

Section 508 Compliance Checklist
Web Content Accessibility Standards (Sub-Part B, 1194.22)

Web Site: _____ URL address: _____

Web Content Accessibility Standards - Choose the appropriate answer	Yes - Meets Standard	No - Cannot Meet Standard	N/A - Feature Not Present
1. (a) Is there a text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).			
2. (b) For any multimedia presentation, are there equivalent alternatives and are they synchronized with the presentation?			
3. (c) Is all information conveyed on the Web pages designed with color also available without color (e.g. from context or markup)?			
4. (d) Are documents organized so they are readable without requiring an associated style sheet?			
5. (e) Are redundant text links provided for each active region of a serve-side image map?			
6. (f) Are client-side image maps provided, instead of server-side image maps (except where the regions cannot be defined with an available geometric shape)?			
7. (g) Are row and column headers identified for data tables?			
8. (h) Is markup used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers?			
9. (i) Are frames titles with text that facilitates frame identification and navigation?			
10. (j) Are pages designed to avoid causing the screen to flicker with a frequency greater than 2Hz and lower than 55Hz?			
11. (k) Is a text-only page, with equivalent information or functionality provided? (This is to ensure that a web site complies when compliance cannot be accomplished in any other way). Does the content of the text-only page updated whenever the primary page changes?			
12. (l) If pages use scripting language to display content, or to create interface elements, is the information provided by the script identified with functional text that can be read by assistive technology?			
13. (m) If a web page requires that an applet plug-in or other application be present on the client system to interpret page content, does the page provide a link to a plug-in or applet that complies with §1194.21 the Technical Standards for Software Applications and Operating System (a) through (l)?			
14. (n) If electronic forms are designed to be completed on-line, does the form allow people using assistive technology to access the information, field elements and functionality required for

completion and submission of the form, including all direction and cues?			
15. (o) Is a method provided that permits users to skip repetitive navigation links?			
16. (p) If a timed response is required, is the user alerted and given sufficient time to indicate more time is required?			

Note to 1194.22:

1. The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5, 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium:

Section 1194.22 Paragraph	WCAG 1.0 Checkpoint
(a)	1.1
(b)	1.4
(c)	2.1
(d)	6.1
(e)	1.2
(f)	9.1
(g)	5.1
(h)	5.2
(i)	12.1
(j)	7.1
(k)	11.4

2. Paragraphs (l), (m), (n), (o), and (p) of this section are different from WCAG 1.0. Web pages that conform to WCAG 1.0, level A (i.e., all priority 1 checkpoints) must also meet paragraphs (l), (m), (n), (o), and (p) of this section to comply with this section. WCAG 1.0 is available at <http://www.w3.org/TR/1999/WAI-WEBCONTENT-19990505>.
