

Solvast | Insight™

Solvast | Insight is a feature-rich solution for integrating disparate data sources into visualizable business intelligence.

Making sense of the ever-increasing torrent of data has become more challenging—and important—than ever before. Deloitte's Solvast | Insight is an ad-hoc reporting solution designed to allow users to interact with data via dynamically customizable reports, delivering greater reporting transparency and enhanced analytics. It integrates data from multiple sources into a single, efficient data warehouse. The resulting business-centric analytics can be consumed in a variety of ways, freeing users to spend more time benefiting from their data instead of endlessly collecting and organizing it.

Solvast | Insight may be used in tandem with other Solvast™ products to provide more informed decision making.

Visualize

- Pre-constructed and ad-hoc reporting from a meaningful, actionable, business-friendly data source
- Informative data visualizations for ease of use and rapid consumption
- Responsive reports, designed for high volumes of data

Integrate

- Designed to work effectively with many commonly used reporting tools and services
- Built with Microsoft SQL Server Analysis Services, a service usually bundled into the same SQL Server license many businesses already use

Standardize

- Single source of data for Solvast products, which can also be extended to include outside sources
- Asynchronous data logistics and processing
- Central data validation and sourcing *
- Quality control and consistent value propagation across the enterprise *

* Expected in 2018

Complementary products and services

- **Solvast | Accounting™** – A financial accounting and reporting software package for portfolios of financial instruments for investment managers and fund administrators.
- **Solvast | ALLL+™** – A current expected credit loss (CECL)-ready solution designed to help financial institutions address the industry challenges associated with the allowance for loan and lease losses (ALLL).
- **Solvast | Capital™** – A stress-testing, reporting, and analytical software tool used by banking institutions for capital planning.
- **Solvast | Compliance™** – A rules-based compliance engine that provides flexible, user-configurable calculations for CLO collateral managers/trustees and alternative investment managers.
- **Solvast | Digitize™** – A full service platform for intelligent automation of data extraction and document management to significantly reduce the need for manual processing.
- **Solvast | Forecast™** – A solution designed to forecast discounted cash flows for financial instruments based on a variety of user-defined assumptions.
- **Solvast | LDC™** – An accounting and financial calculation and reporting solution for acquisitions of loans and distressed debt portfolios under FASB ASC 310-20 (formerly FAS 91) and FASB ASC 310-30 (formerly SOP 03-3)
- **Solvast | Performance™** – An interactive module that provides cross-portfolio and multi-currency performance reporting for CLO collateral managers/trustees and alternative investment managers.
- **Solvast | Portfolio™** – A multi-asset class portfolio administration and reporting solution for asset managers, alternative investment funds, trustees, and fund administrators.
- **Solvast | TDR™** – A solution for the accounting and financial calculation and reporting needs associated with troubled debt restructuring under FASB ASC 310-40
- **ABS Suite™** – A solution of choice for asset-backed issuers, servicers, and trustees around the world, ABS Suite is a powerful structured finance and covered bond program administration system.
