development, planning, facilitation, coordination, and documentation of and/or for environmental initiatives (or mandates such as Executive Order 13693 in areas of chemical, radiological, and/or hazardous materials; ISO 14001 Environmental Management System (EMS) and sustainable performance measure development; Environmental Assessment (EA) and Environmental Impact Statement (EIS) preparation under the National Environmental Policy Act (NEPA).

3. **SIN 541715, 541715(RC) - Engineering Research and Development and Strategic Planning**

Services include conducting research and experimental development (except nanotechnology and biotechnology research and experimental development) in the physical, engineering and life sciences such as; such as agriculture, electronics, environmental, biology, botany, computers, chemistry, food, fisheries, forests, geology, health, mathematics, medicine, oceanography, pharmacy, physics, veterinary and other allied subjects.

Typical tasks include, but are not limited to, analysis of mission, program goals and objectives, program evaluations, analysis of program effectiveness, requirements analysis, organizational performance assessment, special studies and analysis, training, and consulting; requirements analysis, cost/cost performance trade-off analysis, feasibility analysis, developing and completing fire safety evaluation worksheets as they relate to professional engineering services; operation and maintenance, evaluation of inspection, testing, and maintenance program for fire protection and life safety systems, program/project management, technology transfer/insertion, training and consulting.

NOTE: Services under this NAICs cannot include architect-engineer services as defined in the Brooks Act and FAR Part 2 or construction services as defined in the Federal Acquisition Regulation Part 36 and Part 2.

4. **SIN 541380, 541380(RC) – Testing Laboratory Services**

Includes testing laboratory services and veterinary, natural, and life sciences; testing services and laboratories; and other professional, scientific, and technical consulting services.

Testing and services include, but are not limited to: physical, chemical, analytical, or other testing services; quality assurance; fire safety inspections; training; safety audits; relying upon experimental, empirical, quantifiable data, relying on the scientific method, and professional services, tasks, and labor categories in the fields of biology, chemistry, physics, earth sciences, atmospheric science, oceanography, materials sciences, mathematics, geology, astronomy, veterinary medicine, statistics, systems science, etc., (excludes social and behavioral sciences).

Examples of labor categories include, but are not limited to, Scientific Researchers, Biologists, Physicists, Mathematicians, Statisticians, Research Engineers, Meteorologists, Lab Technicians, Veterinarians and Veterinary Services, Chemists, Biochemical Engineers, Research Nurses.

5. SIN 522310, 522310(RC) - Financial Advising, Loan Servicing and Asset Management Services
Services include assisting agencies on cross-cutting issues, asset marketability, equity monitoring, originations, and addressing any other considerations regarding the acquisition, management and/or resolution of an asset; assisting agencies in servicing, monitoring and maintaining loan assets such as establishing loan database, remittance processing, processing loan cancellations and consolidations, billing services, and servicing troubled loans which may include borrower negotiations, restructuring, foreclosure and supervision of the sale of the collateral and workout agreements.

6. SIN 541219, 541219(RC) - Budget and Financial Management Services
Services include accounting, budgeting, and complementary financial services such as: transaction analysis, transaction processing, data analysis and summarization, technical assistance in devising new or revised accounting policies and procedures, classifying accounting transactions, special studies to improve accounting operations, assessment and improvement of budget formulation and execution processes, special reviews to resolve budget formulation or budget execution issues, and technical assistance to improve budget preparation or execution processes.

7. SIN 541611, 541611(RC) - Management and Financial Consulting, Acquisition and Grants Management Support, and Business Program and Project Management Services
Provide operating advice and assistance on administrative and management issues. Examples include: strategic and organizational planning, business process improvement, acquisition and grants management support, facilitation, surveys, assessment and improvement of financial management systems, financial reporting and analysis, due diligence in validating an agency's portfolio of assets and related support services, strategic financial planning, financial policy formulation and development, special cost studies, actuarial services, economic and regulatory analysis, benchmarking and program metrics, and business program and project management.

Inherently Governmental services as identified in FAR 7.503 or by the ordering agency are prohibited. It is the responsibility of the Contracting Officer placing the order to make this determination. Ordering activities must require prospective contractors to identify potential conflicts of interest and address those, prior to task order award.

Personal services as defined in FAR 37.104 are prohibited.

monitor the operations and performance of the partnership through review of the general partner's business plans, financial reports and projections to protect against reduction in value or mismanagement of assets; Investor reporting: Use various financial indicators to provide a detailed reporting package for each transaction representing the current financial status and performance of a portfolio.

8. SIN 541810, 54180(RC) - Advertising Services
Services provided under this SIN will promote public awareness of an agency's mission and initiatives, enable public understanding of complex technical and social issues, disseminate information to industry and consumer advocacy groups and engage in recruitment campaigns.
Services include, but are not limited to the following components: advertising objective determination, message decision / creation, media selection, outdoor marketing and media services, broadcast media (radio, TV, internet and public service announcements), direct mail services, media planning, media placement services, advertising evaluation, related activities to advertising services.

NOTE: Any commissions received for advertising agencies will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

9. SIN 541820, 541820(RC) - Public Relations Services
Services provided include providing customized media and public relation services such as the development of media messages and strategies; providing recommended of media sources for placement of campaigns; preparing media materials such as, background materials, press releases, speeches and presentations and press kits; executing media programs, conducting press conferences, scheduling broadcast and/or print interviews, media alerts and press clipping services related activities to public relations services.

NOTE: Any commissions received for media placement, conference planning, etc. will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

10. SIN 541511, 541511(RC) Web Based Marketing

Services include, but are not limited to writing, modifying, testing, and supporting software to meet the needs of a particular customer. This can include website design and maintenance services, search engine development, email marketing, interactive marketing, web based advertising (including marketing and social media outlets), webcasting, video conferencing via the web, section 508 compliance, including captioning services, online media management; and related activities to web based services.

Media will be provided in a format that is compatible with the ordering agency's software requirements. Continual website updates and maintenance may also be required.

NOTE: Any commissions received for media placement, conference planning, etc. will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

11. SIN 541910, 541910(RC) - Marketing Research and Analysis

Services include customizing strategic marketing plans, branding initiatives, creating public awareness of products, services, and issues; targeting market identification and analysis, establishing measurable marketing objectives; determining market trends and conditions, identifying and implementing appropriate strategies, conducting focus groups, telemarketing, individual interviews, preparing/distributing surveys, and compiling/analyzing results, establishing call centers (in relation to services provided under this schedule).

NOTE: Any commissions received for media placement, conference planning, etc. will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

12. SIN 512110, 512110(RC) - Video/Film Production

Services include writing, directing, shooting, arranging for talent / animation, narration, music and sound effects, duplication, distribution, video scoring; and editing.

Videotape and film production services will be provided to inform the public and Government agencies about the latest products, services, and/or issues in various outputs such as: industry standard formats, accessibility and video streaming development. Filming in studios, on location, live shows or events may also be required.

NOTE: Any commissions received for media placement will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

13. SIN 541850, 541850(RC) - Exhibit Design and Advertising Services

Services include conceptualizing, designing and producing exhibits and their accompanying materials, providing and/or making recommendations for carpet and padding installation for exhibit property; preview, set-up and dismantling of exhibit property, cleaning, prepping and storing exhibit property for future use, shipping exhibit property to and from designated site(s); and media illumination services

NOTE: Any commissions received for media placement, conference planning, etc. will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

14. SIN 541613, 541613(RC) - Marketing Consulting Services

Services include providing operating advice and assistance on marketing issues, such as developing marketing objectives and policies, sales forecasting, marketing planning and strategy, and development of multi-media campaigns. Services relating to providing assistance with challenges, contests, and competitions, such as providing marketing and advertising support, assistance with conducting the challenge / contest / competition, facilitating events; and supporting the judging of events are included. The challenge / contest / competition may be to identify a solution to a particular problem or to accomplish a particular goal. Prizes or other incentives may be offered by customers to find innovative or cost-effective solutions to improving open government. Solutions may be ideas, designs, proofs of concept or finished products. SIN 541810ODC must be used in conjunction with the payment for prizes or other incentives.

NOTE: Any commissions received for media placement, conference planning, etc. will either (a) be returned to the ordering agency or (b) applied as a credit to the cost of the project, whichever the ordering agency prefers.

15. SIN 541420, 541420(RC) - Engineering System Design and Integration Services

Services include creating and developing designs and specifications that optimize the use, value, and appearance of their products. These services can include determination of the materials, construction, mechanisms, shape, color, and surface finishes of the product, taking into consideration human characteristics and needs, safety, market appeal, and efficiency in production, distribution, use, and maintenance.

Associated tasks include, but are not limited to computer-aided design, e.g. CADD, risk reduction strategies and recommendations to mitigate identified risk conditions, fire modeling, performance-based design reviews, high level detailed specification and scope preparation, configuration, management and document control, fabrication, assembly and simulation, modeling, training, consulting, analysis of single or multi spacecraft missions and mission design analysis.

NOTE: Services under this NAICs can not include architect-engineer services as defined in the Brooks Act and FAR Part 2 or construction services as defined in the Federal Acquisition Regulation Part 36 and Part 2.

An implementation guide for Space launch Integration Services (SLIS) can be found at www.gsa.gov/psschedule - click on "Professional Engineering Solutions".

16. SIN 611430, 611430(RC) – Professional and Management

Services include offering an array of short duration courses and seminars for management and professional development. Training for career development may be provided directly to individuals or through employers' training programs, and courses may be customized or modified to meet the special needs of customers. Instruction may be provided in diverse settings, such as the establishment's or agency's training facilities, and through diverse means, such as correspondence, television, the Internet, or other electronic and distance-learning methods. The training provided may include the use of simulators and simulation methods.

Examples include Training Services that are instructor led Training or Web Based Training of Education Courses, Course Development and Test Administration, Learning Management, and Internships; Environmental Training Services in order to meet Federal mandates and Executive Orders; training of agency personnel to deal with media and media responses; Logistics Training Services related to system operations, automated tools for supply and value chain management, property and inventory management, distribution and transportation management, and maintenance of equipment and facilities; Audit & Financial training services related to course development and instruction required to support audit, review, financial assessment and financial management activities.

Any firm offering Defense Acquisition Workforce Improvement Act (DAWIA) and Federal Acquisition Certification in Contracting (FAC-C) Training for Acquisition Workforce Personnel will include an identify only DAWIA and FAC-C courses that have been deemed DAU equivalent or approved by the Federal Acquisition Institute (FAI).

NOTE: In accordance with OMB Policy Letter 05-01, civilian agencies must follow the course equivalency determinations accepted by the Defense Acquisition University (DAU) to ensure that core training is comparable across the workforce and qualifies for certification. When procuring FAC-C and DAWIA training for the audience identified below, the task order level Contracting Officer shall confirm that the courses being acquired are listed on one of the following websites: <https://www.fai.gov/drupal/certification/verified-contracting-course-vendor-listing> OR <http://icatalog.dau.mil/appg.aspx> (click on commercial vendors). Training Audience-Acquisition professionals interested in completing FAC-C or DAWIA.

17. SIN 541614SVC, 541614SVC(RC) - Supply and Value Chain Management

Includes supply and value chain management, which involves all phases of the planning, acquisition, and management of logistics systems.

18. SIN 541614, 541614(RC) - Deployment, Distribution and Transportation Logistics Services

and Thumb Drive. Training services include traditional coursework in all academic disciplines, web-based or classroom; conducting leadership training workshops and seminars not provided via traditional management training curricula available elsewhere and conducting Speakers Bureau services and Leadership assessment surveys. A.3.3 Learning Management services.

34. SIN OLM, OLM(RC) - Order-Level Materials (OLM)

OLMs are supplies and/or services acquired in direct support of an individual task or delivery order placed against a Schedule contract or BPA. OLM pricing is not established at the Schedule contract or BPA level, but at the order level. Since OLMs are identified and acquired at the order level, the ordering contracting officer (OCO) is responsible for making a fair and reasonable price determination for all OLMs.

OLMs are procured under a special ordering procedure that simplifies the process for acquiring supplies and services necessary to support individual task or delivery orders placed against a Schedule contract or BPA. Using this new procedure, ancillary supplies and services not known at the time of the Schedule award may be included and priced at the order level.

OLM SIN-Level Requirements/Ordering Instructions:

OLMs are:

- Purchased under the authority of the FSS Program
- Unknown until an order is placed
- Defined and priced at the ordering activity level in accordance with GSAR clause 552.238-115 Special Ordering Procedures for the Acquisition of Order-Level Materials. (Price analysis for OLMs is not conducted when awarding the FSS contract or FSS BPA; therefore, GSAR 538.270 and 538.271 do not apply to OLMs)
- Only authorized for use in direct support of another awarded SIN
- Only authorized for inclusion at the order level under a Time-and-Materials (T&M) or Labor-Hour (LH) Contract Line Item Number (CLIN)
- Subject to a Not-To-Exceed (NTE) ceiling price

OLMs are not:

- Open Market Items
- Items awarded under ancillary supplies/services or other direct cost (ODC) SINs (these items are defined, priced, and awarded at the FSS contract level).

LABOR CATEGORY	EXPERIENCE	EDUCATION
Engagement Execution Executive II	Minimum of 14 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience.
Engagement Execution Executive I	Minimum of 13 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience.

Labor Category Skills and Expertise

An Engagement Execution Executive provides guidance and direction for implementing and managing client service delivery and operations execution by:

- Leading engagement planning, to include the delivery of the engagement vision and mission, work plans, staffing, and financials
- Provides deep expertise and knowledge to drive the implementation of client solutions
- Directs the development and implementation of communication and training plans
- Selecting the most relevant tools/techniques to meet specific client requirements and mitigate risks
- Developing practical solutions and methodologies using quality standards and industry practices
- Defining and guiding the overall goals of the engagement to the staff
- Acting as SME on complex client issues
- Investigating issues / problems using analysis, experience, and best judgment to address implementation challenges
- Coordinating all parties to tasks, reviews work products for completeness and adherence to customer requirements
- Assuring completion of projects within estimated time frames and budget constraint
- As Engagement Execution Executive provides competent project guidance and direction for business processes across engineering, financial, marketing, program management and supply chain logistics services fields

Engagement Execution Advisor II	Minimum of 14 years of consulting and/or directly relevant industry experience.	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Engagement Execution Advisor I	Minimum of 12 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience

Labor Category Skills and Expertise

An Engagement Execution Advisor provides guidance and direction for implementing and managing client service delivery and operations execution by:

- Providing expert advice on the overall engagement's vision and delivery
- Offering professional direction on the client's implementation/execution schedule utilizing the most efficient tools/techniques based on industry standards
- Outlining the engagement objectives/goals/schedule to the staff performing the tasks
- Assuring that projects are completed on time and within budget constraints
- Anticipating and deciphering implementation challenges based on previous experience
- Reviewing work products for completeness and adherence to the engagement's objectives
- Providing expert advice to the client and the delivering staff based on experience and industry best practices
- An Engagement Execution Advisor provides competent project guidance and direction for business processes across engineering, financial, marketing, program management and supply chain logistics services fields

Engagement Execution Lead IV	Minimum of 10 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Engagement Execution Lead III	Minimum of 9 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience

Engagement Execution Lead II	Minimum of 8 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
-------------------------------------	-------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------

Labor Category Skills and Expertise

An Engagement Execution Lead provides guidance and direction for implementing and managing client service delivery and operations execution by:

- Taking ownership and accountability of the client's tasks and/or project workstreams
- Identifying key drivers of a defined problem and proposing solutions using analysis, experience, and independent judgment and selecting the most relevant tools/techniques
- Contributing to the engagement's work plans and coordinating activities between work streams/teams and changes in scope
- Understanding the client's risk, business objectives, and quality goals
- Implementing solutions to client problems and validating solutions with subject matter experts
- Reviewing work of others for quality and accuracy
- Guiding more junior professionals

Solution Architect II	Minimum of 11 years of consulting and/or directly relevant industry experience.	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Solution Architect I	Minimum of 9 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience

Labor Category Skills and Expertise

A Solution Architect provides subject matter expertise and direction for implementing and managing client service delivery and operations execution by:

- Guiding the team with strong technical expertise to complete tasks and meet the deliverables
- Performing analysis and diagnosing client issues and proposing solutions
- Selecting the most relevant tools/techniques to meet specific client requirements
- Communicating the risks and business objectives with the client

Project Execution Lead IV	Minimum of 7 years of consulting and/or directly relevant industry experience.	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Project Execution Lead III	Minimum of 6 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Project Execution Lead II	Minimum of 5 years of consulting and/or directly relevant industry experience.	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Project Execution Lead I	Minimum of 4 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience

Labor Category Skills and Expertise

The Project Execution Lead provides guidance and direction for implementing and managing client service delivery and operations execution by:

- Leading project planning, to include the project vision and mission, work plans, staffing, financials and risks
- Recommending options or solutions that meet a client's needs and desired functionality
- Implementing operational systems, processes, and policies
- Planning and defining the deliverable structure and content across multiple technologies
- Selecting the most relevant tools/techniques to meet specific client requirements
- Implementing practical solutions and methodologies
- Applying quality standards to work products
- Developing innovation and efficiency in order to increase performance

- Investigating problems using analysis, experience, and judgment

Project Execution Sr. Specialist IV	Minimum of 5 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Project Execution Sr. Specialist III	Minimum of 4 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Project Execution Sr. Specialist II	Minimum of 3 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Project Execution Sr. Specialist I	Minimum of 2 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience

Labor Category Skills and Expertise

The Project Execution Sr. Specialist provides guidance and direction for implementing and managing client service delivery and operations execution by:

- Implementing operational systems, processes, and policies
- Planning and defining the deliverable structure and content across multiple technologies
- Selecting the most relevant tools/techniques to meet specific client requirements
- Implementing practical solutions and methodologies
- Applying quality standards to work products
- Developing innovation and efficiency in order to increase performance
- Investigating problems using analysis, experience, and judgment

Architect II	Minimum of 5 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Architect I	Minimum of 3 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience

Labor Category Skills and Expertise

An Architect provides subject matter expertise and supports the delivery and operations execution by:

- Performing analysis and diagnosing client issues
- Using pre-established practices/tools and techniques to support project deliverables

Project Execution Specialist IV	Minimum of 3 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Project Execution Specialist III	Minimum of 2 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Project Execution Specialist II	Minimum of 2 years of consulting and/or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field or has equivalent work experience
Project Execution Specialist I	Minimum of 1 year of consulting and/or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field or has equivalent work experience

Labor Category Skills and Expertise

The Project Execution Specialist provides support for implementing and managing client service delivery and operations execution by:

- Implementing practical solutions and methodologies
- Applying quality standards to work products
- Developing innovation and efficiency in order to increase performance
- Investigating problems using analysis, experience, and judgment

Project Execution Support IV	Minimum of 2 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Project Execution Support III	Minimum of 1 year of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field or has equivalent work experience
Project Execution Support II	Minimum 2 years consulting and/or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field or has equivalent work experience
Project Execution Support I	Minimum 1 year consulting and/or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field or has equivalent work experience

Labor Category Skills and Expertise

The Project Execution Support provides support for implementing and managing client service delivery and operations execution by:

- Implementing practical solutions and methodologies
- Applying quality standards to work products

Project Execution Associate III	Minimum of 1 year of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------	------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Provides support for implementing and managing client service delivery and operations execution
- Serves as a project resource on engagement teams
- Supports planning and project management for tasks
- Implements practical and innovative solutions and methodologies to meet project objectives and complete program management activities
- Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation

Project Execution Associate II	Minimum of 0 year of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------	------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Provides support for implementing and managing client service delivery and operations execution
- Serves as a project resource on engagement teams
- Supports planning and project management for tasks
- Implements practical and innovative solutions and methodologies to meet project objectives and complete program management activities
- Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation

Project Execution Associate I	Minimum of 2 years of consulting and/or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
--------------------------------------	-------------------------------------------------------------------------------	--------------------------------------------------------------

- Provides support for implementing and managing client service delivery and operations execution
- Serves as a project resource on engagement teams
- Supports planning and project management for tasks
- Implements practical and innovative solutions and methodologies to meet project objectives and complete program management activities
- Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation

Project Execution Administration III	Minimum of 2 years of consulting and/or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
---------------------------------------------	-------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Provides support for implementing and managing client service delivery and operations execution
- Serves as an administrative resource on engagement teams
- Supports with planning and project management for engagement tasks
- Implements practical solutions and methodologies
- Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation

Project Execution Administration II	Minimum of 1 year of consulting and/or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
--------------------------------------------	------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Provides support for implementing and managing client service delivery and operations execution
- Serves as an administrative resource on engagement teams
- Supports with planning and project management for engagement tasks
- Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation

Project Execution Administration I	Minimum of 0 year of consulting and/or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
-------------------------------------------	------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Provides support for implementing and managing client service delivery and operations execution
- Serves as an administrative resource on engagement teams
- Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation

ENVIRONMENTAL CONSULTING SERVICES ADVISORY & EXECUTION SERVICES LABOR CATEGORIES

Professional Services: Environmental Consulting Services

- Other responsibilities include developing environmental task plans and understanding best practice frameworks, and key performance metrics
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks

Environmental Business Advisory Sr Support II	Minimum of 1 year consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------------	---------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Provides advisory support to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Proficient in data analysis and defining business needs, applying methodologies, and development of project deliverables
- Experienced with data analysis

Responsibilities:

- Obtains data and develops environmental reports for presentations and client meetings
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks
- Applies quality standards to environmental work products
- Reviews and evaluates environmental work plans
- Completes assigned environmental tasks with no oversight
- Coordinates environmental training requirements

Environmental Business Advisory Sr Support I	Minimum of 0 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Provides advisory support to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Proficient in data analysis and defining business needs, applying methodologies, and development of project deliverables
- Experienced with data analysis

Responsibilities:

- Obtains data and develops environmental reports for presentations and client meetings
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks

- Applies quality standards to environmental work products
- Completes assigned environmental tasks with no oversight

Environmental Business Advisory Jr Support II	Minimum of 0 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Provides advisory support to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Experienced in oral and written communication, and specific tools such as Microsoft Office products, and Tableau
- Experienced with data analysis

Responsibilities:

- Completes assigned environmental tasks with minimal oversight
- Contributes to obtaining environmental data and reports for presentations and client meetings
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks
- Collects data, undertakes analysis, and helps identify environmental issues
- Other responsibilities include developing environmental task plans and understanding best practice frameworks, and key performance metrics

Environmental Business Advisory Jr Support I	Minimum of 1 year consulting and/or directly relevant industry experience	Minimum Associate's Degree or equivalent in a related field
-----------------------------------------------------	---------------------------------------------------------------------------	-------------------------------------------------------------

Skills & Expertise:

- Provides advisory support to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Experienced in oral and written communication, and specific tools such as Microsoft Office products, and Tableau
- Experienced with data analysis

Responsibilities:

- Completes assigned environmental tasks with minimal oversight
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks
- Contributes to presentations and client meetings
- Collects data, undertakes analysis, and helps identify environmental issues
- Other responsibilities include developing environmental task plans and understanding best practice frameworks, and key performance metrics

Environmental Program Execution Executive II	Minimum 12 years consulting and/or directly relevant industry experience	Minimum Master's Degree or equivalent in a related field
-----------------------------------------------------	--------------------------------------------------------------------------	----------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance guidance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Experienced in fostering and managing the relationships between the client and engagement teams

Responsibilities:

- Provides expert advice, assistance, and guidance, and serves as an environmental consulting executive to the client, including but not limited to areas, such as air and water quality, asbestos contamination,

remediation, ecological restoration, and environmental law

- Maintains responsibility for formulating environmental work standards, creating strategic project objectives, and managing and advising client issues and feedback
- Develops standardized procedures needed to conduct environmental initiatives
- Implements practical and innovative solutions and methodologies to meet environmental project objectives and complete program management activities
- Leads integrated team of multi-disciplinary professionals, with multiple concurrent environmental deliverables and tasks
- Maintains responsibility for managing the environmental program team and daily operations of project development or serves in a role as a highly experienced environmental expert
- Applies quality standards to cultural resource environmental management work products

Environmental Program Execution Executive I	Minimum 10 years consulting and/or directly relevant industry experience	Minimum Master’s Degree or equivalent in a related field
----------------------------------------------------	--------------------------------------------------------------------------	----------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance guidance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Experienced in fostering and managing the relationships between the client and engagement teams

Responsibilities:

- Provides expert advice, assistance, guidance, and serves as an environmental consulting executive to the client, including but not limited to areas, such as air and water quality, asbestos contamination, remediation, ecological restoration, and environmental law
- Maintains responsibility for formulating environmental work standards, creating strategic project objectives, and managing and advising client issues and feedback
- Develops standardized procedures needed to conduct environmental initiatives
- Manages environmental tasks and groups of personnel on larger, more complex projects
- Implements practical and innovative solutions and methodologies to meet environmental project objectives and complete program management activities
- Maintains responsibility for managing the program team and daily operations of project development or serves in a role as a highly experienced environmental expert
- Applies quality standards to cultural resource environmental management work products
- Participates in organizational assessments, environmental workforce evaluations, and leads performance measures and indicators analyses

Environmental Program Execution Engineer SME	Minimum of 9 years consulting and/or directly relevant industry experience	Minimum Master’s Degree or equivalent in a related field
-----------------------------------------------------	----------------------------------------------------------------------------	----------------------------------------------------------

Skills & Expertise:

- Experienced in environmental engineering or a related discipline, intended to study the effect of technological advancements on the environment
- Experienced in guiding businesses and organizations in the implementation and operation of environmental engineering solutions relating to, but not limited to, control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management, cultural resource management, wastewater management, recycling, waste disposal, and human health
- Experienced in managing, supervising, and overseeing the implementation and execution of environmental engineering projects, such as construction, investigation, remediation, and other field activities

- Familiar with the tenets and methodologies for energy management, related disciplines, and laws governing and impacting energy management

Responsibilities:

- Leads the implementation and operation of environmental engineering solutions and related tasks including, but not limited to risk management, energy audits, analysis of alternate energy sources, building commissioning, and sustainable design implementation, strategic analyses, resource management, and cost and economic analyses
- Provides technical direction for problem definition, approach methodology, analysis of findings, and recommendations for complex environmental projects
- Coordinates, assigns, and reviews the effort of all environmental assignments
- Develops standardized procedures needed to conduct environmental initiatives
- Applies quality standards to cultural resource environmental management work products

Environmental Program Execution Scientist SME	Minimum of 9 years consulting and/or directly relevant industry experience	Minimum Master’s Degree or equivalent in a related field
------------------------------------------------------	----------------------------------------------------------------------------	----------------------------------------------------------

Skills & Expertise:

- Experienced in providing implementation and operations guidance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Experienced in managing, supervising, and overseeing projects relating to environmental sciences including, but not limited to technology evaluations, human health and ecological risk assessments, environmental sampling, surveys, and analyses, audits, and technical assessments.
- Familiar with providing scientific, engineering, and other technical support for the development, execution, and evaluation of environmental programs, projects, and systems
- Familiar with the tenets and methodologies for the environmental sciences and related disciplines including, but not limited to, physics, chemistry, ecology, biology, geography, geology, meteorology soil science, and hydrology

Responsibilities:

- Leads implementation and operation of environmental science solutions and related tasks including, but not limited to risk management, energy audits, analysis of alternate energy sources, building commissioning, and sustainable design implementation, strategic analyses, resource management, and cost and economic analyses
- Provides scientific, engineering, and other technical support for the development, execution, and evaluation of environmental programs, projects, and systems
- Coordinates, assigns, and reviews environmental resource work products of the technical staff
- Manages a variety of complex technical environmental tasks, to include review of policy and statutory requirements and strategic planning to formulate and develop scientific concepts
- Develops standardized procedures needed to conduct environmental science initiatives

Environmental Program Execution Lead IV	Minimum 9 years consulting and/or directly relevant industry experience	Minimum Master’s Degree or equivalent in a related field
------------------------------------------------	-------------------------------------------------------------------------	----------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance guidance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans

Responsibilities:

- Serves in the role of environmental program team leader over assigned environmental support areas, often

filling the position of project team lead, and instructing, directing, and monitoring the work of other environmental business staff or serves in a role of an experienced technical expert

- Provides environmental consulting program management support for all day-to-day environmental activities, including but not limited to areas, such as air and water quality, asbestos contamination, remediation, ecological restoration, and environmental law
- Applies quality standards to environmental work products
- Oversees the completion of environmental operational tasks within estimated time frames and budget constraints
- Assumes responsibility for project delivery and oversight of environmental projects
- Assumes regular interaction and communications with the Government Contracting Officer (CO) and delegated government representatives
- Reviews and implements final recommendations provided to the client

Environmental Program Execution Lead III	Minimum 8 years consulting and/or directly relevant industry experience	Minimum Master's Degree or equivalent in a related field
-------------------------------------------------	-------------------------------------------------------------------------	----------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance guidance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans

Responsibilities:

- Serves in the role of environmental program team leader over assigned environmental support areas, often filling the position of project team lead, and instructing, and directing on complex projects
- Provides environmental consulting program management support for all day-to-day environmental activities, including but not limited to areas, such as air and water quality, asbestos contamination, remediation, ecological restoration, and environmental law
- Applies quality standards to environmental work products
- Oversees the completion of environmental operational tasks within estimated time frames and budget constraints
- Assumes responsibility for project delivery and oversight of environmental projects
- Assumes regular interaction and communications with the Government Contracting Officer (CO) and delegated government representatives
- Reviews and implements final recommendations provided to the client

Environmental Program Execution Lead II	Minimum 7 years consulting and/or directly relevant industry experience	Minimum Master's Degree or equivalent in a related field
------------------------------------------------	-------------------------------------------------------------------------	----------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance guidance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans

Responsibilities:

- Serves in the role of environmental program team leader over assigned support areas, often filling the position of project team lead and instructing, and directing on complex projects
- Provides environmental consulting program management support for all day-to-day environmental activities, including but not limited to areas, such as air and water quality, asbestos contamination, remediation, ecological restoration, and environmental law
- Applies quality standards to environmental work products

- Oversees the completion of environmental operational tasks within estimated time frames and budget constraints
- Assumes responsibility for project delivery and oversight of environmental projects
- Assumes regular interaction and communications with the Government Contracting Officer (CO) and delegated government representatives

Environmental Program Execution Lead I	Minimum 6 years consulting and/or directly relevant industry experience	Minimum Master's Degree or equivalent in a related field
-----------------------------------------------	-------------------------------------------------------------------------	----------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance guidance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans

Responsibilities:

- Serves in the role of environmental program team leader over assigned support areas, often filling the position of project team lead and instructing, and directing on complex projects
- Provides environmental consulting program management support for all day-to-day environmental activities. Including but not limited to areas, such as air and water quality, asbestos contamination, remediation, ecological restoration, and environmental law
- Applies quality standards to environmental work products
- Oversees the completion of environmental operational tasks within estimated time frames and budget constraints
- Assumes responsibility for project delivery and oversight of environmental projects

Environmental Project Execution Sr Engineer	Minimum of 8 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in environmental engineering or a related discipline, intended to study the effect of technological advancements on the environment
- Experienced in guiding businesses and organizations in the implementation and operation of environmental engineering solutions relating to, but not limited to, control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management, cultural resource management, wastewater management, recycling, waste disposal, and human health
- Experienced in managing environmental engineering projects, supervising, and overseeing construction, investigation, remediation, and other field crews performing environmental engineering services

Responsibilities:

- Develops, designs, and implements large environmental projects
- Manages a variety of complex environmental projects to include, but not limited to, risk management, energy audits, analysis of alternate energy sources, building commissioning, and sustainable design implementation, strategic analyses, resource management, and cost and economic analyses
- Provides technical direction for problem definition, approach methodology, analysis of findings, and recommendations for complex environmental projects
- Coordinates, assigns, and reviews and applies quality standards to all environmental technical work products
- Prepares and conducts technical environmental project briefings

Environmental Project Execution Sr Scientist	Minimum of 8 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance assistance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Experience providing scientific, engineering, and other technical support for the development, execution, and evaluation of environmental programs, projects, and systems
- Familiar with the tenets and methodologies for the environmental sciences and related disciplines including, but not limited to, physics, chemistry, ecology, biology, geography, geology, meteorology soil science, and hydrology

Responsibilities:

- Provides scientific, engineering, and other technical support for the development, implementation, execution, and evaluation of environmental programs, projects, and systems
- Activities include but are not limited to reviewing technical documents and plans; performing technology evaluations; conducting geological and hydrogeological studies and modeling; reviewing sampling and analyses procedures and results; developing strategic and program management plans and guidance documents; supporting policy development; conducting audits and technical assessments; preparing and delivering training and facilitation/partnering services; and developing and maintaining information systems
- Acts as the responsible party for the quality standards and coordinates, assigns, and reviews all scientific work products, including but not limited to areas, such as air and water quality, asbestos contamination, remediation, ecological restoration, and environmental law
- Oversees the completion of environmental tasks within estimated time frames and budget constraints

Environmental Project Execution Lead III	Minimum of 8 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance assistance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Extensive experience in leading environmental projects, understanding business needs, formulating project definition, and isolating success factors

Responsibilities:

- Maintains the day-to-day interaction with the client, advising on keys to successful environmental project performance through performance reviews, assessment and analysis, design and development of solutions, monitoring budget allotments, and issue resolution
- Provides a communication channel between the client and the engagement team
- Delivers presentations to client on areas including, but not limited to, the status of natural resource management consulting and environmental work in progress, and problems encountered, and leads client meetings
- Implements practical and innovative solutions and methodologies to meet project objectives and complete environmental activities, including but not limited to areas, such as air and water quality, asbestos contamination, remediation, ecological restoration, and environmental law
- Able to perform environmental organizational assessments, program audits and evaluations, system(s) alignments, and process and productivity improvement evaluations
- Manages small environmental project teams

Environmental Project Execution Lead II	Minimum of 7 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance assistance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Extensive experience in leading environmental projects, understanding business needs, formulating project definition, and isolating success factors

Responsibilities:

- Maintains the day-to-day interaction with the client, advising on keys to successful project performance through performance reviews, assessment and analysis, design and development of solutions, monitoring budget allotments, and issue resolution
- Provides a communication channel between the client and the engagement team
- Implements practical and innovative solutions and methodologies to meet project objectives and complete environmental activities, including but not limited to areas, such as air and water quality, asbestos contamination, remediation, ecological restoration, and environmental law
- Gathers information for client meetings and presentations including, but not limited to, the status of natural resource management consulting and environmental work in progress, and problems encountered and recommended solutions
- Able to perform organizational assessments, program audits and evaluations, system(s) alignments, and process and productivity improvement evaluations
- Manages small environmental project teams

Environmental Project Execution Lead I	Minimum of 6 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance assistance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Extensive experience in leading environmental projects, understanding business needs, formulating project definition, and isolating success factors

Responsibilities:

- Maintains the day-to-day interaction with the client, advising on keys to successful project performance through performance reviews, assessment and analysis, design and development of solutions, monitoring budget allotments, and issue resolution
- Provides a communication channel between the client and the engagement team
- Gathers information for client meetings and presentations including, but not limited to, the status of natural resource management consulting and environmental work in progress, and problems encountered
- Manages project resources, budget activities, quality control practices, and project deliverables
- Able to perform organizational assessments, program audits and evaluations, system(s) alignments, and process and productivity improvement evaluations
- Manages small environmental project teams

Environmental Project Execution Jr Engineer	Minimum of 3 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in environmental engineering or a related discipline, intended to study the effect of technological advancements on the environment
- Experienced in supporting the implementation and operation of environmental engineering solutions relating to, but not limited to, control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management, cultural resource management, wastewater management, recycling, waste disposal, and human health
- Familiar with supervising and overseeing construction, investigation, remediation, and other field crews performing environmental engineering services

Responsibilities:

- Develops, designs, and implements small environmental projects
- Supports tasks related to complex environmental projects to include, but not limited to, risk management, energy audits, analysis of alternate energy sources, building commissioning, and sustainable design implementation, strategic analyses, resource management, and cost and economic analyses
- Applies quality standards and implements the use of new technology to all environmental technical work products
- Assist with the preparation of technical environmental project briefings

Environmental Project Execution Jr Scientist	Minimum of 3 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance assistance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Experience providing scientific, engineering, and other technical support for the development, implementation, execution, and evaluation of environmental programs, projects, and systems
- Familiar with the tenets and methodologies for the environmental sciences and related disciplines including, but not limited to, physics, chemistry, ecology, biology, geography, geology, meteorology soil science, and hydrology

Responsibilities:

- Activities include but are not limited to reviewing technical documents and plans; performing technology evaluations; conducting geological and hydrogeological studies and modeling; reviewing sampling and analyses procedures and results; developing strategic and program management plans and guidance documents; supporting policy development; conducting audits and technical assessments; preparing and delivering training and facilitation/partnering services; and developing and maintaining information systems
- Supports the implementation of project specific environmental scientific tasks
- Conducts research, and collects and distills data required for planning environmental scientific activities

Environmental Project Execution Jr Professional III	Minimum of 3 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance assistance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Familiar with client issues, leading teams, analyzing project data, and development of environmental related deliverables

Responsibilities:

- Demonstrates a wide range of environmental consulting experience and applies professional consulting concepts to manage problems, including but not limited to areas, such as air and water quality, asbestos contamination, remediation, and ecological restoration
- Supports and helps direct the completion of project specific environmental tasks
- Conducts research, and collects and distills data required for planning environmental activities; recommends applicable tools for implementation
- Actively engages consulting tools and methodologies to meet project objective and complete program management operations
- Supports organizational assessments and development of multiple environmental deliverables

Environmental Project Execution Jr Professional II	Minimum of 2 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance assistance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Familiar with client issues, leading teams, analyzing project data, and development of environmental related deliverables

Responsibilities:

- Demonstrates environmental consulting experience and applies professional consulting concepts to assist with projects, including but not limited to areas, such as air and water quality, asbestos contamination, remediation, and ecological restoration
- Completes assigned environmental tasks with no oversight
- Conducts research, collects, and distills data to affect environmental solutions to ensure client business needs are met
- Contributes to obtaining environmental data and reports for presentations and client meetings
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks

Environmental Project Execution Jr Professional I	Minimum of 1 year consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------------------------	---------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing consulting and implementation, operations, and maintenance assistance to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Familiar with client issues, leading teams, analyzing project data, and development of environmental related deliverables

Responsibilities:

- Demonstrates environmental consulting experience and applies professional consulting concepts to assist with projects, including but not limited to areas, such as air and water quality, asbestos

- contamination, remediation, and ecological restoration
- Completes assigned environmental tasks with no oversight
- Conducts research, collects, and distills data to affect environmental solutions to ensure client business needs are met
- Other responsibilities include developing environmental task plans and understanding best practice frameworks, and key performance metrics
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks

Environmental Project Execution Sr Support II	Minimum of 1 year consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------------	---------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Provides consulting and implementation, operations, and maintenance support to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Proficient in data analysis and defining business needs, applying methodologies, and development of project deliverables
- Experienced with data analysis

Responsibilities:

- Obtains data and develops environmental reports for presentations and client meetings
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks, including but not limited to areas, such as air and water quality, asbestos contamination, remediation, and ecological restoration
- Applies quality standards to environmental work products
- Reviews and evaluates environmental work plans
- Completes assigned environmental tasks with no oversight
- Coordinates environmental training requirements

Environmental Project Execution Sr Support I	Minimum of 0 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Provides consulting and implementation, operations, and maintenance support to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Proficient in data analysis and defining business needs, applying methodologies, and development of project deliverables
- Experienced with data analysis

Responsibilities:

- Obtains data and develops environmental reports for presentations and client meetings
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks
- Applies quality standards to environmental work products
- Completes assigned environmental tasks with no oversight

Environmental Project Execution Jr Support II	Minimum of 0 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Provides consulting and implementation, operations, and maintenance support to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Experienced in oral and written communication, and specific tools such as Microsoft Office products, and

Tableau

- Experienced with data analysis

Responsibilities:

- Completes assigned environmental tasks with minimal oversight
- Contributes to obtaining environmental data and reports for presentations and client meetings
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks
- Collects data, undertakes analysis, and helps identify environmental issues
- Other responsibilities include developing environmental task plans and understanding best practice frameworks, and key performance metrics

Environmental Project Execution Jr Support I	Minimum of 1 year consulting and/or directly relevant industry experience	Minimum Associate’s Degree or equivalent in a related field
---------------------------------------------------------	---------------------------------------------------------------------------	-------------------------------------------------------------

Skills & Expertise:

- Provides consulting and implementation, operations, and maintenance support to businesses and other organizations on environmental issues, such as the control of environmental contamination from pollutants, toxic substances, hazardous materials, natural resource management plans, and/or cultural resource management plans
- Experienced in oral and written communication, and specific tools such as Microsoft Office products, and Tableau
- Experienced with data analysis

Responsibilities:

- Completes assigned environmental tasks with minimal oversight
- Makes use of proprietary tools, methods, and processes in performing environmental project tasks
- Contributes to presentations and client meetings
- Collects data, undertakes analysis, and helps identify environmental issues
- Other responsibilities include developing environmental task plans and understanding best practice frameworks, and key performance metrics

IT AUTOMATED CONTACT CENTER SOLUTIONS (ACCS) LABOR CATEGORIES

Applicable to SINs: 561422, 561422(RC), 561422(STLOC)

Deloitte’s SIN 561422 ACCS rate card is comprised of three service lines [(1) Advisory, (2) Implementation and (3) Operate and Maintain] each with specific ACCS labor categories and ceiling prices.

LABOR CATEGORY	EXPERIENCE	EDUCATION
Contact Center Advisory Executive III	Minimum of 14 years of consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field

Skills & Expertise:

- Possesses expert knowledge of contact center business processes
- Supports critical business and operational areas to provide complete contact center life-cycle support (“cradle to grave”) to enable and achieve their missions to more effectively manage risk, schedule, cost, and scope; oversees projects based upon the Government specifications and standards
- Reviews the project plans, designs and business and systems analysis
- Provides advice and oversight through all phases of contact center projects from project design, procurement, and construction phase services to final completion
- Advises on the development and implementation of the contact center strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Provides quality assurance on Contract Center Engagement implementation plan
- Provides the primary strategy interface with client; collaborates in the definition, implementation, and execution or organization policies, practices, procedures, and attainment of operating goals
- Reviews and analyzes reports and directives to obtain data required for delivering presentations and leading client meetings
- Delivers presentations and leads strategic level client meetings

- Accountable for the completion of contact center activities within estimated time frames and budget constraints
- Leads teams providing all components of digital contact center services including, but not limited to, advise, implement, and operate services of people, process, and technology in the contact center industry
- Provides services in support of the digital multi-channel contact center solutions including but not limited to Artificial Intelligence (AI), Chat Bots, Robotic Process Automation, Interactive Voice Response (IVR), Voice/Speech Recognition, Text-to-Speech, Voicemail, Callback, Web Callback, Email Delivery, Hosted Online Ordering, Hosted Email Web Form, and Hosted FAQ Services

Contact Center Advisory Executive II	Minimum of 12 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------	--------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Possesses expert knowledge of contact center business processes
- Supports critical business and operational areas to provide complete contact center life-cycle support ("cradle to grave") to enable and achieve their missions to more effectively manage risk, schedule, cost, and scope; oversees projects based upon the Government specifications and standards
- Reviews the project plans, designs and business and systems analysis
- Provides advice and oversight through all phases of contact center projects from project design, procurement, and construction phase services to final completion
- Advises on the development and implementation of the contact center strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Provides quality assurance on contact center engagement delivery
- Provides the primary strategy interface with client; collaborates in the definition, implementation, and execution or organization policies, practices, procedures, and attainment of operating goals
- Reviews and analyzes reports and directives to obtain data required for delivering presentations and leading client meetings
- Delivers presentations and leads strategic level client meetings
- Accountable for the completion of contact center activities within estimated time frames and budget constraints
- Leads teams providing all components of digital contact center services including, but not limited to, advise, implement, and operate services of people, process, and technology in the contact center industry

Contact Center Advisory Executive I	Minimum of 10 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------	--------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Possesses expert knowledge of contact center business processes
- Supports critical business and operational areas to provide complete contact center life-cycle support ("cradle to grave") to enable and achieve their missions to more effectively manage risk, schedule, cost, and scope; oversees projects based upon the Government specifications and standards
- Reviews the project plans, designs and business and systems analysis
- Provides advice and oversight through all phases of contact center projects from project design, procurement, and construction phase services to final completion
- Coordinates the development and implementation of the contact center strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Provides quality assurance on contact center operation and maintenance
- Provides the primary strategy interface with client; collaborates in the definition, implementation, and execution or organization policies, practices, procedures, and attainment of operating goals
- Reviews and analyzes reports and directives to obtain data required for delivering presentations and leading client meetings
- Delivers presentations and leads strategic level client meetings
- Accountable for the completion of contact center activities within estimated time frames and budget constraints
- Leads teams providing all components of digital contact center services including, but not limited to, advise, implement, and operate services of people, process, and technology in the contact center industry

Contact Center Advisory Engagement Leader III	Minimum of 10 years of consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------------	--------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

A Contact Center Advisory Engagement Leader III has experience managing large projects or set of projects including, but not limited to:

- Providing guidance and direction on a day-to-day basis for the implementation of all contact center efforts
- Fostering and managing the relationships between the client and the contact center engagement team

Skills & Expertise

The Contact Center Operate and Maintain Support III:

- Answers inquiries from customers via telephone, email, Web chat, postal mail, and facsimile
- Diagnoses and resolves contact center needs to make solution determinations
- Provides customer with requested information or directs customer to appropriate resource
- Resolves contact center problems and conflicts, guiding agents through difficult calls/issues
- Documents inquiry details on web-based applications and assists in finding proper response
- Collects, analyzes, and summarizes contact center data trends to identify areas for process improvement
- Assists in training of new hires

Contact Center Operate and Maintain Support II	Minimum 2 years consulting and/or directly relevant industry experience	Minimum High School Degree or equivalent in a related field or has equivalent work experience. Bachelor's Degree or Technical Certificate preferred.
-------------------------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------

Skills & Expertise

The Contact Center Operate and Maintain Support II:

- Answers inquiries from customers via telephone, email, Web chat, postal mail, and facsimile
- Diagnoses and resolves contact center needs to make solution determinations
- Provides customer with requested information or directs customer to appropriate resource
- Resolves contact center problems and conflicts, guiding agents through difficult calls/issues
- Documents inquiry details on web-based applications and assists in finding proper response
- Collects, analyzes, and summarizes contact center data trends to identify areas for process improvement

Contact Center Operate and Maintain Support I	Minimum 1 year consulting and/or directly relevant industry experience	Minimum High School Degree or equivalent in a related field or has equivalent work experience. Bachelor's Degree or Technical Certificate preferred.
------------------------------------------------------	------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------

Skills & Expertise

The Contact Center Operate and Maintain Support I:

- Answers inquiries from customers via telephone, email, Web chat, postal mail, and facsimile
- Provides customer with requested information or directs customer to appropriate resource
- Documents inquiry details on web-based applications and assists in finding proper response
- Collects, analyzes, and summarizes contact center data trends to identify areas for process improvement

IT HIGHLY ADAPATIVE CYBERSECURITY SERVICES (HACS)

Applicable to SINs: 54151HACS, 54151HACS(STLOC), 54151HACS(RC)

Deloitte's SIN 54151HACS rate card is comprised of three service lines [(1) Advisory, (2) Implementation and (3) Operations] each with specific HACS labor categories and ceiling prices.

LABOR CATEGORY	YEARS OF EXPERIENCE	EDUCATION
Cybersecurity IT Advisory Executive III	Minimum of 15 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field

Skills & Expertise:

- Executive level management, direction on client engagements, cybersecurity information technology advisory expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies and advises on themes capable of being developed into new Cybersecurity strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and advising on multiple projects and team, and assisting clients in achieving desired program results
- Serves as a cyber information technology advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cybersecurity technology implementation plan
- Assumes accountability for supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory Executive II	Minimum of 13 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management, direction on client engagements, cybersecurity information technology advisory expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing

Cybersecurity IT Advisory Engagement Leader III	Minimum of 11 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology advisory expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Maintains responsibility for managing and advising the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and advises on Cybersecurity program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Delivers presentations and leads operational level client meetings
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory Engagement Leader II	Minimum of 9 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology advisory expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Manages and advises the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution

- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals
- Manages and advises on Cybersecurity program activities and is a key point of contact with client executives
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communications with the Contracting Officer’s Technical and delegated government representatives
- Manages technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Delivers presentations and assists with operational level client meetings
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory Engagement Leader I	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology advisory expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Manages and advises the program team and daily operations of project development or serves in a role as a highly experienced technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals
- Manages and advises on Cybersecurity program activities
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communications with the Contracting Officer’s Technical and delegated government representatives
- Provides assistance with managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Assists with presentations and operational level client meetings
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Solution Architect II	Minimum of 14 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
-----------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology advisory expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Maintains responsibility for managing and advising the program team and daily operations of project development or serves in a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals
- Manages and advises on Cybersecurity program activities and is a key point of contact with client executives
- Serves as a cybersecurity technology subject matter expert and assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer’s Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Solution Architect I	Minimum of 12 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology advisory expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Maintains responsibility for managing and advising the program team and daily operations of project development or serves in a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and advises on Cybersecurity program activities and is a point of contact with client executives
- Serves as a cybersecurity technology subject matter expert and assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory Project Lead III	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in cybersecurity advisory support, management and direction on client engagements, or extensive knowledge of and experience with system development and implementation
- Cybersecurity information technology expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides advice, guidance, and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project advisory team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and provides technical direction, experience, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory Project Lead II	Minimum of 6 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in cybersecurity advisory support, management and direction on client engagements, or extensive knowledge of and experience with system development and implementation
- Cybersecurity information technology expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides advice, guidance, and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs

- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project advisory team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions
- Communicates client expectations to project team, and provides technical direction
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory Project Lead I	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in cybersecurity advisory support, management and direction on client engagements, or extensive knowledge of and experience with system development and implementation
- Cybersecurity information technology expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides advice, and experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project advisory team leader over assigned support areas, and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical expert

- Provides assistance for process documentation and technical soundness
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Advisory Jr Professional I	Minimum of 0 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology advisory expertise, has programming experience in one or more languages, and is versed in system testing
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as a Cybersecurity IT resource on engagement team
- Contributes to obtaining data and reports for presentations and client meetings
- Assists project team in meeting program objectives timely and effectively
- Provides assistance for process documentation and technical soundness
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Executive III	Minimum of 15 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, direction on client engagements, cybersecurity information technology implementation expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed and implemented into new Cybersecurity strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating multiple projects and team, and assisting clients in achieving desired program results
- Serves as the client's cyber information technology implementation advisor to the client
- Directs the development and implementation of communication and training plans as it relates to cybersecurity information technology
- Is the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Executive II	Minimum of 13 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, direction on client engagements, cybersecurity information technology implementation expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed and implemented into new Cybersecurity strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating multiple projects and team, and assisting clients in achieving desired program results
- Serves as the client's cyber information technology implementation advisor to the client
- Directs the development and implementation of communication and training plans as it relates to cybersecurity information technology
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Executive I	Minimum of 10 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, direction on client engagements, cybersecurity information technology implementation expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed and implemented into new Cybersecurity strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives

- Other experience includes coordinating single projects and team, and assisting clients in achieving desired program results
- Serves as the client's cyber information technology implementation advisor to the client
- Directs the development and implementation of communication and training plans as it relates to cybersecurity information technology
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Assist with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Lead II	Minimum of 13 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, direction on client engagements, cybersecurity information technology implementation expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed and implemented into new Cybersecurity strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating multiple projects and team, and assisting clients in achieving desired program results
- Serves as the client's cyber information technology implementation advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Leads the development and implementation of communication and training plans as it relates to cybersecurity information technology
- Is the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Lead I	Minimum of 10 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, direction on client engagements, cybersecurity information technology implementation expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed and implemented into new Cybersecurity strategy methodology, and helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating multiple projects and team, and assisting clients in achieving desired program results
- Serves as the client's cyber information technology implementation advisor and subject matter expert to the client and helps with day-to-day activities of project teams
- Assists with the development and implementation of communication and training plans as it relates to cybersecurity information technology

- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Engagement Implementation Leader III	Minimum of 11 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology implementation expertise, focus on program delivery and technical integration and implementation, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Maintains responsibility for managing the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Cybersecurity program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Understands the client's risk, business objectives, and quality goals as it relates to cybersecurity information technology
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Engagement Implementation Leader II	Minimum of 9 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology implementation expertise, focus on program delivery and technical integration and implementation, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Manages the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Cybersecurity program activities and is a point of contact with client executives
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Understands the client's risk, business objectives, and quality goals as it relates to cybersecurity information technology
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Manages technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Engagement Implementation Leader I	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology implementation expertise, focus on program delivery and technical integration and implementation, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Manages the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Cybersecurity program activities
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Understands the client's risk, business objectives, and quality goals as it relates to cybersecurity information technology
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Provides assistance with technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Architect II	Minimum of 14 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology implementation expertise, focus on program delivery and technical integration and implementation, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Maintains responsibility for managing the program team and daily operations of project development or serves in a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages Cybersecurity program activities and is a key point of contact with client executives
- Serves as a cybersecurity technology subject matter expert and assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Understands the client's risk, business objectives, and quality goals as it relates to cybersecurity information technology
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Architect I	Minimum of 12 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology implementation expertise, focus on program delivery and technical integration and implementation, ability to drive Cybersecurity Strategy and planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources

- Maintains responsibility for managing the program team and daily operations of project development or serves in a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals
- Manages Cybersecurity program activities and is a point of contact with client executives
- Serves as a cybersecurity technology subject matter expert and assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Understands the client’s risk, business objectives, and quality goals as it relates to cybersecurity information technology
- Communicates with the Contracting Officer’s Technical and delegated government representatives
- Assists with managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Assists with managing and implementing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Project Lead III	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
---------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in management and direction on cybersecurity information technology projects, or extensive knowledge of and experience with cybersecurity systems development and implementation
- Cybersecurity information technology implementation expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project implementation team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical implementation expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Project Lead II	Minimum of 6 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
--------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience includes management and direction on cybersecurity information technology projects, or extensive knowledge of and experience with cybersecurity systems development and implementation
- Cybersecurity information technology implementation expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise

- Serves in the role of project implementation team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical implementation expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Project Lead I	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience includes management and direction on cybersecurity information technology projects, or extensive knowledge of and experience with cybersecurity systems development and implementation
- Cybersecurity information technology implementation expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project implementation team leader over assigned support areas, and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical implementation expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Solution Lead II	Minimum of 10 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience includes management and direction on cybersecurity information technology projects, or extensive knowledge of and experience with cybersecurity systems development and implementation
- Cybersecurity information technology implementation expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project implementation team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical implementation expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Selects the most relevant tools and techniques to meet specific cybersecurity technology requirements
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Solution Lead I	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience includes management and direction on cybersecurity information technology projects, or extensive knowledge of and experience with cybersecurity systems development and implementation
- Cybersecurity information technology implementation expertise, development of engagement work plans, deployment of program criterion, and related activities
- Modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project implementation team leader over assigned support areas, and instructing, directing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical implementation expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Selects the most relevant tools and techniques to meet specific cybersecurity technology requirements
- Performs analyses of client issues and assesses appropriate alternatives
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Sr Professional V	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, cybersecurity information technology implementation expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, development, and implementation of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements practical cybersecurity information technology solutions and methodologies
- Provides senior-level analytical and program support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific Cybersecurity project tasks
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- This position performs analyses and makes diagnoses, as well as investigates and defines symptoms and problems, and develops conclusions
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Sr Professional IV	Minimum of 4 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, cybersecurity information technology implementation expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, development, and implementation of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements practical cybersecurity information technology solutions and methodologies
- Provides senior-level analytical and program support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may assist with specific Cybersecurity project tasks
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- This position performs analyses and makes diagnoses, as well as investigates and defines symptoms and problems, and develops conclusions
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Sr Professional III	Minimum of 3 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, cybersecurity information technology implementation expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, development, and implementation of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements practical cybersecurity information technology solutions and methodologies
- Provides senior-level analytical and program support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Contributes to work plan development, reaching engagement milestones, and may assist with specific Cybersecurity project tasks
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- This position performs analyses and makes diagnoses, as well as investigates and defines symptoms and problems
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Sr Professional II	Minimum of 2 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, cybersecurity information technology implementation expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, development, and implementation of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members

- Implements practical cybersecurity information technology solutions and methodologies
- Provides senior-level analytical and program support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to completion within scope and budget
- Contributes to work plan development, reaching engagement milestones, and may lead assist with specific Cybersecurity project tasks
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- This position performs analyses and makes diagnoses, as well as investigates and defines symptoms and problems
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Sr Professional I	Minimum of 1 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, cybersecurity information technology implementation expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, development, and implementation of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements practical cybersecurity information technology solutions and methodologies
- Provides senior-level analytical and program support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with engagement tasks to completion within scope and budget
- Contributes to work plan development, reaching engagement milestones
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling
- This position performs analyses and makes diagnoses, as well as investigates and defines symptoms and problems
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Mid Professional V	Minimum of 3 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, cybersecurity information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and institutes and supports business solutions
- Provides analytical and program implementation support
- Completes assigned Cybersecurity engagement tasks within the project scope and budget, while meeting deliverable requirements
- Serves as a key analytical resource on engagement team
- Assumes responsibility for conducting relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Develops innovation and efficiency in order to increase cybersecurity information technology performance
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Mid Professional IV	Minimum of 2 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, cybersecurity information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and institutes and supports business solutions
- Provides analytical and program implementation support
- Completes assigned Cybersecurity engagement tasks within the project scope and budget, while meeting deliverable requirements
- Serves as an analytical resource on engagement team
- Conducts relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Develops innovation and efficiency in order to increase cybersecurity information technology performance
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Mid Professional III	Minimum of 1 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, cybersecurity information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and institutes and supports business solutions
- Provides analytical and program implementation support
- Completes assigned Cybersecurity engagement tasks within the project scope and budget, while meeting deliverable requirements
- Conducts relevant research, distilling data, and assists with creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Provides assistance for quality assurance practices and fostering completion and accuracy of system documentation
- Develops innovation and efficiency in order to increase cybersecurity information technology performance
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Mid Professional II	Minimum of 2 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
------------------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, cybersecurity information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and institutes and supports business solutions
- Provides analytical and program implementation support
- Provides assistance with the completion of Cybersecurity engagement tasks within the project scope and budget, while meeting deliverable requirements
- Conducts relevant research, distilling data, and assists with creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities

- Provides assistance for quality assurance practices and fostering completion and accuracy of system documentation
- Develops innovation and efficiency in order to increase cybersecurity information technology performance
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Mid Professional I	Minimum of 1 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
-----------------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, cybersecurity information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and institutes and supports business solutions
- Provides analytical and program implementation support
- Provides assistance with the completion of Cybersecurity engagement tasks within the project scope and budget, while meeting deliverable requirements
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Develops innovation and efficiency in order to increase cybersecurity information technology performance
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Jr Professional V	Minimum of 2 years of information technology or directly relevant industry experience	Minimum Bachelor's or equivalent in a related field
----------------------------------------------------------	---------------------------------------------------------------------------------------	-----------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Provides expertise in, but not limited to, configuration management, knowledge management, business analysis, and technical analysis
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as a Cybersecurity IT resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Assists project team in meeting program objectives timely and effectively
- Supports planning and project management for cybersecurity information technology tasks
- Assumes responsibility for process documentation and technical soundness
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Jr Professional IV	Minimum of 1 years of information technology or directly relevant industry experience	Minimum Bachelor's or equivalent in a related field
-----------------------------------------------------------	---------------------------------------------------------------------------------------	-----------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Provides expertise in, but not limited to, configuration management, knowledge management, business analysis, and technical analysis
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as a Cybersecurity IT resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Assists project team in meeting program objectives timely and effectively
- Supports planning and project management for cybersecurity information technology tasks

- Provides assistance for process documentation and technical soundness
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Jr Professional III	Minimum of 0 years of information technology or directly relevant industry experience	Minimum Bachelor's or equivalent in a related field
------------------------------------------------------------	---------------------------------------------------------------------------------------	-----------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Provides expertise in, but not limited to, configuration management, knowledge management, business analysis, and technical analysis
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as a Cybersecurity IT resource on engagement team
- Assists project team in meeting program objectives timely and effectively
- Supports planning and project management for cybersecurity information technology tasks
- Provides assistance for process documentation and technical soundness
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Jr Professional II	Minimum of 2 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
-----------------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Provides expertise in, but not limited to, configuration management, knowledge management, business analysis, and technical analysis
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as a Cybersecurity IT resource on engagement team
- Assists project team in meeting program objectives timely and effectively
- Supports planning and project management for cybersecurity information technology tasks
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Jr Professional I	Minimum of 1 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
----------------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise
- Provides expertise in, but not limited to, configuration management, knowledge management, business analysis, and technical analysis
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as a Cybersecurity IT resource on engagement team
- Assists project team in meeting program objectives timely and effectively
- Supports planning and project management for cybersecurity information technology tasks
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Jr Staff IV	Minimum of 0 years of information technology or directly relevant industry experience	Minimum Bachelor's or equivalent in a related field
----------------------------------------------------	---------------------------------------------------------------------------------------	-----------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Serves as a Cybersecurity IT resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Assists project team in meeting program objectives timely and effectively
- Supports planning and project management for cybersecurity information technology tasks
- Responsible for process documentation and technical soundness
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Jr Staff III	Minimum of 3 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
-----------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Experience performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Serves as a Cybersecurity IT resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Assists project team in meeting program objectives timely and effectively
- Supports planning and project management for cybersecurity information technology tasks
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Jr Staff II	Minimum of 2 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
----------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Serves as a Cybersecurity IT resource on engagement team
- Assists with analyzing data and systems architecture, creates designs, and implements information systems solutions
- Assists project team in meeting program objectives timely and effectively
- Supports planning and project management for cybersecurity information technology tasks
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Implementation Jr Staff I	Minimum of 1 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
---------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Serves as a Cybersecurity IT resource on engagement team
- Assists with analyzing data and systems architecture, creates designs, and implements information systems solutions
- Supports planning and project management for cybersecurity information technology tasks
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Executive II	Minimum of 13 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, direction on client engagements, cybersecurity information technology operations expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new Cybersecurity strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating multiple projects and team, and assisting clients in achieving desired program results
- Serves as a cyber information technology advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Executive I	Minimum of 10 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, direction on client engagements, cybersecurity information technology operations expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed into new Cybersecurity strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating single projects and team, and assisting clients in achieving desired program results
- Serves as a cyber information technology advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance for supervising designated resources and enforcing quality control practices for each Cybersecurity project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Leader III	Minimum of 11 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology operations expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and operations, planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Maintains responsibility for managing the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution

- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Manages Cybersecurity program operations and activities and is a key point of contact with client executives
- Assumes responsibility for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer’s Technical and delegated government representatives
- Leads integrated team of multi-disciplinary professionals, with multiple concurrent deliverables and tasks
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Leader II	Minimum of 9 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
----------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology operations expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and operations, planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Manages the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Manages Cybersecurity program operations and activities and is a point of contact with client executives
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communicates with the Contracting Officer’s Technical and delegated government representatives
- Assists with integrated teams of multi-disciplinary professionals, with multiple concurrent deliverables and tasks
- Manages technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Leader I	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
---------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, cybersecurity information technology operations expertise, focus on program delivery and technical integration, ability to drive Cybersecurity Strategy and operations, planning changes at the executive levels, oversight of key cybersecurity enablers, and management of project resources
- Manages the program team and daily operations of project development or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Manages Cybersecurity program operations and activities
- Responsible for program delivery, oversight of key technical enablers on projects, and identification of needs for new tools
- Communicates with the Contracting Officer’s Technical and delegated government representatives
- Provides assistance with integrated teams of multi-disciplinary professionals, with multiple concurrent deliverables and tasks
- Assists with managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables

- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Lead IV	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in operations management and direction on cybersecurity projects, or extensive knowledge of and experience with cybersecurity system development and implementation
- Cybersecurity information technology operations expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operational needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, managing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical expert
- Develops and manages analysis plan, conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Lead III	Minimum of 6 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in operations management and direction on cybersecurity projects, or extensive knowledge of and experience with cybersecurity system development and implementation
- Cybersecurity information technology operations expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operational needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, managing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical expert
- Develops and manages analysis plan, conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Lead II	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in operations management and direction on cybersecurity projects, or extensive knowledge of and experience with cybersecurity system development and implementation

- Cybersecurity information technology operations expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operational needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project team leader over assigned support areas, and instructing, directing, managing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical expert
- Develops and manages analysis plan, conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Lead I	Minimum of 4 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in operations management and direction on cybersecurity projects, or extensive knowledge of and experience with cybersecurity system development and implementation
- Cybersecurity information technology operations expertise, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operational needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, conducting performance measurements, and providing cybersecurity expertise
- Serves in the role of project team leader over assigned support areas, and instructing, directing, managing, and monitoring the work of other cybersecurity staff or serves in a role of an experienced Cybersecurity technical expert
- Manages analysis plan, conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Sr Professional V	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, cybersecurity information technology operations expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical and operational program support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team and leads small teams

- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific Cybersecurity project tasks
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Sr Professional IV	Minimum of 4 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, cybersecurity information technology operations expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical and operational program support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team and leads small teams
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead assist with specific Cybersecurity project tasks
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Sr Professional III	Minimum of 3 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, cybersecurity information technology operations expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical and operational program support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team and leads small teams
- Contributes to work plan development, reaching engagement milestones, and may assist with specific Cybersecurity project tasks
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives

- This position performs analyses and makes diagnoses, as well as defines symptoms and problems
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Sr Professional II	Minimum of 2 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, cybersecurity information technology operations expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical and operational program support, and is focused on providing high performance work

- Assists with formulating diagnoses through financial or statistical modeling
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Mid Professional V	Minimum of 3 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, cybersecurity information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables

- Provides assistance on completing work plan activities, analyzes relevant data and information, and institutes and supports business solutions
- Provides analytical and program support
- Completes assigned Cybersecurity engagement tasks within the project scope and budget
- Manages development of multiple deliverables
- Serves as a key analytical resource on engagement team
- Assumes responsibility for conducting relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Mid Professional IV	Minimum of 2 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, cybersecurity information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and institutes and supports business solutions
- Provides analytical and program support
- Completes assigned Cybersecurity engagement tasks within the project scope and budget
- Manages development of multiple deliverables
- Serves as an analytical resource on engagement team
- Conducts relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Mid Professional III	Minimum of 1 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, cybersecurity information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and institutes and supports business solutions
- Provides analytical and program support
- Completes assigned Cybersecurity engagement tasks within the project scope and budget
- Manages development of multiple deliverables
- Conducts relevant research, distilling data, and assists with creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Provides assistance for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Mid Professional II	Minimum of 2 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
--------------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, cybersecurity information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and institutes and supports business solutions
- Provides analytical and program support
- Provides assistance with the completion of Cybersecurity engagement tasks within the project scope and budget
- Manages development of multiple deliverables
- Conducts relevant research, distilling data, and assists with creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Provides assistance for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Mid Professional I	Minimum of 1 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
-------------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, cybersecurity information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and institutes and supports business solutions
- Provides analytical and program support
- Provides assistance with the completion of Cybersecurity engagement tasks within the project scope and budget
- Manages development of deliverables
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Jr Professional V	Minimum of 2 years of information technology or directly relevant industry experience	Minimum Bachelor's or equivalent in a related field
------------------------------------------------------	---------------------------------------------------------------------------------------	-----------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as a Cybersecurity IT resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Assists project team in meeting program objectives timely and effectively
- Assumes responsibility for process documentation and technical soundness
- Collects data, undertakes analysis, and helps interpret to identify issues and opportunities for growth and value
- Qualified in making recommendations for next steps
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Jr Professional IV	Minimum of 1 years of information technology or directly relevant industry experience	Minimum Bachelor's or equivalent in a related field
-------------------------------------------------------	---------------------------------------------------------------------------------------	-----------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as a Cybersecurity IT resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Assists project team in meeting program objectives timely and effectively
- Provides assistance for process documentation and technical soundness
- Collects data, undertakes analysis, and helps interpret to identify issues and opportunities for growth and value
- Qualified in making recommendations for next steps
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Jr Professional III	Minimum of 0 years of information technology or directly relevant industry experience	Minimum Bachelor’s or equivalent in a related field
--------------------------------------------------------	---------------------------------------------------------------------------------------	-----------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as a Cybersecurity IT resource on engagement team
- Assists project team in meeting program objectives timely and effectively
- Provides assistance for process documentation and technical soundness
- Collects data, undertakes analysis, and helps interpret to identify issues and opportunities for growth and value
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Cybersecurity IT Operations Jr Professional II	Minimum of 2 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
-------------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, cybersecurity information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation

-------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in management support, health information technology operations expertise, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables, as well as experience in the firm's health technology focused consulting offerings: enterprise health technology strategy development, future scenario analysis, policy analysis, and health technology strategy and design
- This role requires building strong working relationships with all levels of the organization, including executives, management, and line staff in order to coordinate the efforts of Health IT resources
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives

- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and operational support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Contributes to work plan development, reaching engagement milestones, and may assist with specific project tasks
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling, assesses appropriate alternatives
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Health IT Operations Sr Professional II	Minimum of 2 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field

Technology Advisory Project Lead III	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
---------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagements and advises on enterprise technology strategy development, system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of advisory project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Communicates recommendation to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Project Lead II	Minimum of 6 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
--------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagements and advises on enterprise technology strategy development, system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of advisory project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices

- Performs analyses of client issues, assesses appropriate alternatives
- Communicates client expectations to project team
- Communicates recommendation to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Project Lead I	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagements and advises on enterprise technology strategy development, system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of advisory project team leader over assigned support areas and instructing, directing, advising, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Communicates client expectations to project team
- Communicates recommendation to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Solution Lead II	Minimum of 10 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagements and advises on enterprise technology strategy development, system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of advisory project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other IT staff or serves in a role of an experienced technical subject matter expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Communicates recommendation to clients, builds alignment, and manages client relationships
- Delivers presentations of information including, but not limited to, new commitments in the status of work products, and problems encountered, and leads client meetings
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Solution Lead I	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagements and advises on enterprise technology strategy development, system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of advisory project team leader over assigned support areas, and instructing, directing, advising, and monitoring the work of other IT staff or serves in a role of an experienced technical subject matter expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team
- Communicates recommendation to clients, builds alignment, and manages client relationships
- Assists with client meetings and presentations including, but not limited to, new commitments in the status of work products, and problems encountered
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Sr Professional III	Minimum of 6 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Program management support experience, information technology advisory experience, and familiarity with client issues, assistance with design issues, leading and advising client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and advisory support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks
- Advises on and guiding sub-tasks of an information technology related business and technical needs
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Sr Professional II	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Program management support experience, information technology advisory experience, and familiarity with client issues, assistance with design issues, leading and advising client teams, analysis of project data, and development of appropriate deliverables

- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and advisory support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks
- Advises on sub-tasks of an information technology related business and technical needs
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with Formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Sr Professional I	Minimum of 4 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Program management support experience, information technology advisory experience, and familiarity with client issues, assistance with design issues, leading and advising client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and advisory support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Contributes to work plan development, reaching engagement milestones, and may assist with specific project tasks
- Advises on sub-tasks of an information technology related business and technical needs
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with Formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- Performs analyses and makes diagnoses, as well as defines symptoms and problems
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Mid Professional III	Minimum of 4 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, information technology advisory expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and advises, institutes, and supports business solutions
- Provides analytical, advisory, and program support
- Analyzes business requirements impacted by information technology, and defining applicable tools and innovative solutions including technology, methodology, and solution components

- Completes assigned information technology engagement tasks within the project scope and budget with no oversight, while meeting deliverable requirements
- Serves as a key analytical resource on engagement team
- Assumes responsibility for conducting relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Mid Professional II	Minimum of 3 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, information technology advisory expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and advises, institutes, and supports business solutions
- Provides analytical, advisory, and program support
- Analyzes business requirements impacted by information technology, and defining applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned information technology engagement tasks within the project scope and budget with little oversight, while meeting deliverable requirements
- Serves as an analytical resource on engagement team
- Conducts relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Mid Professional I	Minimum of 2 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, information technology advisory expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and advises, institutes, and supports business solutions
- Provides analytical, advisory, and program support
- Analyzes business requirements impacted by information technology, and defining applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned information technology engagement tasks within the project scope and budget, while meeting deliverable requirements
- Serves as an analytical resource on engagement team
- Conducts relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Jr Professional III	Minimum of 2 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology advisory expertise, and has programming experience in one or more languages, and is versed in system testing
- Experience in the following: data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Completes assigned information technology tasks for deliverable requirements with minimal oversight
- Assists project team in meeting program objectives timely and effectively, and contributes to obtaining data and reports for presentations and client meetings
- Assumes responsibility for process documentation and technical soundness
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Jr Professional II	Minimum of 1 year of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------	--------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology advisory expertise, and has programming experience in one or more languages, and is versed in system testing
- Experience in the following: data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Completes assigned information technology tasks for deliverable requirements with minimal oversight
- Assists project team in meeting program objectives timely and effectively, and contributes to obtaining data and reports for presentations and client meetings
- Assists with process documentation and technical soundness
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Advisory Jr Professional I	Minimum of 0 year of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------	--------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology advisory expertise, and has programming experience in one or more languages, and is versed in system testing
- Experience in the following: data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Completes assigned information technology tasks for deliverable requirements with minimal oversight
- Assists project team in meeting program objectives timely and effectively, and contributes to obtaining data and reports for presentations and client meetings
- Assists with process documentation and technical soundness
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Executive III	Minimum of 15 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, information technology implementation expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Guide's information technology project planning, including the delivery of the vision and mission, work plans, staffing, and financials
- Coordinates the design and roll out of information technology implementation and operation strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology implementations advisor to the client
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and implementing quality control practices for each project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Executive II	Minimum of 13 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, information technology implementation expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Assists information technology project planning including the delivery of the vision and mission, work plans, staffing, and financials
- Coordinates the design and roll out of information technology implementation and operation strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology implementations advisor to the client
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and implementing quality control practices for each project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Executive I	Minimum of 10 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, information technology implementation expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with implementing themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Assists information technology project planning including the delivery of the vision and mission, work plans, staffing, and financials
- Coordinates the design and roll out of information technology implementation and operation strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology implementations advisor to the client
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Assists with formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and implementing quality control practices for each project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Lead II	Minimum of 13 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management, information technology implementation expertise, direction on client engagements
- Experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Leads information technology project planning including the delivery of the vision and mission, work plans, staffing, and financials
- Other experience includes coordinating and leading the design and roll out of information technology implementation and operation strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology implementations advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and implementing quality control practices for each project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Lead I	Minimum of 10 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, information technology implementation expertise, direction on client engagements, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, and helps to ensure overall soundness of analytical approach
- Helps coordinate information technology project planning including the delivery of the vision and mission, work plans, staffing, and financials
- Other experience includes coordinating the design and roll out of information technology implementation and operation strategy to provide solutions to client issues including, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology implementations advisor and subject matter expert to the client and helps with day-to-day activities of project teams
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and implementing quality control practices for each project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Engagement Implementation Leader III	Minimum of 11 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in large program scope and approach, information technology implementation experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for managing the program team and daily operations of project implementation or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and implements program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing and implementing solutions to information technology problems, validating innovative solutions with subject matter experts, and helps to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Engagement Implementation Leader II	Minimum of 9 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in medium sized program scope and approach, information technology implementation experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for managing the program team and daily operations of project implementation or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals
- Manages and implements program activities and is a key point of contact with client executives
- Responsible for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer’s Technical and delegated government representatives
- Manages and implements solutions to information technology problems, validating innovative solutions with subject matter experts, and helps to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Engagement Implementation Leader I	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in small size program scope and approach, information technology implementation experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Manages the program team and daily operations of project implementation or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals
- Manages and implements program activities and is a point of contact with client executives
- Assists with program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Communicates with the Contracting Officer’s Technical and delegated government representatives
- Manages and implements solutions to information technology problems, validating innovative solutions with subject matter experts, and helps to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Architect II	Minimum of 14 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
-----------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in large program scope and approach, information technology implementation expert experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for managing the program team and daily operations of project implementation or serves in a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals
- Manages and implements program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer’s Technical and delegated government representatives

- Oversees completion of information technology implementation related tasks within the estimated time frames
- Maintains responsibility for managing and implementing solutions to information technology problems, validating innovative solutions with subject matter experts, and helps to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Architect I	Minimum of 12 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in small to medium sized program scope and approach, information technology implementation expert experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for managing the program team and daily operations of project implementation or serves in a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages and implements program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Communicates with the Contracting Officer's Technical and delegated government representatives
- Assists with the completion of information technology implementation related tasks within the estimated time frames
- Maintains responsibility for managing and implementing solutions to information technology problems and helps to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Project Lead III	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagements or extensive knowledge of and experience with system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Advises on information technology implementation problems using analysis, experience, and judgment
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions to be implemented
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Project Lead II	Minimum of 6 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagements or extensive knowledge of and experience with system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Advises on information technology implementation problems using analysis, experience, and judgment
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions to be implemented
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Project Lead I	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagements and advises on enterprise technology strategy development, system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Experience typically includes management and direction on client engagements or extensive knowledge of and experience with system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Advises on information technology implementation problems using analysis, experience, and judgment
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions to be implemented
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Solution Lead II	Minimum of 10 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagements or extensive knowledge of and experience with system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Advises on information technology implementation problems using analysis, experience, and judgment
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements

- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical subject matter expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Selects the most relevant tools and techniques to meet specific information technology requirements
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions to be implemented
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Maintains technical knowledge within industry and service line

Technology Implementation Solution Lead I	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagements on client engagements or extensive knowledge of and experience with system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Advises on information technology implementation problems using analysis, experience, and judgment
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical subject matter expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Selects the most relevant tools and techniques to meet specific information technology requirements
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions to be implemented
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Sr Professional V	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, information technology implementation experience, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements information operational systems, processes, and policies
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to implement within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks
- Implements business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements and creates project deliverables
- Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions for implementation

- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Sr Professional IV	Minimum of 4 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, information technology implementation experience, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements information operational systems, processes, and policies
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to implement within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks
- Implements business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions for implementation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Sr Professional III	Minimum of 3 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, information technology implementation experience, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements information operational systems, processes, and policies
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to implement within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Contributes to work plan development, reaching engagement milestones, and may assist with specific project tasks
- Implements business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- This position performs analyses and makes diagnoses, as well as defines symptoms and implementation problems
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Sr Professional II	Minimum of 2 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, information technology implementation experience, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements information operational systems, processes, and policies
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to implement within scope and budget
- Contributes to work plan development, reaching engagement milestones, and may assist with specific project tasks
- Implements business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements and creates project deliverables
- Assists with Formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Sr Professional I	Minimum of 1 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in program management support, information technology implementation experience, and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Implements information operational systems, processes, and policies
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with engagement tasks to implement within scope and budget
- Contributes to work plan development, reaching engagement milestones
- Implements business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling
- This position performs analyses and makes diagnoses, as well as defines symptoms and implementation problems
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Mid Professional V	Minimum of 3 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and implements, institutes, and supports business solutions

- Provides analytical, implementation and program support, and expertise in, but not limited to, configuration management, knowledge management, business analysis, and technical analysis
- Completes assigned engagement tasks within the project scope and budget, while meeting deliverable requirements
- Serves as a key analytical resource on engagement team
- Assumes responsibility for conducting relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Mid Professional IV	Minimum of 2 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and implements, institutes, and supports business solutions
- Provides analytical, implementation and program support, and expertise in, but not limited to, configuration management, knowledge management, business analysis, and technical analysis
- Completes assigned engagement tasks within the project scope and budget, while meeting deliverable requirements
- Serves as an analytical resource on engagement team
- Conducts relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Mid Professional III	Minimum of 1 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and implements, institutes, and supports business solutions
- Provides analytical, implementation and program support, and expertise in, but not limited to, configuration management, knowledge management, business analysis, and technical analysis
- Completes assigned engagement tasks within the project scope and budget, while meeting deliverable requirements
- Conducts relevant research, distilling data, and assists with creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Provides assistance for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Mid Professional II	Minimum of 2 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
------------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and implements, institutes, and supports business solutions
- Provides analytical, implementation and program support, and expertise in, but not limited to, configuration management, knowledge management, business analysis, and technical analysis
- Assists with the completion of engagement tasks within the project scope and budget, while meeting deliverable requirements
- Conducts relevant research, distilling data, and assists with creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Provides assistance for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Mid Professional I	Minimum of 1 year of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
-----------------------------------------------------	--------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Proficiency in analysis and defining business needs, information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and implements, institutes, and supports business solutions
- Provides analytical, implementation and program support, and expertise in, but not limited to, configuration management, knowledge management, business analysis, and technical analysis
- Assists with the completion of engagement tasks within the project scope and budget, while meeting deliverable requirements
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Jr Professional V	Minimum of 2 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Assists project team in meeting program objectives timely and effectively
- Assumes responsibility for process documentation and technical soundness
- Implementing practical and innovative solutions and methodologies as it relates to information technology
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Jr Professional IV	Minimum of 1 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Assists project team in meeting program objectives timely and effectively
- Assists with process documentation and technical soundness
- Implementing practical and innovative solutions and methodologies as it relates to information technology
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Jr Professional III	Minimum of 0 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology resource on engagement team
- Assists project team in meeting program objectives timely and effectively
- Assists with process documentation and technical soundness
- Implementing practical and innovative solutions and methodologies as it relates to information technology
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Jr Professional II	Minimum of 2 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
-----------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology resource on engagement team
- Assists project team in meeting program objectives timely and effectively
- Implementing practical and innovative solutions and methodologies as it relates to information technology
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Jr Professional I	Minimum of 1 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
----------------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology implementation expertise
- Other experience includes data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology resource on engagement team
- Assists project team in meeting program objectives timely and effectively
- Implementing practical and innovative solutions and methodologies as it relates to information technology
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Jr Staff IV	Minimum of 0 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Serves as an information technology resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Assists project team in meeting program objectives timely and effectively
- Responsible for process documentation and technical soundness
- Implementing practical and innovative solutions and methodologies as it relates to information technology
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Jr Staff III	Minimum of 3 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
-----------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Serves as an information technology resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Assists project team in meeting program objectives timely and effectively
- Implementing practical and innovative solutions and methodologies as it relates to information technology
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Jr Staff II	Minimum of 2 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
----------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Serves as an information technology resource on engagement team
- Assists with analyzing data and systems architecture, creates designs, and implements information systems solutions
- Assists project team in meeting program objectives timely and effectively
- Implementing practical and innovative solutions and methodologies as it relates to information technology
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Implementation Jr Staff I	Minimum of 1 years of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
---------------------------------------------	---------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology implementation expertise, has programming experience in one or more languages, and is versed in system testing
- Serves as an information technology resource on engagement team
- Assists with analyzing data and systems architecture, creates designs, and implements information systems solutions
- Implementing practical and innovative solutions and methodologies as it relates to information technology
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations Executive II	Minimum of 13 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, information technology operations expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions
- Proficient in project estimation and resource planning and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Coordinates multiple projects and teams and assisting clients in desired information technology operations relating to, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology operations advisor to the client
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Assumes accountability for supervising designated resources and quality control practices for each project
- Provides contract and engagement oversight, including managing budget, risk, quality, and personnel
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations Executive I	Minimum of 10 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, information technology operations expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions
- Proficient in project estimation and resource planning and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Coordinates single projects and teams and assisting clients in desired information technology operations relating to, but not limited to, finance, scheduling, technology, methodology, tools, and solution components
- Serves as information technology operations advisor to the client
- Assumes responsibility for client communications relating to technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Assists with formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Supervises designated resources and quality control practices for each project
- Provides contract and engagement oversight, including managing budget, risk, quality, and personnel
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations Engagement Leader III	Minimum of 11 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, information technology operations experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for managing the program team and daily operations of project operations or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution

- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals
- Manages program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery and oversight of key technical enablers on project operations and identification of needs for new tools
- Facilitates client management teams through change processes and delivers presentations
- Conducts regular interaction and communications with the Contracting Officer’s Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across project operations and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations Engagement Leader II	Minimum of 9 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
---------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, information technology operations experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Maintains responsibility for managing the program team and daily operations of project operations or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals
- Manages program activities and is a point of contact with client executives
- Responsible for program delivery and oversight of key technical enablers on project operations and identification of needs for new tools
- Facilitates client management teams through change processes and delivers presentations
- Communicates with the Contracting Officer’s Technical and delegated government representatives
- Manages technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across project operations and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations Engagement Leader I	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
--------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, information technology operations experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Manages the program team and daily operations of project operations or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals
- Manages program activities and is responsible for program delivery and oversight of key technical enablers on project operations and identification of needs for new tools
- Assists with facilitation of client management teams through change processes and delivers presentations
- Communicates with the Contracting Officer’s Technical and delegated government representatives
- Manages technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across project operations and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations Lead IV	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in information technology operations management and direction on client engagements or extensive knowledge of and experience with systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies operations procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operations
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line operations
- Manages and leads projects teams and ensures deliverables are presented to clients in a timely manner
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations Lead III	Minimum of 6 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in information technology operations management and direction on client engagements or extensive knowledge of and experience with systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies operations procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operations
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line operations
- Manages projects teams and ensures deliverables are presented to clients in a timely manner
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations Lead II	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in information technology operations management and direction on client engagements or extensive knowledge of and experience with systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies operations procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operations
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements

- Serves in the role of project team leader over assigned support areas and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions
- Maintains technical knowledge within industry and service line operations
- Manages and leads small projects teams and ensures deliverables are presented to clients in a timely manner
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

Technology Operations Lead I	Minimum of 4 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

- Manages and implements program activities and is a point of contact with client executives
- Responsible for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Communicates with the Contracting Officer’s Technical and delegated government representatives
- Manages and implements technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Engagement Implementation Leader I	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, information technology implementation experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and identity, credentials, and access management expertise
- Manages the program team and daily operations of project implementation or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals as it relates to information technology identity, credentials, and access management
- Manages and implements program activities
- Responsible for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Communicates with the Contracting Officer’s Technical and delegated government representatives
- Manages and implements technical solutions and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Implementation Architect II	Minimum of 14 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
-----------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, information technology implementation expert experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and identity, credentials, and access management expertise
- Maintains responsibility for managing the program team and daily operations of project implementation or serves in a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals as it relates to information technology identity, credentials, and access management
- Manages and implements program activities and is a key point of contact with client executives

- Assumes responsibility for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer’s Technical and delegated government representatives
- Maintains responsibility for managing and implementing technical solutions and validating innovative solutions with subject matter experts, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Implementation Architect I	Minimum of 12 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
----------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, information technology implementation expert experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and identity, credentials, and access management expertise
- Maintains responsibility for managing the program team and daily operations of project implementation or serves in a role as a highly experienced Technical subject matter expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals as it relates to information technology identity, credentials, and access management
- Manages and implements program activities and is a point of contact with client executives
- Assumes responsibility for program delivery and oversight of key technical enablers on projects and identification of needs for new tools
- Communicates with the Contracting Officer’s Technical and delegated government representatives
- Assists with managing and implementing technical solutions and validating innovative solutions with subject matter experts, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Implementation Project Lead III	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
---------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in implementing identity, credentials, and access management, or extensive knowledge of and experience with HSPD-12 systems development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Implements operational systems, processes, and policies as it relates to information technology
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions to be implemented
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Develops innovation and efficiency in order to increase identity, credentials, and access management and information technology performance
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Implementation Project Lead II	Minimum of 6 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in implementing identity, credentials, and access management, or extensive knowledge of and experience with HSPD-12 systems development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Implements operational systems, processes, and policies as it relates to information technology
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions to be implemented
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Develops innovation and efficiency in order to increase identity, credentials, and access management and information technology performance
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Implementation Project Lead I	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in implementing identity, credentials, and access management, or extensive knowledge of and experience with HSPD-12 systems development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Implements operational systems, processes, and policies as it relates to information technology
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions to be implemented
- Maintains technical knowledge within industry and service line
- Assists with Developing innovation and efficiency in order to increase identity, credentials, and access management and information technology performance
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Implementation Solution Lead II	Minimum of 10 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in implementing identity, credentials, and access management, or extensive knowledge of and experience with HSPD-12 systems development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and

team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs

- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical subject matter expert
- Implements operational systems, processes, and policies as it relates to information technology
- Selects the most relevant tools and techniques to meet specific information technology requirements
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions to be implemented
- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff
- Maintains technical knowledge within industry and service line
- Develops innovation and efficiency in order to increase identity, credentials, and access management and information technology performance
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Implementation Solution Lead I	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in implementing identity, credentials, and access management, or extensive knowledge of and experience with HSPD-12 systems development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as an information technology subject matter expert and team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical subject matter expert
- Implements operational systems, processes, and policies as it relates to information technology
- Selects the most relevant tools and techniques to meet specific information technology requirements
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions to be implemented
- Communicates client expectations to project team
- Maintains technical knowledge within industry and service line
- Assists with developing innovation and efficiency in order to increase identity, credentials, and access management and information technology performance
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Implementation Sr Professional V	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in Identity, Credentials, and Access Management implementation support and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides expertise in, but not limited to, configuration management, knowledge management, business analysis, and technical analysis

- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to implement within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks
- Implements business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems and develops conclusions for implementation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Implementation Sr Professional IV	Minimum of 4 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in Identity, Credentials, and Access Management implementation support and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides expertise in, but not limited to, configuration management, knowledge management, business analysis, and technical analysis
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and assists with less complex engagement tasks to implement within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks
- Implements business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling and assesses appropriate alternatives
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions for implementation
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Implementation Sr Professional III	Minimum of 3 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in Identity, Credentials, and Access Management implementation support and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members

- The role is for a specific Identity, Credentials, and Access Management client engagements
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Executive II	Minimum of 13 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, information technology operational expertise as it relates to identity, credentials, and access management, and direction on client engagements, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of operational and analytical approach, and is able to suggest alternatives
- Other experience includes coordinating multiple projects and team and assisting clients in desired operational program outcomes
- Serves as an HSPD-12 information technology operations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback

- Assumes accountability for supervising designated resources and quality control practices for each project
- Maintains responsibility for project reviews and overall contract progress, performance, and operations
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Executive I	Minimum of 10 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, information technology operational expertise as it relates to identity, credentials, and access management, and direction on client engagements, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning and in resolving project issues, such as technical compatibility, client expectations, and timing
- Assists with identifying themes capable of being developed into new IT strategy methodology, helps to ensure overall soundness of operational and analytical approach, and is able to suggest alternatives
- Other experience includes coordinating single projects and team and assisting clients in desired operational program outcomes
- Serves as an HSPD-12 information technology operations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- Is the contractor's point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Supervises designated resources and quality control practices for each project
- Assists with project reviews and overall contract progress, performance, and operations
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Leader III	Minimum of 11 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------	----------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, information technology operations experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and identity, credentials, and access management expertise
- Maintains responsibility for managing the program team and daily operations of project operations or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Manages highly complex program activities and is a key point of contact with client executives
- Assumes responsibility for program delivery and oversight of key technical enablers on project operations and identification of needs for new tools
- Conducts regular interaction and communications with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure alignment of scope, work product with client deliverables, and quality assurance principles are met across project operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Leader II	Minimum of 9 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, information technology operations experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and identity, credentials, and access management expertise
- Manages the program team and daily operations of project operations or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals
- Manages highly medium complexity program activities and is a point of contact with client executives
- Responsible for program delivery and oversight of key technical enablers on project operations and identification of needs for new tools
- Communicates with the Contracting Officer’s Technical and delegated government representatives
- Manages technical solutions, delegating appropriate resources, and helping to ensure alignment of scope, work product with client deliverables, and quality assurance principles are met across project operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Leader I	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
---------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in program scope and approach, information technology operations experience, focus on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and identity, credentials, and access management expertise
- Manages the program team and daily operations of project operations or serves in a role as a highly experienced Technical expert, and helps to ensure client comfort and feasibility with designed solution
- Other experience includes communication with client and project managers and management of multiple projects across various industry lines
- Understands the client’s risk, business objectives, and quality goals
- Manages low complexity program activities
- Responsible for program delivery and oversight of key technical enablers on project operations and identification of needs for new tools
- Communicates with the Contracting Officer’s Technical and delegated government representatives
- Manages technical solutions, delegating appropriate resources, and helping to ensure alignment of scope, work product with client deliverables, and quality assurance principles are met across project operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Lead IV	Minimum of 8 years of information technology or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
--------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Engagement experience in identity, credentials, and access management and operations, or extensive knowledge of and experience with HSPD-12 systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related operational activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operations
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions

- Communicates client expectations to project team, and escalates appropriate issues to senior level project staff, as well as communicating recommendation to clients and managing client relationships
- Maintains technical knowledge within industry and service line operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Lead III	Minimum of 6 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in identity, credentials, and access management and operations, or extensive knowledge of and experience with HSPD-12 systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related operational activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on technical solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operations
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions
- Communicates client expectations to project team, as well as communicating recommendation to clients and managing client relationships
- Maintains technical knowledge within industry and service line operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Lead II	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in identity, credentials, and access management and operations, or extensive knowledge of and experience with HSPD-12 systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related operational activities
- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operations
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues and recommends solutions
- Communicates recommendations to clients and managing client relationships
- Maintains technical knowledge within industry and service line operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Lead I	Minimum of 4 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in identity, credentials, and access management and operations, or extensive knowledge of and experience with HSPD-12 systems development, implementation, operations, and maintenance
- Development of engagement work plans, deployment of program criterion, and related operational activities

- Devises or modifies procedures to solve complex problems, provides experience on technical solution implementation, engages resources, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business operations
- Other experience includes implementing business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of project team leader over assigned support areas, and instructing, directing, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Performs analyses of client issues
- Maintains technical knowledge within industry and service line operations
- Manages teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Sr Professional V	Minimum of 5 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------	---------------------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experience in Identity, Credentials, and Access management support and familiarity with client issues, assistance with design issues, leading client teams, analysis of project data, and development of appropriate deliverables, as well as the firm's technology focused consulting offerings: enterprise technology strategy development, future scenario analysis, policy analysis, customer/stakeholder insight and strategy development, innovation strategy, and technology strategy
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives and operations
- Demonstrates these skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and operational support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks
- Operates and applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Sr Professional IV	Minimum of 4 years of information technology or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field

- The role is for a specific Identity, Credentials, and Access Management client engagements
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

HSPD-12 IT Operations Jr Staff I	Minimum of 1 year of information technology or directly relevant industry experience	Minimum High School Diploma or equivalent in a related field
-----------------------------------------	--------------------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Experience in performing technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology operations expertise, has programming experience in one or more languages, and is versed in system testing
- Serves as an information technology resource on engagement team
- Assists with analyzing data and systems architecture, creates designs, and implements information systems solutions
- Other responsibilities include assistance with developing task plans and understanding best practice frameworks, and key performance metrics
- The role is for a specific Identity, Credentials, and Access Management client engagements
- Supports teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, process, and technology

CLOUD COMPUTING AND CLOUD RELATED IT PROFESSIONAL SERVICES

Applicable to SINs: 518210C, 518210C(STLOC), 518210C(RC)

Deloitte’s SIN 518210C rate card is comprised of three service lines [(1) Advisory, (2) Implementation and (3) Operations] each with specific Cloud related labor categories and ceiling prices.

1. Cloud Information Technology Advisory Services

LABOR CATEGORY	EXPERIENCE	EDUCATION
Cloud Advisory Executive III	Minimum 16 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field

Skills & Expertise:

- Executive level management, direction on client engagement, cloud information technology advisory expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on themes capable of being developed into new cloud strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and advising on multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor’s liaison and point of contact with the Contracting Officer’s Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology strategies
- Assumes accountability for supervising designated resources and enforcing quality control practices for each cloud project
- Maintains responsibility for project reviews and overall contract progress and performance

- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Executive II	Minimum 14 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management, direction on client engagement, cloud information technology advisory expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on themes capable of being developed into new cloud strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and advising on multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology strategies
- Provides assistance with supervising designated resources and enforcing quality control practices for each cloud project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Executive I	Minimum 11 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management, direction on client engagement, cloud information technology advisory expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on themes capable of being developed into new cloud strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives

- Other experience includes coordinating and advising on multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor’s liaison and point of contact with the Contracting Officer’s Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology strategies
- Advises on enforcement of quality control practices for each cloud project
- Provides guidance to project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Leader IV	Minimum 10 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
---------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management, direction on client engagement, cloud information technology advisory expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Oversees identifying and advising on themes capable of being developed into new cloud information technology strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and advising on multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor’s liaison and point of contact with the Contracting Officer’s Technical Representative and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology strategies
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Experienced in to cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Leader III	Minimum 8 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, cloud information technology advisory expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions
- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes capable of being developed into new cloud information technology and helps to ensure overall soundness of analytical approach
- Advises executive-level clients on cloud information technology problem definition and solution design in order to achieve the desired program results
- Serves as a cloud information technology advisor and subject matter expert to the client and helps with day-to-day activities of project teams
- Assists in overseeing client communications relating to technical concerns
- May serve as the contractor's point of contact with the Contracting Officer's Technical Representative and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and enforcing quality control practices for each project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Experienced in to cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Leader II	Minimum 6 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagement and advises on cloud information technology strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of advisory project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other cloud information technology staff or serves in a role of an experience technical expert
- Conducts analysis of work plan completeness, prepares status reports, and support quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Communicates recommendations to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people processes, and technology
- Skilled in cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business

process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Leader I	Minimum 5 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagement and advises on cloud information technology strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, advises on change management principles, and conducts performance measurements
- Serves in the role of advisory project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other cloud information technology staff or serves in a role of an experience technical expert
- Conducts analysis of work plan completeness, prepares status reports, and support quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team
- Communicates recommendations to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people processes, and technology
- Skilled in cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Project Lead	Minimum 4 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs on client engagement and advises on cloud information technology strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, advises on change management principles, and conducts performance measurements
- Serves in the role of advisory project team leader over assigned support areas and instructing, directing, advising, and monitoring the work of other cloud information technology staff or serves in the role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and support quality control practices
- Communicates client expectations to project team
- Communicates recommendations to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line

- Manages teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people processes, and technology
- Skilled in cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Sr Professional IV	Minimum 4 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
------------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Program management support experience, cloud information technology advisory experience, and familiarity with client issues, assistance with design issues, leading and advising client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and advisory support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Contributes to work plan development, reaching engagement milestones, and may lead specific project tasks
- Advises on subtasks of cloud information technology related business and technical needs
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Adept in cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Sr Professional III	Minimum 3 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
-------------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Program management support experience, cloud information technology advisory experience, and familiarity with client issues, assistance with design issues, leading and advising client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members

- Provides senior-level analytical, program, and advisory support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Contributes to work plan development, reaching engagement milestones, and may lead specific project tasks
- Advises on subtasks of cloud information technology related business and technical needs
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling, assesses appropriate alternatives
- Performs analyses and makes diagnoses, as well as defines symptoms and problems
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Adept in cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Sr Professional II	Minimum 2 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance on completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, advisory, and/or program support
- Analyzes business requirements impacted by cloud information technology, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned cloud information technology engagement tasks within the project scope and budget with no oversight, while meeting deliverable requirements
- Serves as a key analytical resource in engagement team
- Assumes responsibility for conducting relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Proficient in cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Sr Professional I	Minimum 2 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, advisory, and/or program support
- Analyzes business requirements impacted by cloud information technology, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned cloud information technology engagement tasks within the project scope and budget with little oversight, while meeting deliverable requirements
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Proficient in cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field
-

Cloud Advisory Jr Professional III	Minimum 1 year consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------	------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, advisory, and/or program support
- Analyzes business requirements impacted by cloud information technology, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Analyzes, interprets, extrapolates, projects and models data to reach conclusions
- As assigned, completes sections of cloud consulting assignments independently or with oversight
- Familiar with cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Jr Professional II	Minimum 2 years consulting and/or directly relevant industry experience	Minimum Associate's Degree or equivalent in a related field
------------------------------------------	-------------------------------------------------------------------------	-------------------------------------------------------------

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, advisory, and/or program support
- Analyzes business requirements impacted by cloud information technology, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- As assigned, completes sections of cloud consulting assignments independently or with oversight
- Familiar with cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Advisory Jr Professional I	Minimum 1 year consulting and/or directly relevant industry experience	Minimum Associate's Degree or equivalent in a related field
-----------------------------------------	------------------------------------------------------------------------	-------------------------------------------------------------

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, advisory, and/or program support
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- As assigned, completes sections of cloud consulting assignments with oversight
- Familiar with cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

2. Cloud Information Technology Implementation Services

LABOR CATEGORY	EXPERIENCE	EDUCATION
Cloud Implementation Executive III	Minimum 16 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field

Skills & Expertise:

- Executive level management, direction on client engagement, cloud information technology implementation expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on cloud solution implementation strategy and methodology, helps to ensure overall soundness of approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology implementation advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor’s liaison and point of contact with the Contracting Officer’s Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology implementation strategies
- Assumes accountability for supervising designated resources and enforcing quality control practices for each cloud project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Executive II	Minimum 14 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
------------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management, direction on client engagement, cloud information technology implementation expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on cloud solution implementation strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology implementation advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor’s liaison and point of contact with the Contracting Officer’s Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology implementation strategies
- Oversees quality control practices for each cloud project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization,

configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Executive I	Minimum 11 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management, direction on client engagement, cloud information technology implementation expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on cloud solution implementation strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives

- May serve as the contractor’s liaison and point of contact with the Contracting Officer’s Technical Representative and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology implementation strategies
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Experienced in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Leader III	Minimum 8 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
----------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, cloud information technology implementation expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions
- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes for new cloud information technology solution implementations and helps to ensure overall soundness of analytical approach
- Advises executive-level clients on cloud information technology implementation problem definition and solution design in order to achieve the desired program results
- Serves as a cloud information technology implementation advisor and subject matter expert to the client and helps with day-to-day activities of project teams
- Assists in overseeing client communications relating to technical concerns
- May serve as the contractor’s point of contact with the Contracting Officer’s Technical Representative and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and enforcing quality control practices for each project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Experienced in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Leader II	Minimum 6 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
---------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs client engagements relating to cloud information technology implementation strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities

- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of implementation project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other cloud information technology staff or serves in a role of an experience technical expert
- Conducts analysis of work plan completeness, prepares status reports, and support quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Communicates recommendations to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people processes, and technology
- Skilled in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Leader I	Minimum 5 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs client engagements relating to cloud information technology implementation strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, change management principles, and conducts performance measurements
- Serves in the role of implementation project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other cloud information technology staff or serves in a role of an experience technical expert
- Conducts analysis of work plan completeness, prepares status reports, and support quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team
- Communicates recommendations to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people processes, and technology
- Skilled in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Project Lead	Minimum 4 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs client engagements relating to cloud information technology implementation strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution implementation, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Implements business process reengineering, change management principles, and conducts performance measurements
- Serves in the role of implementation project team leader over assigned support areas and instructing, directing, advising, and monitoring the work of other cloud information technology staff or serves in the role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and support quality control practices
- Communicates client expectations to project team
- Communicates recommendations to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people processes, and technology
- Skilled in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field
- .

Cloud Implementation Sr Professional IV	Minimum 4 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Program management support experience, cloud information technology implementation experience, and familiarity with client issues, assistance with design issues, leading and advising client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Contributes to work plan development, reaching engagement milestones, and may lead specific project tasks
- Advises on subtasks of cloud information technology implementation related business and technical needs
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions

- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Adept in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Sr Professional III	Minimum 3 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Program management support experience, cloud information technology implementation experience, and familiarity with client issues, assistance with design issues, leading and advising client teams, analysis of project data, and development of appropriate deliverables
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level analytical correspondent within engagement team
- Contributes to work plan development, reaching engagement milestones, and may lead specific project tasks
- Advises on subtasks of cloud information technology implementation related business and technical needs
- Applies business modeling, process modeling, and business design techniques
- Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables
- Assists with formulating diagnoses through financial or statistical modeling, assesses appropriate alternatives
- Performs analyses and makes diagnoses, as well as defines symptoms and problems
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Adept in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Sr Professional II	Minimum 2 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology implementations, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Provides assistance completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, implementation, and/or program support
- Analyzes business requirements impacted by cloud information technology implementations, and defines applicable tools and innovative solutions including technology, methodology, and solution components

- Completes assigned cloud information technology implementation tasks within the project scope and budget with no oversight, while meeting deliverable requirements
- Serves as a key analytical resource in engagement team
- Assumes responsibility for conducting relevant research, distilling data, and creating reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Proficient in cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Sr Professional I	Minimum 2 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology implementations, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, implementation, and/or program support
- Analyzes business requirements impacted by cloud information technology implementations, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Completes assigned cloud information technology implementation tasks within the project scope and budget with little oversight, while meeting deliverable requirements
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Proficient in cloud information technology implementations projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field
- .

Cloud Implementation Jr Professional III	Minimum 1 year consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------------	------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology implementations, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, implementation, and/or program support
- Analyzes business requirements impacted by cloud information technology implementations, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Analyzes, interprets, extrapolates, projects and models data to reach conclusions
- As assigned, completes cloud implementation assignments independently or with oversight
- Familiar with cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Jr Professional II	Minimum 2 years consulting and/or directly relevant industry experience	Minimum Associate’s Degree or equivalent in a related field
------------------------------------------------	-------------------------------------------------------------------------	-------------------------------------------------------------

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology advisory expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, advisory, and/or program support
- Analyzes business requirements impacted by cloud information technology, and defines applicable tools and innovative solutions including technology, methodology, and solution components
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- As assigned, completes sections of cloud implementation assignments with minimal oversight
- Familiar with cloud information technology implementations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Implementation Jr Professional I	Minimum 1 year consulting and/or directly relevant industry experience	Minimum Associate’s Degree or equivalent in a related field
-----------------------------------------------	------------------------------------------------------------------------	-------------------------------------------------------------

Skills & Expertise:

- Proficient in analysis and defining business needs, cloud information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Assists with completing work plan activities, analyzes relevant data and information, and advises, institutes, and support business solutions
- Provides analytical, implementation, and/or program support
- Conducts research, distills data, and creates reports
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Supports teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- As assigned, completes cloud implementation assignments with oversight
- Familiar with cloud information technology projects or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

3. Cloud Information Technology Operations Services

LABOR CATEGORY	EXPERIENCE	EDUCATION
Cloud Operations Executive III	Minimum 16 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field

Skills & Expertise:

- Executive level management, direction on client engagement, cloud information technology operations and maintenance expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on cloud solution operations strategy and methodology, helps to ensure overall soundness of approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology operations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor’s liaison and point of contact with the Contracting Officer’s Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology operations and maintenance strategies
- Assumes accountability for supervising designated resources and enforcing quality control practices for each cloud project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology operations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Executive II	Minimum 14 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management, direction on client engagement, cloud information technology operations and maintenance expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on cloud solution operations strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology operations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology operations strategies
- Oversees quality control practices for each cloud project
- Maintains responsibility for project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology operations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Executive I	Minimum 11 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management, direction on client engagement, cloud information technology operations and maintenance expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Identifies and advises on cloud solution operations strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology operations advisor to the client
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Maintains responsibility for formulating work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology operations strategies
- Advises on enforcement of quality control practices for each cloud project
- Provides guidance to project reviews and overall contract progress and performance

- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Expert knowledge relating to cloud information technology operations or related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Leader IV	Minimum 10 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management, direction on client engagement, cloud information technology operations and maintenance expertise, experience in project definition and systems analysis, creation of competitive strategies, and integration of global technical solutions
- Proficient in project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectation, and timing
- Oversees identifying and advising on cloud information technology operations strategy and methodology, helps to ensure overall soundness of analytical approach, and is able to suggest alternatives
- Other experience includes coordinating and leading multiple projects and teams, and assisting clients in achieving desired program results
- Serves as a cloud information technology operations advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Assumes responsibility for client communications related to communicating technical concerns
- May serve as the contractor's liaison and point of contact with the Contracting Officer's Technical Representative and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides quality assurance on cloud technology operations strategies
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, process, and technology
- Experienced in cloud information technology operations and related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Leader III	Minimum 8 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Executive level management experience, cloud information technology operations and maintenance expertise, and experience in directing client engagements
- Experience in project definition and systems analysis, and integration of global technical solutions
- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Identifies themes for new cloud information technology solution operations and helps to ensure overall soundness of analytical approach
- Advises executive-level clients on cloud information technology operations problem definition and solution design in order to achieve the desired program results

- Serves as a cloud information technology operations advisor and subject matter expert to the client and helps with day-to-day activities of project teams
- Assists in overseeing client communications relating to technical concerns
- May serve as the contractor’s point of contact with the Contracting Officer’s Technical Representative and delegated government representatives
- Formulates work standards, creating strategic project objectives, and managing client issues and feedback
- Provides assistance with supervising designated resources and enforcing quality control practices for each project
- Assists with project reviews and overall contract progress and performance
- Leads teams providing all components of cloud information technology services including, but not limited to, advise, implement, and operate services of people, processes, and technology
- Experienced in cloud information technology operations and related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Leader II	Minimum 6 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
-----------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs client engagements relating to cloud information technology operations and maintenance strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution operations, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Leads business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of operations project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other cloud information technology staff or serves in a role of an experience technical expert
- Conducts analysis of work plan completeness, prepares status reports, and support quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Communicates recommendations to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people processes, and technology
- Skilled in cloud information technology operations and related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Leader I	Minimum 5 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
----------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs client engagements relating to cloud information technology operations and maintenance strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities

- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution operations, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs
- Leads business process reengineering, change management principles, and conducts performance measurements
- Serves in the role of operations project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other cloud information technology staff or serves in a role of an experience technical expert
- Conducts analysis of work plan completeness, prepares status reports, and support quality control practices
- Performs analyses of client issues, assesses appropriate alternatives, and recommends solutions
- Communicates client expectations to project team
- Communicates recommendations to clients, builds alignment, and manages client relationships
- Maintains technical knowledge within industry and service line
- Manages teams providing all components of cloud technology services including, but not limited to, advise, implement, and operate services of people processes, and technology
- Skilled in cloud information technology operations and related disciplines such as: strategy development, cloud suitability assessment, application development, application rationalization, configuration management, business process analysis, DevSecOps pipeline establishment, information assurance, quality assurance, solutions architecture, systems analysis and engineering, system administration, application and data migration, cybersecurity, test and evaluation, system cutover, organizational modeling, workforce development, resources and facilities management, database planning and design, network services, programming, conversion support, network services project management, and data/records management or a related field

Cloud Operations Project Lead	Minimum 4 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Manages and directs client engagements relating to cloud information technology Operations and maintenance strategy development, system development, and development of engagement work plans, deployment of program criterion, and related activities
- Devises or modifies procedures to solve complex problems, provides guidance and experience on cloud solution operations, engages resources and/or serves as a team leader, performs analyses of client issues, interprets implications of design, and helps to ensure that software design meets business needs

**FINANCIAL MANAGEMENT QUALITY SERVICE MANAGEMENT OFFICE (FM QSMO) CORE
FINANCIAL MANAGEMENT (FM) SOLUTIONS AND IT PROFESSIONAL SERVICES**

Applicable to SINs: 518210FM, 518210FM(RC), 518210FM(STLOC)

Deloitte’s SIN 518210 rate card is comprised of three service lines [(1) Advisory, (2) Implementation and (3) Operations] each with specific Financial Management Solutions and IT Professional Services labor categories and ceiling prices.

1. FM QSMO Advisory Services

FM QSMO Advisory Executive II	Minimum 14 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
--------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing executive level guidance on projects relating to financial management information technology: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Executive level management experience, information technology advisory expertise, and experience in directing client engagements
- Identifies themes capable of being developed into a new IT strategy methodology, helps to ensure overall soundness of analytical approach, and can suggest alternatives
- Coordinates and advises executive-level clients on information technology problem definition and solution design to achieve the desired program results
- Assumes responsibility for client communications relating to technical concerns
- Maintains responsibility for supervising designated resources and enforcing quality control practices for each project
- Defines and reviews the project plans, designs and business and systems analysis
- Performs engineering, financial, program management and marketing analyses required for life cycle support planning and provides quality assurance oversight throughout a project’s life cycle
- Provides program management solutions with emphasis on Quality Assurance and Risk Assessment

FM QSMO Advisory Executive I	Minimum 12 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
-------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing executive level guidance on projects relating to financial management information technology: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Executive level management experience, information technology advisory expertise, and experience in directing client engagements
- Identifies themes capable of being developed into a new IT strategy methodology, helps to ensure overall soundness of analytical approach, and can suggest alternatives
- Coordinates and advises executive-level clients on information technology problem definition and solution design to achieve the desired program results

- Maintains responsibility for supervising designated resources and enforcing quality control practices for each project
- Performs engineering, financial, program management and marketing analyses required for life cycle support planning and provides quality assurance oversight throughout a project's life cycle
- Provides program management solutions with emphasis on Quality Assurance and Risk Assessment
- Maintains responsibility for project reviews and overall contract progress and performance

FM QSMO Advisory Leader V	Minimum 12 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Expert knowledge relating to financial management information technology projects: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Focuses on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Serves as an information technology advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Acts as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Communicates with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages and advises program activities and is a key point of contact with client executives
- Assumes accountability for supervising designated resources and enforcing quality control practices for each project
- Performs analyses required for life cycle support planning
- Deals with overarching issues and coordinating problem solutions
- Oversees the program team and daily operations of development within time frames and budget
- Delivers strategic level client meetings

FM QSMO Advisory Leader IV	Minimum 10 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Expert knowledge relating to financial management information technology projects: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Focuses on program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Serves as an information technology advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Assists in the responsibility for client communications relating to technical concerns
- Acts as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Communicates with client and project managers and management of multiple projects across various industry lines

- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Analyzes client issues and project data, and developing of appropriate deliverables using firm's tools

FM QSMO Advisory Sr Professional I	Minimum of 2 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in financial management information technology concepts, methodologies, and tools: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions
- Provides technical direction, experience and escalation when required
- Delivers presentations and leads client meetings
- Completes project specific tasks within estimated time frames and budget constraints

FM QSMO Advisory Mid Professional II	Minimum of 2 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in financial management information technology concepts, methodologies, and tools: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Proficiency in analysis and defining business needs, information technology advisory expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Helps complete work plan activities, analyzes relevant data and information, and advises, institutes, and supports business solutions
- Completes assigned information technology engagement tasks within the project scope and budget with no oversight, while meeting deliverable requirements
- Assumes responsibility for conducting relevant research, distilling data, creating reports, and presentations for client meetings
- Actively engages consulting tools and methodologies to meet project objectives and complete program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Analyzes business requirements and defining applicable tools and methodologies
- Advises the implementation of business solutions, process improvement diagnoses, process modeling and documentation and benchmarking activities

FM QSMO Advisory Mid Professional I	Minimum of 1 year consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------	---------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in financial management or information technology projects
- Proficiency in analysis and defining business needs, information technology advisory expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Helps complete work plan activities, analyzes relevant data and information, and advises, institutes, and supports business solutions
- Completes assigned information technology engagement tasks within the project scope and budget with no oversight, while meeting deliverable requirements
- Assumes responsibility for conducting relevant research, distilling data, creating reports, and presentations for client meetings
- Advises the implementation of business solutions, process improvement diagnoses, process modeling and documentation and benchmarking activities

FM QSMO Advisory Jr Professional III	Minimum of 1 year consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------	---------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Familiar with financial management or information technology projects
- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology advisory expertise, and has programming experience in one or more languages, and is versed in system testing
- Experience in the following: data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Completes assigned information technology tasks for deliverable requirements with minimal oversight
- Assists project team in meeting program objectives timely and effectively, and contributes to obtaining data and reports for presentations and client meetings
- Assumes responsibility for process documentation and technical soundness
- Contributes to obtaining data and reports for presentations and client meetings
- Conducts research, collects, and distills data

FM QSMO Advisory Jr Professional II	Minimum of 2 years consulting and/or directly relevant industry experience	Minimum Associates' Degree or equivalent in a related field
--------------------------------------------	----------------------------------------------------------------------------	-------------------------------------------------------------

Skills & Expertise:

- Familiar with financial management or information technology projects
- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology advisory expertise, and has programming experience in one or more languages, and is versed in system testing
- Experience in the following: data warehousing, information systems design, financial modeling, and business process improvement documentation
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Completes assigned information technology tasks for deliverable requirements with minimal oversight
- Assists project team in meeting program objectives timely and effectively, and contributes to obtaining data and reports for presentations and client meetings
- Conducts research, collects, and distills data

FM QSMO Advisory Jr Professional I	Minimum of 1 year consulting and/or directly relevant industry experience	Minimum Associates' Degree or equivalent in a related field
-------------------------------------------	---------------------------------------------------------------------------	-------------------------------------------------------------

Skills & Expertise:

- Familiar with financial management or information technology projects
- Performs technical and non-technical analyses on project issues and helps to ensure technical

implementations follow quality assurance metrics, information technology advisory expertise, and has programming experience in one or more languages, and is versed in system testing

- Experience in the following: data warehousing, information systems design, financial modeling, and business process improvement documentation
- Completes assigned information technology tasks for deliverable requirements with minimal oversight
- Conducts research, collects, and distills data

2. FM QSMO Implementation Services

FM QSMO Implementation Executive II	Minimum 14 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
--------------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing executive level guidance on projects relating to financial management information technology: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Executive level management experience, information technology implementation expertise, and experience in directing client engagements
- Identifies themes capable of being implemented into a new IT strategy methodology, helps to ensure overall soundness of analytical approach, and can suggest alternatives
- Coordinates and advises executive-level clients on information technology problem definition and implementation design to achieve the desired program results
- Assumes responsibility for client communications relating to technical concerns
- Maintains responsibility for supervising designated resources and enforcing quality control practices for each project
- Defines and reviews the project plans, designs and business and systems implementation
- Provides program management implementation solutions with emphasis on Quality Assurance and Risk Assessment

FM QSMO Implementation Executive I	Minimum 12 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-------------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing executive level guidance on projects relating to financial management information technology: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Executive level management experience, information technology implementation expertise, and experience in directing client engagements
- Identifies themes capable of being implemented into a new IT strategy methodology, helps to ensure overall soundness of analytical approach, and can suggest alternatives
- Coordinates and advises executive-level clients on information technology problem definition and implementation design to achieve the desired program results
- Maintains responsibility for supervising designated resources and enforcing quality control practices for each project
- Performs engineering, financial, program management and marketing analyses required for life cycle support planning and provides quality assurance oversight throughout a project's life cycle
- Provides program management implementation solutions with emphasis on Quality Assurance and Risk Assessment
- Maintains responsibility for project reviews and overall contract progress and performance

FM QSMO Implementation Leader V	Minimum 12 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Expert knowledge relating to financial management information technology implementation projects: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Focuses on program implementation and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Serves as an information technology implementation advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Acts as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Communicates with client and project managers and management of multiple projects across various industry lines
- Understands the client's risk, business objectives, and quality goals
- Maintains responsibility for managing and implementing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages and implements program activities and is a key point of contact with client executives
- Assumes accountability for supervising designated resources and enforcing quality control practices for each project
- Performs analyses required for life cycle support planning
- Oversees the program team and daily operations of development within time frames and budget
- Delivers strategic level client meetings

FM QSMO Implementation Leader IV	Minimum 10 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
-----------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Expert knowledge relating to financial management information technology implementation projects: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Focuses on implementing program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Serves as an information technology implementation advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Assists in the responsibility for client communications relating to technical concerns
- Acts as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives

- Maintains responsibility for managing and implementing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages and implements program activities and is a key point of contact with client executives

FM QSMO Implementation Leader I	Minimum 6 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------	-------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Adept in leading projects relating to financial management information technology: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Focuses on implementing program delivery and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and

- management of project resources
- Proficient in implementing on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Serves as an information technology implementation advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Understands the client’s risk, business objectives, and quality goals
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages and implements program activities and is a key point of contact with client executives

FM QSMO Implementation Project Lead	Minimum of 5 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
--------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Extensive knowledge relating to financial management information technology projects: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Manages and directs on client engagements and advises on enterprise technology strategy development, system development and implementation, development of engagement work plans, deployment of program criterion, and related activities
- Implements business process reengineering, developing financial models, orchestrating change management principles, and conducting performance measurements
- Serves in the role of implementation advisory project team leader over assigned support areas, often filling the position of project team lead and instructing, directing, advising, and monitoring the work of other IT staff or serves in a role of an experienced technical expert
- Conducts analysis of work plan completeness, prepares status reports, and supports quality control practices
- Communicates client expectations to project team, and escalates issues to senior level project staff as needed
- Maintains technical knowledge within industry and service line
- Provides a communication channel between the client and the engagement team
- Delivers presentations and leads client meetings
- Completes project specific tasks within estimated time frames and budget constraints

FM QSMO Implementation Sr Professional V	Minimum of 6 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
-------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in financial management information technology implementation solutions: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget
- Serves as a senior-level implementation correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and completes project-specific tasks and client presentations
- Applies business modeling, process modeling, and business design techniques
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions for implementation
- Defines and implements sub-tasks of a project’s business and technical needs

- Analyzes client issues and project data, and developing of appropriate deliverables using firm’s tools
- Directs junior staff on project requirements and tasks

FM QSMO Implementation Sr Professional IV	Minimum of 5 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
--------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in financial management information technology implementation solutions: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and implementation advisory support, and is focused on providing high performance work
- Serves as a senior-level implementation correspondent within engagement team
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and completes implementation tasks and client presentations
- Applies business modeling, process modeling, and business design techniques
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions for implementation
- Analyzes client issues and project data, and developing of appropriate deliverables using firm’s tools
- Directs junior staff on project requirements and tasks

FM QSMO Implementation Sr Professional III	Minimum of 4 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
---------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in financial management information technology implementation solutions: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members
- Provides senior-level analytical, program, and implementation support, and is focused on providing high performance work
- Assumes responsibility for contributing to work plan development, reaching engagement milestones, and completes project-specific tasks and client presentations
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions for implementation
- Analyzes client issues and project data, and developing of appropriate deliverables using firm’s tools

FM QSMO Implementation Sr Professional II	Minimum of 3 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
--------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in financial management information technology implementation concepts, methodologies, and tools
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Demonstrates skills by performing status reports, verifying work plan completeness, and communicating with team members
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops

conclusions for implementation

- Analyzes client issues and project data, and developing of appropriate deliverables using firm’s tools

FM QSMO Implementation Sr Professional I	Minimum of 2 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
-------------------------------------------------	----------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Proficient in financial management information technology implementation concepts, methodologies, and tools
- Proficient in the use of firm tools and enablers to better support the overall objectives and goals of the program objectives
- Performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions for implementation
- Provides technical direction, experience and escalation when required
- Delivers presentations and leads client meetings
- Completes project specific tasks within estimated time frames and budget constraints

FM QSMO Implementation Mid Professional II	Minimum of 2 years consulting and/or directly relevant industry experience	Minimum Associates’s Degree or equivalent in a related field
---------------------------------------------------	----------------------------------------------------------------------------	--------------------------------------------------------------

Skills & Expertise:

- Proficient in financial management or information technology implementation concepts, methodologies, and tools
- Proficiency in analysis and defining business needs, information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Helps complete work plan activities, analyzes relevant data and information, and advises, implements, and supports business solutions
- Completes assigned information technology implementation tasks within the project scope and budget with no oversight, while meeting deliverable requirements
- Assumes responsibility for conducting relevant research, distilling data, creating reports, and presentations for client meetings
- Actively engages consulting tools and methodologies to meet project objectives and implement program management activities
- Maintains responsibility for quality assurance practices and fostering completion and accuracy of system documentation
- Analyzes business requirements and defining applicable tools and methodologies
- Advises the implementation of business solutions, process improvement diagnoses, process modeling and documentation and benchmarking activities

FM QSMO Implementation Mid Professional I	Minimum of 1 year consulting and/or directly relevant industry experience	Minimum Associate’s Degree or equivalent in a related field
--------------------------------------------------	---------------------------------------------------------------------------	-------------------------------------------------------------

Skills & Expertise:

- Proficient in financial management or information technology implementation projects
- Proficiency in analysis and defining business needs, information technology implementation expertise, applying methodologies, support of program management, exposure to client issues, and development of project deliverables
- Helps complete work plan activities, analyzes relevant data and information, and advises, institutes, and supports business solutions
- Completes assigned information technology implementation tasks within the project scope and budget with no oversight, while meeting deliverable requirements
- Assumes responsibility for conducting relevant research, distilling data, creating reports, and presentations for client meetings
- Advises the implementation of business solutions, process improvement diagnoses, process modeling and documentation and benchmarking activities

FM QSMO Implementation Jr Professional III	Minimum of 1 year consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------------------	---------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Familiar with financial management or information technology implementation projects
- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology advisory expertise, and has programming experience in one or more languages, and is versed in system testing
- Experience in the following: data warehousing, information systems design, financial modeling, and business process improvement documentation
- Serves as an information technology implementation resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Completes assigned information technology implementation tasks for deliverable requirements with minimal oversight
- Assists project team in meeting program objectives timely and effectively, and contributes to obtaining data and reports for presentations and client meetings
- Assumes responsibility for process documentation and technical soundness
- Contributes to obtaining data and reports for presentations and client meetings
- Completes assigned engagement tasks for deliverable requirements
- Conducts research, collects, and distills data

FM QSMO Implementation Jr Professional II	Minimum of 2 years consulting and/or directly relevant industry experience	Minimum Associates' Degree or equivalent in a related field
--------------------------------------------------	----------------------------------------------------------------------------	-------------------------------------------------------------

Skills & Expertise:

- Familiar with financial management or information technology implementation projects
- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology advisory expertise, and has programming experience in one or more languages, and is versed in system testing
- Serves as an information technology implementation resource on engagement team
- Analyzes data and systems architecture, creates designs, and implements information systems solutions
- Completes assigned information technology implementation tasks for deliverable requirements with minimal oversight
- Assists project team in meeting program objectives timely and effectively, and contributes to obtaining data and reports for presentations and client meetings
- Conducts research, collects, and distills data

FM QSMO Implementation Jr Professional I	Minimum of 1 year consulting and/or directly relevant industry experience	Minimum Associates' Degree or equivalent in a related field
-------------------------------------------------	---------------------------------------------------------------------------	-------------------------------------------------------------

Skills & Expertise:

- Familiar with information technology implementation projects
- Performs technical and non-technical analyses on project issues and helps to ensure technical implementations follow quality assurance metrics, information technology advisory expertise, and has programming experience in one or more languages, and is versed in system testing
- Serves as an information technology implementation resource on engagement team
- Completes assigned information technology implementation tasks for deliverable requirements with minimal oversight
- Conducts research, collects, and distills data

3. FM QSMO Operations Services

FM QSMO Operations Executive II	Minimum 14 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
----------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing executive level guidance on projects relating to financial management

information technology: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions

- Executive level management experience, financial management information technology operations expertise, and experience in directing client engagements
- Identifies themes capable of being implemented into a new IT strategy methodology, helps to ensure overall soundness of analytical approach, and can suggest alternatives
- Coordinates and advises executive-level clients on information technology problem definition and solution design to achieve the desired program results
- Assumes responsibility for client communications relating to technical concerns
- Maintains responsibility for supervising designated resources and enforcing quality control practices for each project
- Defines and reviews the project plans, designs and business and systems implementation
- Provides program management solutions with emphasis on Quality Assurance and Risk Assessment

FM QSMO Operations Executive I	Minimum 12 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
---------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Experienced in providing executive level guidance on projects relating to financial management information technology: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Executive level management experience, financial management information technology operations expertise, and experience in directing client engagements
- Identifies themes capable of being implemented into a new IT strategy methodology, helps to ensure overall soundness of analytical approach, and can suggest alternatives
- Coordinates and advises executive-level clients on information technology problem definition and implementation design to achieve the desired program results
- Maintains responsibility for supervising designated resources and enforcing quality control practices for each project
- Performs engineering, financial, program management and marketing analyses required for life cycle support planning and provides quality assurance oversight throughout a project's life cycle
- Provides program management solutions with emphasis on Quality Assurance and Risk Assessment
- Maintains responsibility for project reviews and overall contract progress and performance

FM QSMO Operations Leader V	Minimum 12 years consulting and/or directly relevant industry experience	Minimum Bachelor's Degree or equivalent in a related field
------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Expert knowledge relating to financial management information technology operations projects: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions
- Focuses on program operations and technical integration, ability to drive IT Strategy and planning changes at the executive levels, oversight of key information technology enablers, and management of project resources
- Proficient in advising on project estimation and resource planning efforts and in resolving project issues, such as technical compatibility, client expectations, and timing
- Serves as a financial management information technology operations advisor and subject matter expert to the client and guides day-to-day activities of project teams
- Acts as the contractor's liaison and point of contact with the Contracting Officer's Technical and delegated government representatives
- Communicates with client and project managers and management of multiple projects across various industry lines

- Understands the client’s risk, business objectives, and quality goals
- Maintains responsibility for managing technical solutions, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables
- Manages program operations and is a key point of contact with client executives
- Assumes accountability for supervising designated resources and enforcing quality control practices for each project
- Performs analyses required for life cycle support planning
- Oversees the program team and daily operations of development within time frames and budget
- Delivers strategic level client meetings

FM QSMO Operations Leader IV	Minimum 10 years consulting and/or directly relevant industry experience	Minimum Bachelor’s Degree or equivalent in a related field
-------------------------------------	--------------------------------------------------------------------------	------------------------------------------------------------

Skills & Expertise:

- Expert knowledge relating to financial management information technology operations projects: financial management software suites in a cloud environment; services, applications, modules, or related disciplines including technology architecture and design, database, infrastructure, quality assurance and cybersecurity that help agencies adopt financial management quality service management solutions

4. HUMAN RESOURCES TECHNOLOGY SERVICES – ADVISORY

LABOR CATEGORY	EXPERIENCE	EDUCATION
HRT Advisory Executive III (TA)	Minimum 14 years consulting or related experience	Bachelor's degree or equivalent in a related field

Skills & Expertise:

- Experienced in executive level management and strategic advising to client engagements
- Possesses expert knowledge of establishing internal programs including but not limited to procedures for attracting, recruiting, assessing, and selecting highly qualified, productive employees with appropriate skills and competencies
- Skilled in reviewing strategic plans and business strategies, organizational and infrastructural designs, and project deliverables to maintain a standard of consistency and quality throughout a project's life cycle

Responsibilities:

- Provides strategic human resource technology consulting services – tackling critical and complex problems through the development of plans of action to help organizations meet their goals, partnering with clients to make clear data-driven choices to drive growth and enterprise value
- Guides critical technological, business, and operational areas to provide complete human resources life-cycle support (“cradle to grave”) to enable and achieve their missions to manage risk, schedule, cost, and scope more effectively; oversees projects based upon the Government specifications and standards
- Leads the development of a recommendation for the Human Resources future-state roadmap
- Advises and oversees all phases of human capital related projects from systems design, implementation, maintenance, and operations to final completion
- Advises on the development and implementation of human resource strategy to provide solutions to client issues including, but not limited to, workforce finance, scheduling, methodology, tools, and solution components
- Provides the primary strategy interface with client; collaborates in the definition, implementation, and execution or organization policies, practices, procedures, and attainment of operating goals
- Accountable for the completion of human resources related activities within estimated time frames and budget constraints

HRT Advisory Executive II (TA)	Minimum 12 years consulting or related experience	Bachelor's degree or equivalent in a related field

EXPERIENCE / EDUCATION SUBSTITUTION EQUIVALENCY*

Deloitte Consulting’s labor category descriptions identify the functional responsibilities and education and experience requirements associated with each labor category. These requirements are a reference guide to the types of experience and educational background of typical personnel in each labor category.

Personnel must meet the defined labor category minimum qualifications or substitutions noted below. The labor category qualifications do not set an education or experience ceiling.

EDUCATION SUBSTITUTION EQUIVALENCY	EXPERIENCE SUBSTITUTION EQUIVALENCY	OTHER SUBSTITUTION EQUIVALENCY
High School Diploma		- General Educational Development (GED) OR - Vocational Academic Certificate
Associate’s	2 years of experience	- Professional Certification/License OR - Registered Apprenticeship
Bachelor’s	4 years of experience	- Professional Certification/License OR - Registered Apprenticeship and 2 years of experience OR - Associate’s and 2 years of experience
Master’s	6 years of experience	- Professional Certification/License Registered Apprenticeship and more than 2 years of experience OR - Associate’s and 4 years of experience OR - Bachelor’s and 2 years of experience
Doctorate (PhD or JD)	10 years of experience	- Bachelor’s and 6 years of experience OR - Master’s and 4 years of experience

Supporting notes:

- Education/Experience Substitution Equivalency table is applicable to all labor categories.
- Education, experience, and/or other equivalencies may be substituted for each other.
- Each year of experience may be substituted for 1 year of education, and vice versa.
- Successful completion of higher education which has not yet resulted in a degree may be counted as 1 year of experience for each year of college completed.
- Professional Certifications/Licenses, Registered Apprenticeships, and Vocational Training may be substituted for experience or education.

SINs –

54151ECOM – Electronic Commerce and Subscription Services

SIN 518210C – Cloud Computing & Cloud Related IT Professional Services

CentralSight™ is a Deloitte Consulting solution that enables clients to capture leading indicators and prevent supply chain disruptions before they occur, saving money, protecting brand, and radically increasing supply chain integrity. The solution is comprised of required and optional components and is configured for the specific customer need. CentralSight™ is complemented by the professional services that Deloitte Consulting already offers on its GSA MAS contract.

The Ordering Activity’s use of the Licensed Software is subject to the license terms and conditions of Deloitte Consulting’s Subscription License Agreement, which shall supersede all other terms and conditions, and which must be incorporated into any resulting contract award.

The CentralSight™ solution is comprised of 5 items -

1. Setup & Training –		
Part No.	Product Name	Description
SE0001	Set Up & Training	Backend production team new project spin-up, communication, coordination, management. Client platform instance creation and initial configuration and personnel training. *Required.
2. Subscription License –		
Part No.	Product Name	Description
SL0001AL	Annual Subscription License	Subscription to Deloitte’s CentralSight™ Platform, providing access to supply chain illuminations, dashboard views, supplier profiles, supplier risks, and monitoring and alerting on suppliers [up to the quantity purchased via the Suppliers Under Management Tiers below]. Includes hosting and technical support for the length of the subscription. Platform subscription must be purchased before additional items below. Supply Chain Illuminations and other Managed Service analysis, support, and deliverables are purchased via Professional Services fees.
SL0001MTH	Monthly Subscription License	Subscription to Deloitte’s CentralSight™ Platform, providing access to supply chain illuminations, dashboard views, supplier profiles, supplier risks, and monitoring and alerting on suppliers [up to the quantity purchased via the Suppliers Under Management Tiers below]. Includes hosting and technical support for the length of the subscription. Platform subscription must be purchased before additional items below. Supply Chain Illuminations and other Managed Service analysis, support, and deliverables are purchased via Professional Services fees. *Required: Minimum three-month purchase.
3. Dashboard User Access -		
Part No.	Product Name	Description
DA0001AL	Dashboard User Access	User License to access CentralSight™ Platform. User License is issued to a named individual and may only be used by that named individual. *At a minimum, 1 Dashboard User Access license is required with the purchase of a Subscription License.
DA0001MTH	Dashboard User Access	User License to access CentralSight™ Platform. User License is issued to a named individual and may only be used by that named individual. *At a minimum, 1 Dashboard User Access license is required with the purchase of a Subscription License. *Required: Minimum three-month purchase.

4. Suppliers Under Management -		
Part No.	Product Name	Description
SM0250AL	Tier 1: 1 - 250 suppliers	Monitoring & Alerting dashboard continuously monitoring & alerting on 1 to 250 suppliers for indicators of potential supply chain disruptions. *Required (must select 1 of the 4 Suppliers Under Management tiers with the purchase of a Subscription License).
SM0500AL	Tier 2: 251 - 500 suppliers	Monitoring & Alerting dashboard continuously monitoring & alerting on 251 to 500 suppliers for indicators of potential supply chain disruptions. *Required (must select 1 of the 4 Suppliers Under Management tiers with the purchase of a Subscription License).
SM1000AL	Tier 3: 501 - 1000 suppliers	Monitoring & Alerting dashboard continuously monitoring & alerting on 501 to 1000 suppliers for indicators of potential supply chain disruptions. *Required (must select 1 of the 4 Suppliers Under Management tiers with the purchase of a Subscription License).
SM2000AL	Tier 4: 1001 - 2000 suppliers	Monitoring & Alerting dashboard continuously monitoring & alerting on 1001 to 2000 suppliers for indicators of potential supply chain disruptions. *Required (must select 1 of the 4 Suppliers Under Management tiers with the purchase of a Subscription License).
SM0250MTH	Tier 1: 1 - 250 suppliers	Monitoring & Alerting dashboard continuously monitoring & alerting on 1 to 250 suppliers for indicators of potential supply chain disruptions. *Required (must select 1 of the 4 Suppliers Under Management tiers with the purchase of a Subscription License). *Required: Minimum three-month purchase.
SM0500MTH	Tier 2: 251 - 500 suppliers	Monitoring & Alerting dashboard continuously monitoring & alerting on 251 to 500 suppliers for indicators of potential supply chain disruptions. *Required (must select 1 of the 4 Suppliers Under Management tiers with the purchase of a Subscription License). *Required: Minimum three-month purchase.
SM1000MTH	Tier 3: 501 - 1000 suppliers	Monitoring & Alerting dashboard continuously monitoring & alerting on 501 to 1000 suppliers for indicators of potential supply chain disruptions. *Required (must select 1 of the 4 Suppliers Under Management tiers with the purchase of a Subscription License). *Required: Minimum three-month purchase.
SM2000MTH	Tier 4: 1001 - 2000 suppliers	Monitoring & Alerting dashboard continuously monitoring & alerting on 1001 to 2000 suppliers for indicators of potential supply chain disruptions. *Required (must select 1 of the 4 Suppliers Under Management tiers with the purchase of a Subscription License). *Required: Minimum three-month purchase.
5. Supplier Analysis Report -		
Part No.	Product Name	Description
SAR00T1	Tier 1	Supplier analysis to generate report that includes data within the following categories: Financial, Foreign Ownership Control or Influence (FOCI), Political and Regulatory, Compliance, Technology and Cybersecurity, Manufacturing and Supply, Transportation and Distribution, Product Quality/Design.
SAR00T2	Tier 2	Supplier analysis to generate report that includes data within the following categories: Financial, Foreign Ownership Control or Influence (FOCI), Political and Regulatory, Compliance, Technology and Cybersecurity, Manufacturing and Supply, Transportation and Distribution, Product Quality/Design, Adverse Media, Legal Activity, Merger & Acquisition

		Activity, Foreign Joint Venture & Research Efforts, Domestic & Foreign Supply Chain Partners.
--	--	-----------------------------------------------------------------------------------------------

The Supplier Analysis Reports are an optional component to the solution. The setup & training, subscription license, dashboard user access, supplier under management, along with Deloitte Consulting professional services are required components of the solution and must be purchased together. The Deloitte Consulting professional services are those that are available in Section 4.0.

SECTION 6.0 – GSA IT CATEGORY INFRASTRUCTURE TERMS AND CONDITIONS

SIN 54151ECOM Supplemental Terms and Conditions – Deloitte Consulting CentralSight™.

The Ordering Activity's use of the Licensed Software is subject to the license terms and conditions of Deloitte Consulting's Subscription License Agreement, which shall supersede all other terms and conditions, and which must be incorporated into any resulting contract award.

SIN 518210C - Cloud and Cloud-Related IT Professional Services Specific Information for Offerors

The prices, terms and conditions stated under Special Item Number (SIN) 518210C Cloud Computing Services (i.e. IaaS, etc.) and Cloud Related IT Professional Services apply exclusively to commercially available Cloud Computing Services (i.e. IaaS, etc.) and Cloud-Related Professional Services within the scope of this Information Technology Schedule to include i) Cloud Services only (i.e. IaaS, etc.); ii) Cloud computing-related IT professional services only; or iii) Cloud Services (i.e. IaaS, etc.) and supporting cloud computing-related IT professional services.

This SIN provides ordering activities with access to Cloud (i.e. IaaS, etc.) technical services that run-in cloud environments and meet the NIST Definition of Cloud Computing Essential Characteristics.

The scope of this SIN is limited to cloud capabilities provided entirely as a “pay as you go/ consumption based” service and cloud- related IT professional services (i.e. IaaS, etc.). Hardware, software and other artifacts acquired to supporting the physical construction of a private or other cloud are out of scope for this SIN.

Sub-categories in scope for this SIN are the three NIST Service Models: Software as a Service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service (IaaS). See **Table 1** for a representation of the scope and sub-categories.

See **Table 1** for a representation of the scope and sub-categories.

Table 1: Cloud Computing Services (IaaS/PaaS/SaaS)

SIN Description	Sub-Categories
<ul style="list-style-type: none"> • Commercially available cloud computing services • Meets the National Institute for Standards and Technology (NIST) Definition of Cloud Computing (SP 800-145) essential characteristics • Open to all deployment models (private, public, community or hybrid), vendors specify deployment models 	<ol style="list-style-type: none"> 1. Software as a Service (SaaS): Consumer uses provider’s applications on cloud infrastructure. Does not manage/control platform or infrastructure. Limited application level configuration may be available. 2. Platform as a Service (PaaS): Consumer deploys applications onto cloud platform service using provider-supplied tools. Has control over deployed applications and some limited platform configuration but does not manage the platform or infrastructure. 3. Infrastructure as a Service (IaaS): Consumer provisions computing resources. Has control over OS, storage, platform, deployed applications and some limited infrastructure configuration, but does not manage the infrastructure.

1) DESCRIPTION OF CLOUD COMPUTING SERVICES (IaaS/PaaS/SaaS) AND PRICING

- a) The information provided below is designed to assist Offerors to categorize cloud computing services and provide complete descriptions.
- b) In addition to standard pricing requirements, all pricing models must have the core capability to meet the NIST Essential Cloud Characteristics¹, particularly with respect to on-demand self-service, while allowing alternate variations at the task order level at agency discretion, pursuant to the guidance on the NIST Essential Characteristics.

Table 2: Cloud Service Description Requirements (below) summarizes the additional Offeror provided description requirements for services proposed under the Cloud Computing Services (IaaS/PaaS/SaaS). All mandatory description requirements must be complete, and adequate according to evaluation criteria.

- 1) The NIST Service Model provides sub-categories for SIN 518210C (Cloud SIN) and is strongly encouraged, and offerors are not required to submit sub-categories. Contractors may select the single service model most closely corresponding to the specific service offering.

¹ <https://nvlpubs.nist.gov/nistpubs/legacy/sp/nistspecialpublication800-145.pdf>

- 2) If a sub-category is selected, it will be evaluated with respect to the NIST Service Model definitions and guidelines in “Guidance for Contractors.”

Table 2: Cloud Service Description Requirements

Requirement: Provide a brief written description of how the proposed cloud computing services (IaaS/PaaS/SaaS) satisfies each individual essential NIST	
Sub-Categories - Cloud Computing Services	NIST Essentials Requirements
<p>Infrastructure as a Service (IaaS): Consumer provisions computing resources. Has control over OS, storage, platform, deployed applications and some limited infrastructure configuration, but does not manage the infrastructure,</p>	<ol style="list-style-type: none"> 1. On-demand self-service. The consumer shall unilaterally provision computing capabilities, such as server time and network storage 2. Broad network access. Capabilities will be available over the network and accessed through standard mechanisms that promote use by heterogeneous thin or thick client platforms (e.g., mobile phones, tablets, laptops, and workstations). 3. Resource pooling. The provider’s computing resources will be pooled to serve multiple consumers using a multi-tenant model, with different physical and virtual resources dynamically assigned and reassigned according to consumer demand. 4. Rapid elasticity. Capabilities will be elastically provisioned and released, in some cases automatically, to scale rapidly outward and inward commensurate with demand. 5. Measured service. Cloud systems automatically control and optimize resource use by leveraging a metering capability at some level of abstraction appropriate to the type of service (e.g., storage, processing, bandwidth, and active user accounts). Resource usage will be monitored, controlled, and reported.
<p>Platform as a Service (PaaS): Consumer deploys applications onto cloud platform service using provider-supplied tools. Has control over deployed applications and some limited platform configuration but does not manage the platform or infrastructure.</p>	<ol style="list-style-type: none"> 1. On-demand self-service. The consumer shall unilaterally provision computing capabilities, such as server time and network storage 2. Broad network access. Capabilities will be available over the network and accessed through standard mechanisms that promote use by heterogeneous thin or thick client platforms (e.g., mobile phones, tablets, laptops, and workstations). 3. Resource pooling. The provider’s computing resources will be pooled to serve multiple consumers using a multi-tenant model, with different physical and virtual resources dynamically assigned and reassigned according to consumer demand. 4. Rapid elasticity. Capabilities will be elastically provisioned and released, in some cases automatically, to scale rapidly outward and inward commensurate with demand. 5. Measured service. Cloud systems automatically control and optimize resource use by leveraging a metering capability at some level of abstraction appropriate to the type of service (e.g., storage, processing, bandwidth, and active user accounts). Resource usage will be monitored, controlled, and reported.
<p>Software as a Service (SaaS): Consumer uses provider’s applications on cloud infrastructure. Does not manage/control platform or infrastructure. Limited application level configuration may be available.</p>	<ol style="list-style-type: none"> 1. On-demand self-service. The consumer shall unilaterally provision computing capabilities, such as server time and network storage 2. Broad network access. Capabilities will be available over the network and accessed through standard mechanisms that promote use by heterogeneous thin or thick client platforms (e.g., mobile phones, tablets, laptops, and workstations). 3. Resource pooling. The provider’s computing resources will be pooled to serve multiple consumers using a multi-tenant model, with different physical and virtual resources dynamically assigned and reassigned according to consumer demand. 4. Rapid elasticity. Capabilities will be elastically provisioned and released, in some cases automatically, to scale rapidly outward and inward commensurate with demand. 5. Measured service. Cloud systems automatically control and optimize resource use by leveraging a metering capability at some level of abstraction appropriate to the type of service (e.g., storage, processing, bandwidth, and active user accounts). Resource usage will be monitored, controlled, and reported.

2) GUIDANCE FOR OFFERORS

This section offers guidance for interpreting Table 2 (above), including the NIST essential cloud characteristics, service models, and deployment models. This section is for offeror’s reference only.

Offeror specific definitions of cloud computing characteristics and models or significant variances from the NIST essential characteristics or models will not be considered in the scope of this SIN or accepted in response to evaluation factors. The only applicable cloud characteristics, service model/sub-categories, and deployment models for this SIN will be drawn from NIST SP 800-145. Services qualifying for listing as cloud computing services (IaaS/PaaS/SaaS) under this SIN must substantially satisfy the essential characteristics of cloud computing as documented in the NIST Definition of Cloud Computing SP 800-145.²

Both Cloud service model (IaaS/PaaS/SaaS) and deployment model (public, etc.) designations must align with NIST definitions. Guidance is offered in this document on making the most appropriate selection.

General Guidance

NIST's essential cloud characteristics provide a consistent metric for whether a service is eligible for inclusion in this SIN. It is understood that due to legislative, funding, and/or other constraints, Government entities cannot always leverage a cloud service to the extent that all NIST essential characteristics are commercially available. For the purposes of SIN 518210C (Cloud SIN), meeting the NIST essential characteristics is determined by whether each essential capability of the commercial service is available for the service, not whether the Ordering Activity actually requests or implements the capability. The guidance in Table 3: Guidance on Meeting NIST Essential Characteristics (below) offers examples of how services might or might not be included based on the essential characteristics, and how the Contractor should interpret the characteristics in light of current Government contracting processes.

² <http://csrc.nist.gov/publications/nistpubs/800-145/SP800-145.pdf>

Table 3: Guidance on Meeting NIST Essential Characteristics

Characteristic	Capability	Guidance
On-demand self-service	<ul style="list-style-type: none"> • Ordering activities can directly provision services without requiring Contractor intervention • This characteristic is typically implemented via a service console or programming interface for provisioning 	<p>Guidance varies on how to implement on-demand provisioning at this time.</p> <p>Ordering activities may approach on-demand in a variety of ways, including “not-to-exceed” limits, or imposing monthly or other appropriate payment cycles on what are essentially on demand services.</p> <p>Services under this SIN must be capable of true on-demand self-service, and ordering activities and Contractors must negotiate how they implement on-demand capabilities in practice at the task order level:</p> <ul style="list-style-type: none"> • Ordering activities must specify their procurement approach and requirements for on-demand service • Contractors must propose how they intend to meet the approach
Broad Network Access	<ul style="list-style-type: none"> • Ordering activities are able to access services over standard agency networks • Service can be accessed and provisioned using standard devices such as browsers on computers, tablets, and mobile phones 	<ul style="list-style-type: none"> • Broad network access must be available without significant qualification and in relation to the deployment model and security domain of the service • Contractors must specify any ancillary activities, services or equipment required to access cloud services, or integrate cloud with other cloud or non-cloud networks and services.

<p>Resource Pooling</p>	<ul style="list-style-type: none"> ● Pooling distinguishes cloud services from simple offsite hosting ● Ordering activities draw resources from a common pool maintained by the Contractor ● Resources may have general characteristics such as regional location 	<ul style="list-style-type: none"> ● The cloud service must draw from a pool of resources and provide an automated means for the Ordering Activity to dynamically allocate them ● Manual allocation, e.g., manual operations at a physical server farm where Contractor staff configure servers in response to Ordering Activity requests, does not meet this requirement ● Similar concerns apply to software and platform models; automated provisioning from a pool is required ● Ordering activities may request dedicated physical hardware, software, or platform resources to access a private cloud deployment service. However, the provisioned cloud resources must be drawn from a common pool and automatically allocated on request.
<p>Rapid Elasticity</p>	<ul style="list-style-type: none"> ● Rapid provisioning and de-provisioning commensurate with demand 	<ul style="list-style-type: none"> ● Rapid elasticity is a specific demand-driven case of self-service ● ‘Rapid’ should be understood as measured in minutes and hours, not days or weeks ● Elastic capabilities by manual request, e.g., via a console operation or programming interface call, are required ● Automated elasticity, which is driven dynamically by system load, etc. is optional. Contractors must specify whether automated demand-driven elasticity is available and the general mechanisms that drive the capability

<p>Measured Service</p>	<ul style="list-style-type: none"> Measured service should be understood as a reporting requirement that enables an Ordering Activity to control their use in cooperation with self-service 	<ul style="list-style-type: none"> Guidance for on-demand self-service applies to measured service as well, e.g., rapid elasticity must be technically available but ordering activities and Contractors may mutually designate other contractual arrangements Regardless of specific contractual arrangements, reporting must indicate actual usage, be continuously available to the Ordering Activity, and provide meaningful metrics appropriate to the service measured Contractors must specify that measured service is available and the general sort of metrics and mechanisms available The goal of the measured service requirement is to ensure Ordering Activities realize the full benefit of “pay as you go” consumption models. For all offers of IaaS/PaaS/SaaS the appropriate maximum measured increment of pricing shall be no more than one month per user, or some other equivalent discrete measurement that provides the Government with the advantage of frequent (every month or less) “pay as you go” metering cycles For all offers of IaaS/PaaS/SaaS a pricing increment of greater than one month may be offered under SIN 518210C only if a pricing increment that is one month or less pricing offer is also made for that particular item
-------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Inheriting Essential Characteristics

Cloud Services (IaaS/PaaS/SaaS) may depend on other cloud services, and cloud service models such as PaaS and SaaS are able to inherit essential characteristics from other cloud services that support them. For example, a PaaS can inherit the broad network access made available by the IaaS it runs on, and in such a situation would be fully compliant with the broad network access essential characteristic. Cloud Services (IaaS/PaaS/SaaS) inheriting essential characteristics must make the inherited characteristic fully available at their level of delivery to claim the relevant characteristic by inheritance.

Inheriting characteristics does not require the inheriting provider to directly bundle or integrate the inherited service, but it does require a reasonable measure of support and identification. For example, the Ordering Activity may acquire an IaaS service from “Provider A” and a PaaS service from “Provider B.”

The PaaS service may inherit broad network access from “Provider A,” but must identify and support the inherited service as an acceptable IaaS provider.

Assessing Broad Network Access

Typically broad network access for public deployment models implies high bandwidth access from the public internet for authorized users. In a private cloud deployment internet access might be considered broad access, as might be access through a dedicated shared high bandwidth network connection from the Ordering Activity, in accordance with the private nature of the deployment model.

Resource Pooling and Private Cloud

All cloud resource pools are finite and only give the appearance of infinite resources when sufficiently large, as is sometimes the case with a public cloud. The resource pool supporting a private cloud is typically smaller with more visible limits. A finite pool of resources purchased as a private cloud service qualifies as resource pooling so long as the resources within the pool can be dynamically allocated to the ultimate users of the resource, even though the pool itself appears finite to the Ordering Activity that procures access to the pool as a source of dynamic service allocation.

1) NIST Service Model

The Contractor may optionally document the service model of cloud computing (e.g. IaaS, PaaS, SaaS) that most closely describes their offering, using the definitions in The NIST Definition of Cloud Computing SP 800-145. Contractors should carefully select the NIST service model most closely corresponding to each service offered. Contractors should not invent, proliferate, or select multiple cloud service model sub-categories to distinguish their offerings, because ad-hoc categorization prevents consumers from comparing similar offerings. Instead, vendors should fully make use of the existing NIST categories possible. The following guidance is offered for the proper selection of service models.

NIST’s service models provide this SIN with a set of consistent sub-categories to assist ordering activities in locating and comparing Cloud services (IaaS/PaaS/SaaS) of interest. The service model is primarily concerned with the nature of the service offered and the staff and activities most likely to interact with the service. Contractors should select a single service model most closely corresponding to their proposed service based on the guidance below. It is understood that cloud services can technically incorporate multiple service models and the intent is to provide the single best categorization of the service.

For example, in this SIN, an offering commercially marketed by a Contractor as “Storage as a Service” would be properly characterized as Infrastructure as a Service (IaaS), storage being a subset of infrastructure. Services commercially marketed as “LAMP as a Service” or “Database as a Service” would be properly characterized under this SIN as Platform as a Service (PaaS), as they deliver two kinds of platform services. Services commercially marketed as “Travel

Facilitation as a Service” or “Email as a Service” would be properly characterized as species of Software as a Service (SaaS) for this SIN.

However, Contractors can and should include appropriate descriptions (including commercial marketing terms) of the service in the full descriptions of the service’s capabilities.

When choosing between equally plausible service model sub-categories, Contractors should consider several factors:

- a) **Visibility to the Ordering Activity:** Service model sub-categories in this SIN exist to help Ordering Activities match their requirements with service characteristics. Contractors should select the most intuitive and appropriate service model from the point of view of an Ordering Activity.
- b) **Primary Focus of the Cloud Service (IaaS/PaaS/SaaS):** Services may offer a mix of capabilities that span service models in the strict technical sense. For example, a service may offer both IaaS capabilities for processing and storage, along with some PaaS capabilities for application deployment, or SaaS capabilities for specific applications. In a service mix situation, the Contractor should select the service model that is their primary focus. Alternatively, contractors may choose to submit multiple service offerings for the SIN, each optionally and separately subcategorized.
- c) **Ordering Activity Role:** Contractors should consider the operational role of the Ordering Activity’s primary actual consumer or operator of the service. For example, services most often consumed by system managers are likely to fit best as IaaS; services most often consumed by application deployers or developers as PaaS, and services most often consumed by business users as SaaS.
- d) **Lowest Level of Configurability:** Contractors can consider IaaS, PaaS, and SaaS as an ascending hierarchy of complexity, and select the model with the lowest level of available Ordering Activity interaction. As an example, virtual machines are an IaaS service often bundled with a range of operating systems, which are PaaS services. The Ordering Activity usually has access to configure the lower level IaaS service, and the overall service should be considered IaaS. In cases where the Ordering Activity cannot configure the speed, memory, network configuration, or any other aspect of the IaaS component, consider categorizing as a PaaS service.

Cloud management and cloud broker services should be categorized based on their own characteristics and not those of the other cloud services that are their targets. Management and broker services typically fit the SaaS service model, regardless of whether the services they manage are SaaS, PaaS, or IaaS. Use Table 3 to determine which service model is appropriate for the cloud management or cloud broker services or, alternately, choose not to select a service model for the service.

The guidance in Table 4: Guidance on Mapping to NIST Service Models (below) offers examples of how services might be properly mapped to NIST service models and how a Contractor should interpret the service model sub-categories.

Table 4: Guidance on Mapping to NIST Service Models

Service Model	Guidance
Infrastructure as a Service (IaaS)	<p>Select an IaaS model for service-based equivalents of hardware appliances such as virtual machines, storage devices, routers, and other physical devices.</p> <ul style="list-style-type: none"> • IaaS services are typically consumed by system or device managers who would configure physical hardware in a non-cloud setting • The principal customer interaction with an IaaS service is provisioning then configuration, equivalent to procuring and then configuring a physical device <p>Examples of IaaS services include virtual machines, object storage, disk block storage, network routers and firewalls, and software defined networks.</p> <p>Gray areas include services that emulate or act as dedicated appliances and are directly used by applications, such as search appliances, security appliances, etc. To the extent that these services or their emulated devices provide direct capability to an application they might be better classified as Platform services (PaaS). To the extent that they resemble raw hardware and are consumed by other platform services they are better classified as IaaS.</p>

Platform as a Service (PaaS)

Select a PaaS model for service based equivalents of complete or partial software platforms. For the purposes of this classification, consider a platform as a set of software services capable of deploying all or part of an application.

- A complete platform can deploy an entire application. Complete platforms can be proprietary or open source
- Partial platforms can deploy a component of an application which, combined with other components, make up the entire deployment
- PaaS services are typically consumed by application deployment staff whose responsibility is to take a completed agency application and cause it to run on the designated complete or partial platform service
- The principal customer interaction with a PaaS service is deployment, equivalent to deploying an application or portion of an application on a software platform service
- A limited range of configuration options for the platform service may be available

Examples of complete PaaS services include:

- A Linux/Apache/MySQL/PHP (LAMP) platform ready to deploy a customer PHP application
- A Windows .Net platform ready to deploy a .Net application
- A custom complete platform ready to develop and deploy a customer application in a proprietary language
- A multiple capability platform ready to deploy an arbitrary customer application on a range of underlying software services

The essential characteristic of a complete PaaS is defined by the customer's ability to deploy a complete custom application directly on the platform.

PaaS includes partial services as well as complete platform services.

Illustrative examples of individual platform enablers or components include:

- A database service ready to deploy a customer's tables, views, and procedures
- A queuing service ready to deploy a customer's message definitions
- A security service ready to deploy a customer's constraints and target applications for continuous monitoring

The essential characteristic of an individual PaaS component is the customer's ability to deploy their unique structures and/or data onto the component for a partial platform function.

Note that both the partial and complete PaaS examples all have two things in common:

- They are software services, which offer significant core functionality out of the box; and
- They must be configured with customer data and structures to deliver results.

As noted in IaaS, operating systems represent a gray area in that OS is definitely a platform service, but is typically bundled with IaaS infrastructure. If your service provides an OS but allows for interaction with infrastructure, please sub-categorize it as IaaS. If your service “hides” underlying infrastructure, consider it as PaaS.

Software as a Service (SaaS)

Select a SaaS model for service-based equivalents of software applications.

- SaaS services are typically consumed by business or subject-matter staff who would interact directly with the application in a non-cloud setting
- The principal customer interaction with a SaaS service is actual operation and consumption of the application services that the SaaS service provides.

Some minor configuration may be available, but the scope of the configuration is limited to the scope and then the permissions of the configuring user. For example, an agency manager might be able to configure some aspects of the application for their agency but not all agencies. An agency user might be able to configure some aspects for themselves, but not everyone in their agency. Typically, only the Contractor would be permitted to configure aspects of the software for all users.

Examples of SaaS services include email systems; business systems of all sorts, such as travel systems, inventory systems, etc.; wiki's; websites or content management systems; management applications that allow a customer to manage other cloud or non-cloud services; and, in general, any system where customers interact directly for a business purpose.

Gray areas include services that customers use to configure other cloud services, such as cloud management software, cloud brokers, etc. In general, these sorts of systems should be considered SaaS, per guidance in this document.

2) Deployment Model

Deployment models (i.e., private, public, community, or hybrid) are not restricted at the SIN level and any specifications for a deployment model are the responsibility of the Ordering Activity.

Multiple deployment model selection is permitted, but at least one model must be selected. The guidance in Table 4 offers examples of how services might be properly mapped to NIST deployment models and how the contractor should interpret the deployment model characteristics. Contractors should take care to select the range of NIST deployment models most closely corresponding to each service offered.

Note that the scope of this SIN does not include hardware or software components used to construct a cloud, only cloud capabilities delivered as a service, as noted in the Scope section.

Table 5: Guidance for Selecting a Deployment Model

Deployment Model	Guidance
Private Cloud	The service is provided exclusively for the benefit of a definable organization and its components; access from outside the organization is prohibited. The actual services may be provided by third parties and may be physically located as required, but access is strictly defined by membership in the owning organization.
Public Cloud	The service is provided for general public use and can be accessed by any entity or organization willing to contract for it.
Community Cloud	The service is provided for the exclusive use of a community with a definable shared boundary such as a mission or interest. As with private cloud, the service may be in any suitable location and administered by a community member or a third party.
Hybrid Cloud	The service is composed of one or more of the other models. Typically hybrid models include some aspect of transition between the models that make them up, for example, a private and public cloud might be designed as a hybrid cloud where events like increased load permit certain specified services in the private cloud to run in a public cloud for extra capacity, e.g., bursting.

Supplemental Terms and Conditions.

In addition to the below terms relevant to all Cloud Infrastructure Services, Ordering Activities are required to purchase the relevant Cloud Provider Support (as defined in Section 2.1, collectively referred to as “CSP Support”). Contractor will provide the additional Contractor Support as defined below.

The following terms and conditions always apply, and supersede in the event of a conflict with respect, to Cloud Infrastructure Services purchased by or on behalf of an Ordering Activity under an executed Task Order with Contractor.

- 1) Ordering Activity and its End Users may access and use the Cloud Services solely in accordance with the terms of this Schedule and an executed Task Order. Such Cloud Services will be provided in accordance with the applicable CSP Terms, which Ordering Activity shall comply with at all times.
- 2) Without modifying the rights and obligations provided under such CSP Terms, the rights and obligations afforded the CSP shall also extend to Contractor.
- 3) The Ordering Activity is responsible for indicating the cloud computing services requirements unique to the Ordering Activity. Additional requirements should not contradict existing SIN or IT MAS Terms and Conditions.
- 4) Ordering Activity may specify the Cloud Services region in which its and its End User’s Materials will be stored. Ordering Activity consents to the storage of its and its End User’s Materials in, and transfer of the Materials into, the region selected. Ordering Activities should include (as applicable) Terms & Conditions to address Pricing, Security, Data Ownership, Geographic Restrictions, Privacy, SLAs, Accessibility, etc.
- 5) Unless otherwise specified in a Task Order, by the selection and provision of specific Cloud Services, Ordering Activity acknowledges that the security standards, pricing, privacy, and service level agreements, outlined by a particular CSP for the Cloud Services will apply and agrees that such standards meet Ordering Activity’s functional and security needs.
- 6) Ordering Activity represents that it has all applicable rights and consents to allow Contractor and the CSP to collect, process, and use the Material uploaded, or otherwise provided, to the Contractor or the CSP from the Ordering Activity, including any personal data.
- 7) Unless otherwise specified in a Task Order, Ordering Activity is responsible for the proper configuration of the ordered Cloud Services in accordance with a CSP’s Service Terms.
- 8) In no event shall Contractor’s liability in connection with a Task Order exceed the value of the Task Order.
- 9) To the extent any Cloud Service and/or associated products provided to Ordering Activity hereunder constitute inventory within the meaning of section 471 of the Internal Revenue Code, such Cloud Service or associated product is provided to Ordering Activity by Deloitte Consulting as agent for its product company subsidiary, Deloitte Consulting Product Services LLC, on the terms contained herein.
- 10) Definitions:
 - a. “End User” means any authorized individual or entity that directly or indirectly through another user accesses the Cloud Service. Ordering Activity is responsible for its End Users and shall ensure such End User’s compliance with these terms.
 - b. “CSP Terms” includes the rights and restrictions of a particular Cloud Service as outlined by the relevant CSP.

- For AWS, the CSP Terms include:
 - Amazon Web Services Customer Access Terms and any additional terms included in the Task Order. [AWS+Public+Sector+Access+Policy.pdf](#)
 - Additional Security Information applicable to the Cloud Services:
<https://aws.amazon.com/whitepapers/#security>
 - c. “Cloud Service Provider” or “CSP” refers to the original manufacturer of the Cloud Service which is being resold by Contractor under an executed Task Order.
 - d. “Materials” means software (including machine images), data, text, audio, video, images or other content.

SECTION 7.0 BLANKET PURCHASE AGREEMENT

Ordering activities may establish BPAs under any schedule contract to fill repetitive needs for supplies or services. BPAs may be established with one or more schedule contractors. The number of BPAs to be established is within the discretion of the ordering activity establishing the BPAs and should be based on a strategy that is expected to maximize the effectiveness of the BPA(s). In determining how many BPAs to establish, consider:

- The scope and complexity of the requirement(s);
- The need to periodically compare multiple technical approaches or prices;
- The administrative costs of BPAs; and
- The technical qualifications of the schedule contractor(s).

Establishment of a single BPA, or multiple BPAs, shall be made using the same procedures outlined in 8.405-1 or 8.405-2. BPAs shall address the frequency of ordering, invoicing, discounts, requirements (e.g. estimated quantities, work to be performed), delivery locations, and time.

When establishing multiple BPAs, the ordering activity shall specify the procedures for placing orders under the BPAs.

Establishment of a multi-agency BPA against a Federal Supply Schedule contract is permitted if the multi-agency BPA identifies the participating agencies and their estimated requirements at the time the BPA is established.

Ordering from BPAs:

Single BPA. If the ordering activity establishes one BPA, authorized users may place the order directly under the established BPA when the need for the supply or service arises.

Multiple BPAs. If the ordering activity establishes multiple BPAs, before placing an order exceeding the micro-purchase threshold, the ordering activity shall:

- Forward the requirement, or statement of work and the evaluation criteria, to an appropriate number of BPA holders, as established in the BPA ordering procedures; and
- Evaluate the responses received, make a best value determination (see 8.404(d)), and place the order with the BPA holder that represents the best value.

BPAs for hourly rate services. If the BPA is for hourly rate services, the ordering activity shall develop a statement of work for requirements covered by the BPA. All orders under the BPA shall specify a price for the performance of the tasks identified in the statement of work.

Duration of BPAs. BPAs generally should not exceed five years in length, but may do so to meet program requirements. Contractors may be awarded BPAs that extend beyond the current term of their GSA Schedule contract, so long as there are option periods in their GSA Schedule contract that, if exercised, will cover the BPA's period of performance.

Review of BPAs:

The ordering activity that established the BPA shall review it at least once a year to determine whether:

- The schedule contract, upon which the BPA was established, is still in effect;
- The BPA still represents the best value (see 8.404(d)); and
- Estimated quantities/amounts have been exceeded and additional price reductions can be obtained.

The ordering activity shall document the results of its review.

SECTION 8.0 USA COMMITMENT TO PROMOTE SMALL BUSINESS PARTICIPATION PROCUREMENT PROGRAMS

Preamble

Deloitte Consulting LLP provides commercial products and services to ordering activities. We are committed to promoting participation of small, small disadvantaged and women-owned small businesses in our contracts. We pledge to provide opportunities to the small business community through reselling opportunities, mentor-protégé programs, joint ventures, teaming arrangements, and subcontracting.

Commitment

To actively seek and partner with small businesses.

To identify, qualify, mentor and develop small, small disadvantaged and women-owned small businesses by purchasing from these businesses whenever practical.

To develop and promote company policy initiatives that demonstrates our support for awarding contracts and subcontracts to small business concerns.

To undertake significant efforts to determine the potential of small, small disadvantaged and women-owned small business who will supply products and services to our company.

To ensure procurement opportunities are designed to permit the maximum possible participation of small, small disadvantaged and women-owned small businesses.

To attend business opportunity workshops, minority business enterprise seminars, trade fairs, procurement conferences, etc., that will seek to identify and increase small businesses with whom to partner.

To publicize in our marketing publications our interest in meeting small businesses that may be interested in subcontracting opportunities.

We signify our commitment to work in partnership with small, small disadvantaged and women-owned small businesses to promote and increase their participation in ordering activity contracts. To accelerate potential opportunities please contact: Rebecca Thompson at rethompson@deloitte.com.

Deloitte

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee, and its network of member firms, each of which is a legally separate and independent entity. Please see www.deloitte.com/about for a detailed description of the legal structure of Deloitte Touche Tohmatsu Limited and its member firms. Please see www.deloitte.com/us/about for a detailed description of the legal structure of Deloitte LLP and its subsidiaries. Certain services may not be available to attest clients under the rules and regulations of public accounting.

Deloitte Consulting LLP is committed to protecting the information of its clients. In this regard, Deloitte Consulting LLP and its affiliates currently maintain physical, electronic and procedural safeguards that are designed to (1) protect the security and confidentiality of our client's information in Deloitte Consulting LLP's possession, (2) protect against anticipated threats or hazards to the security or integrity of such information, and (3) protect against unauthorized access to or use of such information that could result in substantial harm or inconvenience to our clients.
