

Nexus

Digital Nerve Center™

Keep your finger on the pulse of your business.

Nexus is a suite of innovative digital services designed to help you transform the management and optimization of your organization’s risk and control programs.

Nexus is designed to help you transform the way your organization manages and optimizes your business processes, risks, and controls through our digital nerve center and can provide the following outcomes:

Enhanced Risk Management

Elevate risk acumen and insights utilizing machine learning (ML) and artificial intelligence (AI).

Cost savings

Drive better efficiency through decreasing manual processes and providing rapid results

Risk Sensing

Provide insight and foresight prior to issues happening to help improve resiliency

Governance & Oversight

Promote greater sense of ownership, visibility and accountability across the organization

Workforce Elevation

Increase professional productivity while focusing on exceptions and core risk management

Testing and Monitoring

Modernize outdated controls evaluation programs while improving quality

Organizational Agility

Build elasticity in your workforce through management of digital and co-sourced FTEs

Customer Experience

Enhance delivery by helping to mitigate operational issues and improve processing, creating an enhanced experience for your customer

How to get started

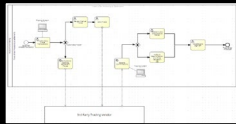

Meeting your requirements at the place and juncture where you need it the most.

Nexus is a suite of services and capabilities that can be brought to bear at...

Designing the future

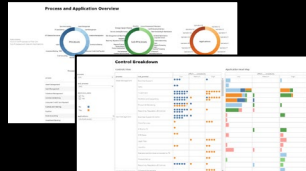

Assessing the environment

End-to-End Process Mapping

Leverage Deloitte's trained professionals, starter kits, and accelerators to develop a holistic approach for understanding risks, controls, and business processes.

Rapid Assessment

Facilitate the interrogation of processes and controls, using an interactive framework to identify and prioritize candidates for digitization. The service can provide perspectives on where organizations are able to drive value and answer the question "where do I start" on the path toward modernization and digitization.

Building the future

Optimizing the environment

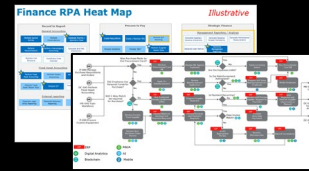

Digitization of Risk & Controls

Analytics & AI

Deloitte's centralized and scalable assets within the CortexAI™ Platform infuse data analytics and automation to help modernize the control design, testing, and supervision capabilities at an organization. The addition of AI/ML models help organizations to predictively sense risks and trigger corrective actions in near-real time.

Workflow Automation

Fundamentally change the way in which work is completed – integrate databases and end user computing (EUCs) across various source systems to reduce risk and increase accountability via persona-based dashboards and reporting.

Realizing the future

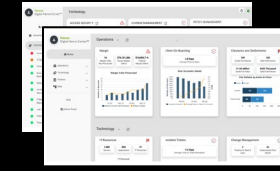

Enabling new ways of working

Visualization & Design

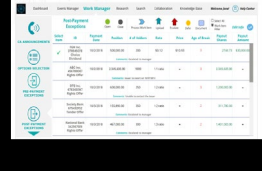

Explore the art of the possible by leveraging the personal profile to create wire frameworks and rapid prototypes.

Business Command Center

Empower executives to make informed decisions by aggregating operations, risk, technology, and finance performance information into analytical insights and visualizations.

Productivity Workbench

Integrate key workstation capabilities such as daily overview, metrics, task management, messages, knowledge guides, policy and procedures center, workflow, and analytics.
