The inflation story takes center stage in our 16th annual back-to-school (BTS) survey. Although parents were willing to endure higher prices last year for replenishing BTS items after the pandemic, 18 months of inflation have changed their tune. Uneasiness about the economic situation is creating price sensitivity and causing parents to reassess how they’ll approach shopping for the upcoming school year.

BTS is typically the second largest spending event for families after the holiday season, which causes shoppers to be heavily motivated by deals. With prices of school supplies increasing 23.7% in the past two years, BTS shoppers’ need for a bargain is even more palpable. Consumers are also reflecting on priorities. Findings in our Global State of the Consumer Tracker indicate consumers are looking to (re)pad their savings accounts. They also plan to shift more of their budget to experiences, like leisure travel, over goods. Half of consumers plan to go on a summer trip that includes paid lodging, versus 46% last year.

So where does that put BTS on the priority list? Parents—across all three income groups—plan to pull back this year, with total spend dropping 10% year over year (YoY). The focus is on replenishing the necessities, such as school supplies, while holding off on nonessential purchases like tech and apparel.

The shopping journey will be centered around finding ways to economize—for instance, researching the best deals, shopping earlier, and homing in on how to get items (and return them) in the most affordable manner.

But it’s not all doom and gloom for retailers. This is back-to-school, after all—an event that invokes nostalgia, family traditions, and a desire to please our children. Nearly 6 in 10 parents surveyed say they would be willing to splurge for the right reasons, like treating their child, self-expression, or better quality. Retailers that can understand the drivers of splurging may be able to capitalize on those willing to part with a little extra cash.

Executive perspectives

Inflation takes a toll
As persistent inflation weighs on parents, many are having to make strategic decisions when it comes to their BTS budgets this year. Spending per child is expected to decrease 10% to $597, with all three income groups pulling back YoY.

Parents protect their wallets
With parents looking to economize, they're focusing on necessities like school supplies (+20%), while pulling back on apparel (–14%) and tech (–13%). Sustainable items—once a priority—are on the back burner, with only 35% planning to purchase them (versus 50% in 2022).

Financial fatigue shapes shopping behaviors
The entire shopping journey is about minimizing costs this year. Parents are shopping earlier for deals (59% of the budget will be spent by the end of July versus 53% in 2022), and they're choosing to pay with cash (77% versus 72% in 2022). They're prioritizing in-store purchases, but when they do shop online, they expect low purchase minimums for free shipping and returns.
## Cheat sheet

### Parents plan to spend less in the face of inflation

**Average spend per child** is expected to **decrease 10%** to $597 (versus $661 in 2022); all income groups plan to spend less

68% plan to spend the same or less **YoY** (versus 63% in 2022)

Among parents spending less, 51% attribute it to **reduced disposable income**, while 75% of those spending more point to **increased prices**

However, many parents are **willing to splurge on clothing/accessories** (57%) and **tech items** (56%) for **better quality** or to treat their child

### Financial fatigue shapes economic outlook

51% anticipate a weakening economy in the next six months

Prolonged inflation has led to a **worse financial situation for 31% of parents** over the past year

Parents are pulling back spending in clothing (~14% YoY) and tech (~13% YoY) categories, while **school supplies (+20% YoY)** are expected to be the bright spot

**Overall BTS market size** is projected to come in at **$31.2B**, down 9% **YoY**

### BTS shoppers look to economize

Parents plan to **use cash, check, and debit more prominently** (77% versus 72% in 2022)

By the end of July, 59% of BTS spending is expected to be completed, up from 53% in 2022

49% **research online** before buying in-store; 55% **review return policies** before shopping

**Shoppers prioritize retailers with competitive pricing**, favoring mass merchants (80%), online retailers (60%), and off-price retailers and dollar stores (33%)

**Shoppers are willing to spend an average of $32** to qualify for free shipping

59% will only shop at retailers offering **free returns**

### Digital preferences

62% plan to use **social media for deal seeking** (versus 56% in 2022); overall usage, however, is on the decline (21% in 2023 versus 35% in 2022)

Nearly half of parents are concerned about their child’s **mental health**; 36% of those say smartphones have complicated their children’s lives

**Generative AI adoption in schools** is nascent; 15% of children use it for schoolwork, and only 26% of parents see it as a positive tool for academic performance
Spending trends
**BTS shoppers plan to rein in spending and focus on the necessities**

All income groups are pulling back spending on BTS proportionally\(^1\)

34% are postponing nonessential BTS purchases\(^2\) versus 31% in 2022

---

**Questions:** (1) “How much do you plan to spend on these categories during this back-to-school shopping season?”, (2) % agree/strongly agree.

**Notes:** N = 1,212; *Deloitte calculations on BTS spend based on annual consumer survey projections (N = 1,212) and K-12 enrollment figures from US Census Bureau’s Current Population Survey (CPS)—School Enrollment Supplement; *Average spend per child only takes into consideration those who plan to shop for BTS items this season.

After replenishing BTS items the past two years, parents are planning to pull back their spend to $597 per child

Notes: Deloitte calculations on BTS spend based on annual consumer survey projections (N = 1,212) and K-12 enrollment figures from US Census Bureau's Current Population Survey (CPS)—School Enrollment Supplement. (1) *Preconfigured school kits* were added to school supplies in 2023 and are not included in 2022 or prior years; (2) Tech products include computers and hardware, electronic gadgets, digital subscriptions, and voice/data plans; (3) Other includes COVID-19–related items like sanitizers, face masks, and furniture for home (desks, chairs, etc.).
The pullback comes as families are feeling fatigued by continuing financial stress

3 in 10 are in a worse financial situation than last year, while half expect the economy to weaken in the next six months

Questions: (1) “Thinking about your household’s assets (home, cash, car, etc.) and your liabilities (credit card bills, mortgage, etc.), would you say your household’s financial situation today is worse than it was last year?”; (2) “What is your overall outlook for the US economy in the next six months in 2023 compared with today?”

Note: N = 1,212.

About the survey

Survey timing
May 26 to June 01, 2023

Sample
The survey polled a sample of 1,212 parents of school-aged children, with respondents having at least one child attending school in grades K to 12 this fall. The survey has a margin of error of plus or minus three percentage points for the entire sample.

In 2023, Deloitte revised our sampling approach to more tightly target US households with children ages 5–18 and ensure a nationally representative sample based on household income, parent’s gender, age, education, and race/ethnicity matched to known US Census figures as closely as possible.

Methodology
The survey was conducted online using an independent research panel.

Thank you
The authors would like to thank Srinivasarao Oguri, Kusum Manoj Raimalani, Anup Raju, Sangharsh Shinde, Ram Sangadi, David Levin, Negina Rood, Rithu Mariam Thomas, Brooke Furman, Kianna Sanchez, and Michele Stoffel for their contributions to this survey.
Consumer Industry Center

The Deloitte Center for Industry Insights is the research division of Deloitte LLP's Consumer and Industrial Products practices. The center's goal is to inform stakeholders of critical business issues, including emerging trends, challenges, and opportunities. Using primary research and rigorous analysis, the center provides unique perspectives and seeks to be a trusted source for relevant, timely, and reliable insights.

About the Deloitte Retail practice

The retail industry is transforming at lightning speed, and retailers are being forced to find ways to grow profitably while also meeting rising consumer expectations. Today’s customers don’t just expect the retail industry to operate efficiently, but empathetically too. They are buying into better and are demanding that brands share their values around purpose, inclusion, trust, transparency, and innovation.

Leaders in this rapidly shifting industry should have better insight, better innovation, and a better connection to their customers. That’s why they turn to Deloitte. Driven by a relentless pursuit of innovation and the pulse of the consumer, Deloitte helps many of the world’s leading brands in the retail sector align with their customers’ values, create lasting competitive advantages, build enduring customer relationships, and shape the future of the industry. www.deloitte.com/us/retail
