Wave 37: November 24 – November 30, 2022

Visit the interactive dashboard for more insights

Financial wellbeing sentiment withstands persisting inflation pressure, middle east is ahead of the curve

Financial wellbeing sentiment has remained highly consistent over the past three months. Globally, 8 in 10 remained concerned about rising prices; in the middle-east this proportion is down to 5 in 10.

The percentage of respondents voicing concerns about making upcoming payments, level of savings, and other aspects of day-to-day finances have remained identical to September as a global average; while in the middle-east the situation is on an improving trends.

This sentiment could be interpreted as resilience and growth despite headwinds.

Vehicle purchase intentions rebound

Global Vehicle Purchase Index (VPI) grew this month compared to the last. Two of the middle-eastern countries under study i.e. KSA and UAE are the growth engines as they are ranked 2nd and 3rd respectively across 24 countries.

Leisure travel intentions level off

Leisure travel intentions finally leveled off in November following drops in recent months. In the middle-east, the intention is still lower than what it was 6 months ago. However, improvement over the last month would definitely give confidence to transportation and hospitality sector as they look forward to busy festive season.

Shoppers continued to engage in cost-saving behaviors, middle easterners are not willing to make fundamental tradeoffs

Most of the global consumers are engaging in cost-saving behaviors to mitigate the pressure from rising prices. The trend is somewhat opposite in the middle-east as the inflationary pressure is relatively less in the region.

As a result, we see higher number of consumers shopping with confidence and not opting for trade-offs and saving costs. However, compared to September, a greater number of middle-eastern consumers are putting time & effort to plan their purchases.

Spending intentions see improvement

Alongside some improved economic optimism, spending intentions increased in November.

Spending intentions improved across discretionary and non-discretionary spending. Still, they were most robust on the more discretionary side, with recreation & entertainment, leisure travel, restaurants, and other categories all seeing similar gains.

**Anxiety Drivers**

“Over the past week, have you felt anxious or worried about any of the below mentioned factors?”

- **Saudi Arabian** consumers felt more anxious than what they did in the previous month, led by the increase in anxiety about personal family matters and the climate change.
- **Emirati** consumer’s net anxiety remained at the same level as that of previous month and slightly above the global average.
- A third of the consumers in both the middle eastern countries under study i.e. Saudi Arabia ad UAE felt anxious because of the climate change and its impact on them.

Financial Wellbeing

% of respondents

Present

Security
- Have money left over at the end of the month
- Financial situation worsened over past year
- Concerned about making upcoming payments

Freedom of Choice
- Delaying large purchases
- Concerned about credit card debt
- Can afford to spend on things that bring me joy

Future

Security
- Concerned about level of savings
- Can afford large, unexpected expenses
- Expect income to be the same/higher in one year

Freedom of Choice
- Expect financial situation to improve within 1 year
- Progressing towards financial goal
- Will have financial means to live best life in 5 years

Key Takeaways

- **Present Security:** Most of the consumers seemed to be comfortable with their current financial situation, better than where they were couple of months back.

- **Present Freedom of Choice:** More than half feel that they can afford to spend on things that brings them joy, relative improvement compared to September 2022 data.

- **Future Security:** Nearly 4 in 10 feel they are well prepared to absorb future financial shock.

- **Future Freedom of Choice:** Middle eastern consumer’s optimism about future financial situation is continuously improving.

Inflation Concerns and Price Perceptions

% concerned about rising prices for everyday purchases AND % that expect higher prices next month

Inflation Concerns

Price Perceptions

% UAE respondents who expect higher prices next month

Key Takeaways

• Concern for inflation in the middle eastern countries is on a continuous declining trend, substantially lower than the global average.
• In both UAE and KSA, expectations that the prices for everyday goods will increase has either remained same or declined for most of the categories. Fuel prices is the only exception as consumers in both the countries expect the prices of gasoline/fuel to go up in the next month.

Impact of rising prices on shopping behavior

% who did each activity while shopping for groceries in the past 4 weeks

- **Shopping with confidence**
  - UAE: Did little to no planning (20%), KSA: Dedicated a lot of time to plan (42%)
  - UAE: Kept the number of stores shopped to a minimum (22%), KSA: Shopped several stores to get their best deals (46%)

- **Trying to save on costs**
  - UAE: Purchased premium meats or cuts (39%), KSA: Purchased low-cost meats or cuts (24%)
  - UAE: Purchased mostly popular name brands (44%), KSA: Purchased mostly store brands (22%)
  - UAE: Purchased premium ingredients most of the time (40%), KSA: Purchased low-cost ingredients most of the time (22%)

- **Economize**
  - UAE: Most of the food I bought was fresh (61%), KSA: Most of the food I bought was processed (11%)

**Key Takeaways**

- **UAE consumers** came out as more price conscious lot compared to Saudi consumers.
- The consumers seemed to be dedicating more time & effort to plan their purchases.
- Both UAE and Saudi consumers do not want to make trade-offs in terms of quality of ingredients.
Spending on joy

% who purchased at least one product to treat themselves in the past month

- Despite signs of financial stress, most are finding ways to treat themselves to a little joy. Nearly 9 in 10 made at least one ‘joy-related’ purchase in the past month, more or less consistent across all the income levels.

- Clothing & Accessories was the most favourite category for consumers in both UAE and KSA when it comes to their joy-related purchases.

Travel Planning (Net intent)

Which statements best describe how you’re thinking about your next leisure trip?

**When & where I travel**
- A destination closer to home
- Visit during a less popular time of the year
- Travel fewer nights
- Low-cost airline
- Cheapest flight itinerary
- Cheapest seats
- Further from where I want to be
- Upper-class lodging
- Spend on the experiences I want to have
- Minimize restaurant spending

**Airline**
- Full-service airline
- Most convenient flight itinerary
- Upgraded seats
- Closer to where I want to be
- Budget lodging
- Free activities
- Minimize restaurant spending

**Lodging**
- Budget lodging
- Spend on the experiences I want to have
- Indulge on restaurants

**In-destination**
- Spend on the experiences I want to have
- Indulge on restaurants

**Key Takeaways**
- Most of the consumers want their travel destination further from home and they are opting for most convenient flight itinerary.
- Consumers from UAE are looking to save costs on lodging and choosing cheapest seats; Saudi consumers are not looking to indulge in a lot of cost saving behaviors and want to enjoy their leisure trip to the fullest.
Vehicle Purchasing Intent

Planning to buy vehicle in next 6 months, reasons for purchasing new vehicle

- Vehicle purchasing intent (VPI) increased over last month in most of the geographies under study. Nearly 6 in 10 Saudi consumers are planning to buy a vehicle in next 6 months, making the kingdom as the 2nd highest region in our VPI rankings across 24 study countries, only behind India.
- UAE consumers are not too far behind and with 48% of consumers looking to purchase a vehicle in next 6 months, ranks the region as the 3rd highest in our rankings. This together represents a promising market for automotive across two of the middle eastern countries i.e. UAE and Saudi Arabia.
- Features/specs continues to be the most enticing factor for consumers to buy new vehicle. The consumers willing to switch to an electric vehicle is also gaining rapid momentum in the region.
