Deloitte's Financial Technology team, a leader in the financial software solutions market, has developed Solvas|Portfolio, a multi-asset class portfolio administration and reporting solution for asset managers, alternative investment funds, trustees, fund administrators, and agent banks. Already a leading collateralized loan/debt obligation (CLO/CDO) administration solution for the asset management and trustee market for over a decade, Solvas|Portfolio (together with Solvas|Compliance™, formerly known as CDO Suite™) has evolved into a comprehensive software solution for the asset management and financial institution community.

Designed as a diverse portfolio administration, collateral tracking, and reporting tool, Solvas|Portfolio is used by a large array of leading financial institutions, including hedge fund and asset managers; hedge fund administrators; syndicated, corporate, or real estate loan administrative agents; and agent or trustee banks. Features include:

- Global asset master with portfolio-level overrides
- Detailed support for a broad array of collateral, including bonds; factor-based securities; asset-backed securities; syndicated, corporate, or real estate loans; credit default swaps; and equities
- Multiple payment-in-kind (PIK) calculation methodologies
- Pro rata and non-pro rata trading with purchase lot tracking and global or portfolio trading wizards
- Loan Syndications and Trading Association (LSTA) and Loan Market Association (LMA) trading conventions for par/near-par and distressed trades, including detailed delayed compensation calculations
- Global, cross-portfolio processing of principal and interest transactions and cash receipts
- Contract-level interest calculations and accruals
- Multi-currency support
- Support for portfolio and asset level swaps
- Expected vs. actual transaction reporting
- Unlimited user-defined fields
- Robust library of standard reports
- Full historical reporting, as of any date
- Data import/export and comparison tools
- User activity logging
- User access control available at multiple levels
- A Web-native user interface
- Centralized, relational database design
- Support for industry-standard reconciliation files and interfaces
- Whether a start-up fund manager or one of the world's largest trustees, Solvas|Portfolio was designed for the asset management industry's needs. The result: an easy-to-use, transparent, and comprehensive portfolio administration system.
