

ANC NATIONAL GENERAL COUNCIL 2015

Progressive Business Forum Business Programme 8th to 12th of October

Dear delegates

You are invited to participate in the ANC Progressive Business Forum's Business programme at the ANC's National General Council 8th to 12th of October. The programme, running alongside the NGC plenary sessions, is an opportunity for the private sector to engage the ANC leadership directly on its economic and social policies right at the centre where policy is being discussed and debated.

The Round Table sessions, facilitated by Deloitte and comprising of a panel of representatives from industry bodies, business and independent subject matter experts, will follow the Minister's briefings. Each themed session will focus on the various processes which must be unlocked in order to move along the design, institutionalization, delivery and implementation of the NDP continuum in critical areas.

The output of the sessions will feed directly into the ANC leadership debate on policy and plans, providing the private sector lens on the blockages and interventions that need to be addressed.

Round table 1: Regulatory impact on investment (Auditorium) 2.00 pm Friday 9th of Oct

Facilitator: Dr Martyn Davies, Managing Director, Frontier Advisory Deloitte

Panel: Ms Khanyisile Kweyama, CEO Business Unity South Africa, Mr Edward Kieswetter, CEO Alexander Forbes, Mr Simon Freemantle, Senior Political Economist, Standardbank

In order to encourage and drive investment in the South African economy, an enabling regulatory environment needs to be created that is confidence creating, transparent and efficient. Capital will always flow to places and projects that offer predictable returns. This is the "political economy" of development – how the state governs and creates a regulatory environment that is designed for rapid and inclusive growth. How can the regulatory environment in South Africa be streamlined to maximize investment & capital formation?

Round table 2: Infrastructure funding (Auditorium) 10.30 am Saturday 10th Oct

Facilitator: JP Labuschagne, Infrastructure & Capital Projects Lead, Deloitte

Panel: Mr Kostas Rontiris, Chief Executive Officer, SMEC; Mr Vuyani Jarana, Chief Officer, Vodacom Business; Mr Faizel Motlakar, Chief Executive Officer, Motlakar Group 5

Infrastructure has been identified as a critical driver of economic growth and social upliftment in the country. However, despite the programme of investment in public infrastructure which is aimed at stimulating investment, there hasn't been the take up from the private sector. If the state is to play a catalytic role to increase levels of private sector investment what does that role look like and what can be done to stimulate private sector investment?

Round table 3: The Labour market (Auditorium) 2.00pm Saturday 10th of October

Facilitator: Dr Kgosi Maepa, Director, Public Sector Solutions, Deloitte

Panel: Ms Lerato Molabatsi, Executive Vice President Communications & Public Affairs, Lonmin; Elize van der Westhuizen, Agrisa; Mr Nelson Sebati : Head: Empowerment Advisory, Mindworx

The NDP vision has a 6% unemployment rate target by 2030, a -19% drop from where we are now. Government has proposed a combination of interventions outlined in the NDP (macroeconomic policy, industrial strategy, infrastructure development and skills development). It is also looking at the introduction of a national minimum wage as one of the key mechanisms to reduce income inequality. How do we balance fair compensation for employees with the need to be competitive in the international market?

Round table 4: Education & Skills development (Auditorium) 10.30 am Sunday 11th of October

Facilitator: Mr Nkululeko Oliphant, Director, Public Sector Solutions, Deloitte; Mr Peter Present, Education Lead, Deloitte

Panel: Mr Pule Mokoena, Chief Executive Officer, Black Business Council; Mr Thabang Chiloane, Divisional Executive, Nedbank; Mr Jay Ramundall, Chief Executive Officer, Richfield Graduate Institute of Technology

Although more students have had access to education in the last 20 years, our basic education system is not providing the quality of education that is required for learners to move on to developing the skills required by the marketplace. One of the main issues in basic education is that teachers are underprepared both in terms of content and teaching methods. One of the ways to address this could be by giving learners more control of their own learning through the use of ICT, what role can the private sector play in ICT for education? In terms of skills development, government has introduced a number of agencies to assist young people but they are becoming overwhelmed by the scale of the demand. How could we make these agencies more effective, can the private sector play a greater role in providing skills training?

DELOITTE PUBLIC SECTOR

ANC National General Council 2015

Nazeer Essop
National Industry Leader
+27 82 827 8607
