

Mind over matter

How financial professionals can leverage advanced technologies to elevate their roles

Automation and advanced technologies continue to move finance toward a digital future, allowing professionals to focus less on transactional activities and more on analytics and insights. In collaboration with IMA® (Institute of Management Accountants), our survey¹ revealed that, in order to elevate its role as a more strategic business partner, finance will need to balance human and machine-based competencies while achieving relevance and resilience through the four As of future-ready professionals: analytical, adaptive, agile, and anticipatory.

Running the numbers and providing context

What actions can you take next?

Create an end-to-end, **agile digital strategy** that can flexibly adapt with the **evolution of finance**.

Implement technologies that focus on routine, transactional tasks to **elevate talent** to be more strategic.

Upskill talent with competencies to cultivate data-driven, analytical thinking to **deliver deeper insights**.

Consider **flexible work arrangements** to successfully access, curate, engage, and develop top talent.

How can improving data infrastructure, implementing automation, and increasing technical and analytical skills create new opportunities in this ongoing partnership?
