

Solvast|Digitize is a full-service platform for intelligent automation of data extraction and document management to significantly reduce the need for manual processing.

As the value of information increases, it is critical to have a scalable, efficient, and economical solution for the extraction of data. Deloitte's Solvast|Digitize introduces a premium service solution that delivers rapid, cost effective, and efficient data extraction and document processing, supporting both semi-structured and unstructured documents. Built on leading automation and data extraction technologies coupled with the experience of Deloitte's Financial Technology team, Solvast|Digitize delivers a high-quality document digitization service.

This end-to-end service includes document receipt services; a portal to view, download, and review/reconcile documents; data distribution; and a service dashboard. Some common applications of the Solvast|Digitize service include receiving and digitizing:

- Transactional documents, such as loan notices, trade confirmations, payment instructions, etc.
- Tax documents, such as property tax notices
- Vendor invoices
- Claim reports
- Data transition to support migrations or blockchain conversions

The flexibility of this offering allows the application of the Solvast|Digitize service to a variety of use cases across industries, facilitating quality data extraction without significant capital expenditure.

Solvast|Digitize service features:

- Intelligent automation accurately and rapidly processes and extracts data from documents
- Ability to search, view, and download documents upon receipt and throughout digitization process via a document portal
- Customizable and flexible data extraction, including data validation and required/ optional data specification
- Extracted data is attached to processed document as metadata tags
- Interactive dashboard with processing statistics
- User-defined data entry to supplement, categorize, and/or review digitized documents
- Significantly reduced human data entry
- Human document review, as needed, by Deloitte data specialists to supplement automated data extraction

- Ongoing data quality controls
- Learning capabilities to improve data extraction accuracy and timeliness
- Support for downstream system integration, as applicable
