Early adopters combine bullish enthusiasm with strategic investments

Positive return on AI investments

Cybersecurity tops AI concerns

Minds plus machines equals more

The automation dilemma

Talent: more help wanted

Cloud jumpstarts AI adoption

Insights from images and sounds unleashed

State of AI in the enterprise
2nd annual survey highlights

For the second year, Deloitte surveyed U.S. business leaders who are creating the future of artificial intelligence and the enterprise. They came together to share research-driven insights in order to help businesses harness the energy generated by technology, anticipate the impact of emerging trends, and chart a strategic course to move beyond the digital arc and enhance customer and employee engagement.

Each of the AI survey participants is an innovator: 1,100 CEOs are closely involved with their company's AI plans.
