The Middle East CIO  
Programme

# The Middle East CIO Programme

Technology is becoming a driving force in the transformation of most companies and new generation CIOs must be ready for what's coming next.

Deloitte's CIO Programme supports leading IT executives to always be one step ahead. With market-leading insights into technical trends, professional development programs and transition labs, as well as peer-to-peer networking with executives, we ensure that CIOs are well informed and properly positioned to act.

## CIO Programme mission

**Inform:** Provide comprehensive, CIO focused insights to help CIOs achieve business career goals.

**Develop:** Help CIOs nurture talent and prepare promising leaders for increasing levels of responsibility.

**Connect:** Connect CIOs with peers and leaders in and outside of the CIO community

# Next Generation CIO Academy

## Start ahead

Our Next Generation CIO Academy is a unique, often career-changing experience that helps prepare promising IT executives for a future CIO role. Attendees are nominated by their organisation's current CIO with the goal of developing leadership potential in rising IT professionals. The Academy provides a highly experiential curriculum and unparalleled networking opportunities. Sessions are held annually across the Middle East.

### Preparing future CIO's

Today's CIOs serve in a far greater capacity than they once did.

IT and digitalisation permeates every aspect of businesses, and CIOs are key decision-makers, leaders in their organisations who are held to high standards—and are expected to set high standards.

For new CIOs to take the reins successfully on day one, early preparation is essential.

### Build new relationships and skills for success

The Academy experience is framed around three pillars of CIO success: leadership, influence, and competence. Delivered over three days, the Academy curriculum is both intense and thorough. It provides executives with an opportunity for preparation, self-reflection, and hands-on scenario planning related to key aspects of the CIO agenda.

The faculty is uniquely positioned to deliver this curriculum. It consists of C-suite executives, analysts, authors, university professors, attorneys, and senior Deloitte Middle East partners.

### A network beyond the Academy

The Academy provides participants with an opportunity to build meaningful relationships with peers from similar organisations across industries and geographies. Each cohort has the opportunity to meet again at an alumni get-together which takes place once a year in Switzerland. By invitation only.

# CIO Transition Lab

## Plan ahead

CIOs across the globe are being called upon to fill expanded leadership roles. They increasingly have to oversee other critical operations, including information technology and human resource issues of their organisations.

That is why we created a powerful CIO Transition Lab experience—to help newly appointed CIOs, including those with prior CIO experiences, make efficient and effective transitions. By invitation only.

The agenda focuses on the three most important resources CIOs should consider managing during their transitions: personal and organisational time management, talent in the organisation, and critical stakeholder relations.

The CIO Transition Lab helps CIOs as they create a tangible 180-day work plan with four work streams:

1. Define and communicate priorities
2. Assess and develop a talent strategy
3. Understand and influence specific stakeholders
4. Frame tangible actions to execute priorities

### **A single day to map the first six months of your journey**

Our CIO Transition Lab is a one-day experience based on our extensive research on CIO transitions.

### **The benefits**

Participants can expect a personalised workshop experience in an intimate environment. The agenda will include a detailed assessment of the priorities, talent and stakeholders, to enable them to build a tangible outcome in the form of a full report - including a 180-day action plan to translate the strategic objectives into concrete, time bound actions.

# CIO Insights

Think ahead

## Tech Trends

Deloitte's annual Tech Trends report identifies key trends that are likely to transform businesses in the next 18 to 24 months, with insights around strategy, risk, and finance implications that can empower technology leaders, business leaders, and board members.

## CIO Articles

As businesses become increasingly digital, the chief information officer has the power to influence not just technology implementations and decisions, but the business as a whole. To help them navigate the changing landscape, CIO Insider offers CIOs actionable business insights backed up with technical knowledge and research.

## CIO Journal

Deloitte Insights for CIOs couples broad business insights with deep technical knowledge to help executives drive business and technology strategy, support business transformation, and enhance growth and productivity.

Through fact-based research, technology perspectives and analyses, case studies and more, Deloitte Insights for CIOs informs the essential conversations in global, technology-led organisations.
