## Key tax developments in South Africa

### South Africa

#### **Tax Clearance (TCC) process**

SARS has announced the introduction of an enhanced Tax Compliance Status System, aimed at making it easier for taxpayers to obtain a Tax Clearance Certificate (TCC). The system will allow taxpayers to obtain a Tax Compliance Status (TCS) PIN, which can be used in place of a TCC by authorised third parties to verify a taxpayer's compliance status online). SARS has indicated that it intends moving away from the use of the TCC mechanism and that, in future, the Tax Compliance Status and PIN system will be the only system in use.

#### **Voluntary Disclosure Programme (VDP)**

In the 2016 Budget Speech, the Minister of Finance announced a Special Voluntary Disclosure Programme to give opportunity for non-compliant taxpayers to voluntarily disclose offshore assets and income. With a new global standard for the automatic exchange of information between tax authorities providing SARS with additional information from 2017, time is now running out for taxpayers who still have undisclosed assets abroad. At the same time a program has been introduced to enable South African residents to regularize any past exchange control violations. This is a final opportunity for South Africans to regularize any undisclosed foreign assets that they may have from both an income tax and exchange control perspective and they would be strongly advised to make use of it. For more information on the VDP programme click [here](#).

On 12 April 2016, National Treasury issued an additional media statement on the VDP: [More](#)

## Key tax developments in the rest of Africa

# Algeria

## Tax exemption on government bonds<sup>1</sup>

The Algerian Tax Administration recently issued a note regarding the issuance of government bonds starting from 17 April 2016, with interest on those bonds benefiting from a tax exemption. Subscriptions will be available for both individuals and companies, and the interest rates will range from 5% to 5.75%, dependent on the reimbursement period.

# Democratic Republic of Congo

## Refund of input VAT credits<sup>2</sup>

The DRC government has decided to suspend the refund of input VAT credits for all taxpayers on 18 April 2016. This measure is a direct consequence of the fall of tax revenues triggered by the decrease in prices of commodities (mainly copper and cobalt). The VAT Law provides that export businesses, companies ceasing their activities, oil and mining companies (during the exploration phase) and companies making significant investments are entitled to request input VAT credit refunds.

# South Sudan

## Financial Act 2014/2015<sup>3</sup>

The Ministry of Finance and Economic Planning announced that the Financial Act 2014/2015 was signed into law on 21 March 2016. The Act makes the following main revisions to the Taxation Act 2009 (as amended):

- The classification of enterprises and the business profits tax (BPT) rates payable by each class have been revised.
- The exemption previously granted to basic food items, from advance payments of income tax on imported goods, has now been eliminated. Therefore, all imported food items are now subject to tax at the rate of 2%, while all other imported goods are now subject to tax at the rate of 4%.

The amendments to the classification of enterprises and BPT rates apply with effect from the 2015 tax year (i.e. returns due for filing on or before 1 April 2016). The amendments to the excise duty rates are applicable to returns for April 2016 (i.e. due for filing on or before 15 May 2016).

### **Africa from the Inside: Spotlight on Africa’s Growth Model** \*\* [Africa](#)

In Africa, 2016 promises to be another year of economic readjustment for most African economies whose terms of trade have turned negative following the end of the so-called commodity super-cycle. Economic headwinds are often compounded by lethargic governments who are unwilling to carry out overdue structural reforms.

### **Northeasterly bearing: Economic Analysis of Burundi 2015** \*\* [Burundi](#)

Despite great strides in the improvement of the business environment, the development of the private sector remain still constrained by lack of electricity and the weakness of the judicial system. Long term wise, the future of Burundi is very promising and the acceleration of the construction of hydroelectric dams projects, mining of the reserves of Nickel and the reform of both coffee and tea sector, seem to be able to bring the country's growth to 8% + and to reduce the level of poverty.
