Predictions 2014
Middle East

The smartphone generation gap: over-55s? There's no app for that

Deloitte predicts that in 2014, the over-55s will be the age group experiencing the fastest year-on-year rises in smartphone penetration across developed markets. Ownership should rise to between 45 to 50 percent by year-end, lower than the 70 percent penetration rate for 18-54 year olds, but a 25 percent increase from 2013 (see Figure 14 for smartphone penetration as of May-June 2013)^{404 405}. Over the coming years, the gap should steadily narrow and become negligible by 2020.

The closure of the gap is inevitable: it is becoming almost impossible to buy a feature phone. But while the difference in smartphone penetration by age may disappear, in 2014 there will likely be substantial differences in how individual age groups use them. Although over-55s are increasingly buying smartphones, some use them as feature phones. Getting them to exploit the data functions is a key opportunity for network operators.

Figure 14: Smartphone penetration in developed countries as of May-June 2013

Source: Deloitte Global Mobile Consumer Survey, Developed countries, May-July 2013

Weighted base: (Respondents from all age groups) Belgium (2,000), Finland (1,000), France (2,000), Germany (2,000), Japan (2,000), Netherlands (2,009), Singapore (2,000), South Korea (2,011), Spain (2,000), UK (4,020), US (2,000)

Note: the averages have been calculated by using actual numbers

Figure 15: Smartphone owners that have never downloaded an app by age groups (Developed countries)

Source: Deloitte Global Mobile Consumer Survey, Developed countries, May-July 2013

Weighted base: Smartphone owners (main phone): Belgium (690), Finland (467), France (969), Germany (997), Japan (603), Netherlands (1,136), Singapore (1,632), South Korea (1,587), Spain (1,242), UK (2,392), US (999)

Older generations have been slower in adopting PCs and using the Internet⁴⁰⁶. However once the 55+ group overcame their initial lack of confidence, they became and remain enthusiastic users.

The situation with smartphones is more nuanced: while less powerful than most PCs, smartphones have a wide array of features and functions, from GPS navigation to Internet radio to HD video cameras. Some of this functionality is not straightforward to use, so while features such as navigation may be appealing to seniors, accessing them can be overwhelming.

An additional challenge with exploiting smartphones' full potential requires interacting with the broader ecosystem – such as apps stores – which delivers much of their utility. Deloitte's research found that among 11 developed countries at least one in four smartphone owners aged 55+ had never downloaded an app to their device (see Figure 15)⁴⁰⁷. One of the reasons for this may be the scale of the marketplace: two million apps are daunting, particularly when there is no filter by the user's demographic⁴⁰⁸. In 2014, we expect a quarter of 55+ smartphone owners may not download a single app.

A reluctance to download apps may have an impact on many other dimensions of smartphone usage. For example, we expect that over two thirds of smartphone owners aged 55+ will not use mobile instant messaging (MIM) in 2014. Across the entire base of smartphone users, MIM is one of the most widely used app-based services for smartphones: 56 percent of 18-24 year old smartphone owners use MIM on a weekly basis (see Figure 16).

Similarly, more than two-thirds of over-55s do not use their smartphone for social networking while 75 percent of 18-24 year olds do (see Figure 17). Yet on PCs, as of May 2013, 60 percent of 50-64 year olds and 43 percent of 65+ year olds in the US were using social networking sites⁴⁰⁹.

There are a number of factors that inhibit smartphone adoption by seniors. For example, consumers of all ages are confused by metered data plans; this confusion may be particularly acute among older consumers. Indeed, a quarter of over-55 smartphone owners do not know how large their data allowance is, compared to a sixth for 18-54 year olds. Moreover, many over 55s may be put off by press articles about bill shocks caused by exceeding data allowances⁴¹⁰.

A second challenge is the user interface. Though smartphones have ever-larger screens, few apps and services cater for consumers with less acute vision. One smartphone vendor, however, offers an 'Easy Mode' with fewer home screens, apps with bigger icons and a home screen dedicated to calling, all which are meant to aid the transition to a smartphone for first-time buyers⁴¹¹.

Then there are the apps themselves, which are arguably designed by younger people, for younger people. Among the more than two million smartphone apps, few have been designed for older generations. Apps developed for older consumers tend to focus on health and wellness; some remind these individuals of their diminishing faculties⁴¹². There is no obvious reason why older consumers should not enjoy the same breadth and depth of services as other generations – they should just be customized to be easier to use, or at least more intuitive for older generations with application and functionalities brought to their fingertips.

Figure 16: Weekly IM usage on smartphones by age groups (Developed countries)

Source: Deloitte Global Mobile Consumer Survey, Developed countries, May-July 2013

Weighted base: Smartphone owners (main phone): Belgium (690), Finland (467), France (969), Germany (997), Japan (603), Netherlands (1,136), Singapore (1,632), South Korea (1,587), Spain (1,242), UK (2,392), US (999)

Figure 17: Weekly social networking usage on smartphones by age groups (Developed countries)

Source: Deloitte Global Mobile Consumer Survey, Developed countries, May-July 2013

Weighted base: Smartphone owners (main phone): Belgium (690), Finland (467), France (969), Germany (997), Japan (603), Netherlands (1,136), Singapore (1,632), South Korea (1,587), Spain (1,242), UK (2,392), US (999)

Bottom line

Over a quarter of adults in developed countries will be 55 or older⁴¹³. The attractiveness of the 55+ group has long been recognized: with longer life expectancy⁴¹⁴, older consumers are likely to continue working, accumulate an ever-greater share of global wealth and be increasingly interested in technology⁴¹⁵. This age group – which is likely to continue growing in absolute numbers and share of adults over the medium term⁴¹⁶ – is likely to control a large proportion of disposable income in their countries⁴¹⁷. They are not just an untapped market; they are a lucrative untapped market.

For wireless carriers, targeting the over-55s could be particularly effective. Carriers should ensure that all aspects of service, from the structure and explanation of tariff plans, to customer service are appropriate for this group. They could also offer all-you-can-app tariffs, which would provide unlimited access to customers' preferred services for a fixed fee⁴¹⁸. Network operators may wish to offer multi-generation family tariffs, which would, for example, allow older generations to gift air time and data bundles to relatives.

Carriers should create dedicated customer service programs labelled as 'for first-time' users, but with seniors likely to be key users and beneficiaries of such a service. The service should include online, telephone based and in-store assistance with app downloads, browsing, GPS based navigation, video calling and mobile instant messaging⁴¹⁹. A dedicated customer service plan could become a key differentiator in a market in which self-service is being increasingly pushed by operators. Mobile carriers may consider setting aside dedicated retail space for first time smartphone users within their stores to grow revenues not just from older consumers but also from tentative smartphone users of all age groups.

Discoverability remains a key inhibitor to app downloads. App store providers may need to consider adding filtering options based on demographic relevance. Moreover, as some consumers in this age group may delegate the app discovery and download process to friends or family, app developers may need to consider adding a functionality that allows approved users to take control of devices remotely.

This communication contains general information only, and none of Deloitte Touche Tohmatsu Limited, its member firms, or their related entities (collectively, the "Deloitte network") is, by means of this communication, rendering professional advice or services. No entity in the Deloitte network shall be responsible for any loss whatsoever sustained by any person who relies on this communication.

About Deloitte

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee ("DTTL"), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as "Deloitte Global") does not provide services to clients. Please see www.deloitte.com/about for a more detailed description of DTTL and its member firms.

Deloitte provides audit, tax, consulting, and financial advisory services to public and private clients spanning multiple industries. With a globally connected network of member firms in more than 150 countries and territories, Deloitte brings world-class capabilities and high-quality service to clients, delivering the insights they need to address their most complex business challenges. Deloitte's more than 200,000 professionals are committed to becoming the standard of excellence.

About Deloitte & Touche (M.E.)

Deloitte & Touche (M.E.) is a member firm of Deloitte Touche Tohmatsu Limited (DTTL) and is the first Arab professional services firm established in the Middle East region with uninterrupted presence since 1926.

Deloitte is among the region's leading professional services firms, providing audit, tax, consulting, and financial advisory services through 26 offices in 15 countries with more than 3,000 partners, directors and staff. It is a Tier 1 Tax advisor in the GCC region since 2010 (according to the International Tax Review World Tax Rankings). It has received numerous awards in the last few years which include Best Employer in the Middle East, best consulting firm, and the Middle East Training & Development Excellence Award by the Institute of Chartered Accountants in England and Wales (ICAEW).
