

## RESILIENT: **CONTROLLER**

### Resilient Podcast Series

## How resilient is your organization?

**Host:**

**Katie Glynn**, Partner, Center for Controllershship, Deloitte & Touche LLP

**Guest:**

**Charles Carrington**, Partner, Deloitte & Touche LLP

**Katie Glynn:** Hello, resilient leaders. I'm Katie Glynn, and I am thrilled to welcome you to the resilient controller podcast, where we embark on a journey of discovery through engaging and authentic conversations. Thank you for tuning in and being a part of this community. In every episode, we're on a quest to unveil the true essence of resilience—that magical quality that helps us bounce back stronger than before. We're not just talking about it, but we're diving deep into real, candid conversations that spark inspiration and fuel that inner fire to stay resilient on our journeys.

Today, we have our very own Charles Carrington joining from Deloitte. Charles has a unique background blending environmental engineering and accounting, currently specializing in sustainability and ESG reporting.

**Charles Carrington:** The biggest challenge on this is reporting items that are not within your direct control. If you are that organization and you're procuring your raw materials, how do you calculate how much carbon dioxide was emitted into the atmosphere?

**Katie Glynn:** Organizations are shifting organizational priorities from profit-centric to purpose-driven. And because of this, the role of the controller is shifting. I hope you enjoyed this preview. To hear more, check out the full episode on your favorite podcast app, keyword "resilient".
