INTRODUCTION

Executive summary

For 36 years, the annual holiday survey has helped gauge consumer sentiment heading into retail’s crucial months. This year, we wanted to get a more holistic view of the changing landscape and added a new retail executive survey of 30 retail buyers, along with our survey of more than 4,000 consumers. In addition, a new holiday travel survey may shed light on how people plan to socialize away from home this year.

As we enter the second holiday season during the pandemic, the question on everyone’s mind is will the holidays ever return to normal? Some trends seem to be heading that way. Improving anxiety around health and safety may have aided overall average spend (up 5% YoY). Some consumers expect to incorporate more in-store shopping this year, while others are venturing out to entertain, socialize, and travel, boosting spend on experiences (+15% YoY), echoing expectations found in our holiday economic forecast.

But it’s clear a bounce back to pre-pandemic trends is not likely in the works. Digital platforms that consumers tried during the pandemic for safety reasons have become habits because of the conveniences they offer. And consumers plan to start shopping earlier than in the past two years because of concerns around inflation and supply chain constraints, an opportunity for retailers, as early shoppers tend to spend more.

Perhaps the most sobering pandemic trend is that low-income groups continue to suffer. Their average holiday spend decreased more than 20% YoY, while high-income spend is on the rise.

The executives we surveyed, however, were optimistic that consumers were ready to embrace the holidays again and were eager to find opportunities within the evolving pandemic challenges. Retailers that welcome the next normal and meet the shifting needs of the consumer may be well-positioned for a strong holiday period and beyond.
At-a-glance: Key findings

**Sentiment**
*All is bright... for high-income*

**Consumers:** Average spend up 5% YoY boosted by a return to experiences (up 15% YoY), but gains largely driven by high-income groups.

**Retail executives:** Upbeat outlook, with seven in 10 expecting consumers to spend more YoY.

**Consumer behavior**
*Dashing through the stores*

**Consumers:** Some pandemic behaviors are sticking with 62% of spending expecting to occur online, while a decrease in anxiety levels motivates some to return to stores.

**Retail executives:** Betting on consumers returning; holiday inventory orders up single digits for four in 10, up double digits for three in 10.

**Supply chain**
*Delivery time is frightful*

**Consumers:** Concern for stockouts (75%) and shipping delays will likely motivate shoppers to start earlier YoY.

**Retail executives:** 6 in 10 worried about receiving holiday orders on time; majority expect holiday shopping to start one to two weeks earlier.

**Inflation**
*It’s beginning to look a lot like markups*

**Consumers:** 68% expect higher prices this season, hitting lower-income groups especially hard.

**Retail executives:** Consumers should expect higher prices, as depth of promotions won’t negate higher prices (five in 10).
Key findings

**Sentiment: All is bright... for high-income**
- Overall holiday spend up YoY 5%, with average spend at $1,463 (versus $1,387 in 2020) largely driven by higher-income households.
- Household financial situations steady, with 78% in similar or better shape than last year (versus 71% in 2020).
- While higher-income households are driving the growth in average spend, lower-income represents 65% of the total non-spenders this holiday season.
- **Retail executives’ view:** 73% expect shoppers to spend more or significantly more this holiday season.

**Consumer behavior: Dashing through the stores**
- More consumers venturing out as health and safety anxiety decreases (40% consumers anxious versus 51% in 2020), aiding spend on experiences (up 15% YoY).
- Engagement with digital platforms remains high, and 62% of spend is expected to occur online, while curbside pickup and BOPIS remain popular for convenience aspect.
- 28% say they plan to use social media this holiday, primarily for researching products.
- **Retail executives’ view:** 40% expect double-digit online channel growth.

**Supply chain: Delivery time is frightful**
- 75% shoppers concerned about stockouts, especially with electronics, accessories, toys, and hobbies.
- Four in 10 will likely start their shopping earlier this year, citing potential shipping issues (49%) and stockout issues (47%) for the shift in timing.
- 68% shoppers plan to shop before Thanksgiving (versus 61% in 2020) due to stockout concerns.
- **Retail executives’ view:** 64% concerned about receiving inventory in time for the holidays.

**Inflation: It’s beginning to look a lot like markups**
- 39% of consumers (versus 20% in 2020) say they may spend more this year due to higher prices in general.
- Of those that plan to spend less this holiday season, 50% blame it on higher food costs (versus 31% in 2020).
- 60% consumers say “getting a great deal” is the top attribute for retailer selection but higher prices and fewer promotions mean deals may be harder to find.
- **Retail executives’ view:** 53% expect retail product prices to increase this holiday season; 57% expect flat or lower promotional activity YoY.
Consumer sentiment

All is bright...for high-income
Financial situations stabilize and retail executives plan for a comeback

67% expect the economy to improve or remain the same in 2022.¹ (versus 73% in 2020)

78% have a similar or better household financial situation.² (versus 71% in 2020)

Questions: (1) "In your opinion, what is your overall outlook for the U.S. economy in the year 2022 compared with today? Would you say it will likely...?" – Percentage of Improve modestly/significantly and remain the same; (2) “Thinking about your household’s current financial situation, would you say it is...?” – Percentage of A lot better than/Somewhat better than/The same as it was last year at this time.

Note: Sample Size (N)=4,315.

- **11.5 miles** is the average distance shoppers will travel to buy a gift from a retailer *(up almost two miles from 2020)*
- **42%** prefer shopping at local retailers more than national retail chains
- **40%** are anxious about shopping in-store this season due to COVID-19 *(down from 51% in 2020)*

Question: “How many individual retail stores or websites/apps do you expect to visit when purchasing holiday gifts over the next several months?” – Number of physical stores visits; “How far will you travel to purchase a gift from a retailer?”; “I prefer shopping at local retailers over national retail chains” – Percentage Strongly agree and Agree; and “I’m anxious about shopping in-store during the holiday season due to COVID-19” – Percentage Strongly agree and Agree.

Note: Sample size (N)=3,836.
Reliance on digital platforms remains, though consumers still prefer delivery to the doorstep

![Preferred delivery service chart](image)

Question: “Which of the following delivery services are you likely to use during the upcoming holiday shopping season?”

Sample size (N)=3,836.
Social media serves as a source of inspiration

Questions: “Do you plan to use social media sites to assist in your holiday shopping (e.g., research, purchase)?” and “During this holiday season, how do you plan to use social media for shopping?”

Note: Sample size (N)=3,836.
Three key shopper types seen this holiday season

**Hopeful**

36% of holiday shoppers

$1,437 average spend

Financially weaker but hopeful about economic prospects, this group will shop later and for a shorter duration.

**Prepared**

26% of holiday shoppers

$1,773 average spend

Financially better off but slightly skeptical about the economy, this group is not anxious about shopping in store and likes to be prepared, shopping early.

**Conscious**

17% of holiday shoppers

$2,228 average spend

Financially secure and optimistic about economic prospects, sustainability considerations and social media influence their choices.

**Late, shorter-duration shoppers:** 40% start shopping on or after Thanksgiving (versus 31% overall); 35% shop for less than five weeks (versus 29% overall)

**Shop at few formats:** 67% will shop at one to four retail formats (versus 51% overall)

**Sustainability is preferred:** 50% prefer shopping at retailers that adopt sustainable practices (versus 42% overall)

**How to win:**

Offer a broad range of promotions late in the season: these consumers are looking to knock out their shopping efficiently, closer to the holidays. 32% believe they get the best deals if they shop late in the season (versus 19% overall) and are likely looking for the convenience of one-stop shopping.

**Early shoppers:** 52% start shopping in or before October (versus 44% overall)

**Shop at few formats, least anxious:** 60% will shop at one to four retail formats (versus 51% overall); only 29% are anxious about shopping in-store (versus 41% overall)

**Low sustainability considerations:** 55% unwilling to pay extra for certified sustainable goods (versus 37% overall)

**How to win:**

Promote convenience, early deals - these shoppers are planners, looking for deals and to avoid the hassle of the holiday bustle. 45% believe they get the best deals if they shop early in the holiday season (versus 38% overall), while 45% consider ease of checkout process while selecting a retailer (versus 40% overall).

**Longer-duration shoppers:** 39% shop for nine weeks or more (versus 29% overall)

**Shop at many formats, support local:** 57% will shop at nine or more retail formats (versus 13% overall); 52% shop at local independent stores (versus 28% overall)

**Sustainability is a priority:** 63% prefer shopping at retailers that adopt sustainable practices (versus 42% overall); 76% willing to pay more for certified goods (versus 63% overall)

**How to win:**

Leverage digital platforms: these shoppers seek out the conveniences of digital channels with 37% planning to use social media to assist in holiday shopping (versus 29% overall), while 50% (versus 34% overall) plan to use BOPIS (Buy Online, Pick Up in Store).
Supply chain

Delivery time is frightful
With concerns about stockouts and delivery delays, four in ten seek to beat the rush

Reasons for starting to shop earlier
of the 39%

- To ensure timely delivery of items I order: 49%
- To avoid any out-of-stock situation for the items I want: 47%
- To complete holiday shopping soon and focus on what matters more to me in the holiday season: 40%
- To avoid crowds later in the shopping season: 38%
- I am unsure about how the COVID-19 pandemic will play out (e.g., new variants): 33%

39% plan to start shopping earlier this holiday season

Questions: Please state how much you agree with each of the following statements: “I plan to start shopping earlier this holiday season” – Percentage Strongly agree and Agree; and “Why are you likely to start your holiday shopping earlier this year compared to last year?” This question asked was a multiple-response question. Notes: Sample Size (N) = 3,836.
Retailers and three-quarters of consumers fear stockouts

About the survey

About the consumer survey
This survey was commissioned by Deloitte and conducted online by an independent research company between September 7–14, 2021. It polled a national sample of 4,315 consumers and has a margin of error for the entire sample of plus or minus one to two percentage points.

About the retail buyer survey
This survey was commissioned by Deloitte and conducted online by an independent research company between September 3–6, 2021. It polled 30 retail executives across retail categories, 90% of which have annual revenues of $1 billion or more. The executives included buyers, senior buyers, and managers who had a medium or high level of involvement in buying and merchandizing for the coming holiday season.

Deloitte Consumer Industry Center

The Deloitte Consumer Industry Center provides premiere insights based on primary research on the most prevalent issues facing the consumer industry to help our clients run effectively and achieve superior business results. The center is your trusted source for information on leading trends and research that connect insights, issues, and solutions for Deloitte's four consumer sectors: automotive; consumer products; retail, wholesale, and distribution; and transportation, hospitality, and services.

About Deloitte

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee ("DTTL"), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as "Deloitte Global") does not provide services to clients. In the United States, Deloitte refers to one or more of the US member firms of DTTL, their related entities that operate using the "Deloitte" name in the United States, and their respective affiliates. Certain services may not be available to attest clients under the rules and regulations of public accounting. Please see www.deloitte.com/about to learn more about our global network of member firms.
